

TRIALS of the NEEDLEMS

MR. LAWYER, I WANT TO GET A DIVORCE I CAN'T LIVE WITH THIS WOMAN

HERE MR. NEEDLE TAKE THESE PAW-PAW PILLS AND TRY THEM FOR YOUR MILEGERS

MR. NEEDLE'S MOST DIVORCES ARE CAUSED BY INDIGNATION ON SOME LIVER TROUBLE CAN BE CURED BY MUNYON'S PAW-PAW PILLS

Munyon's Paw Paw Pills coax the liver into activity by gentle methods. They do not scour, gripe or weaken. They are a tonic to the stomach, liver and nerves; invigorate instead of weaken. They enrich the blood and enable the stomach to get all the nourishment from food that is put into it. These pills contain no coloring; they are soothing, healing and stimulating. For sale by all druggists in 10c and 25c sizes. If you need medical advice, write Munyon's Doctors. They will advise to the best of their ability absolutely free of charge. MUNYON'S, 534 and Jefferson Sts., Philadelphia, Pa.

Munyon's Cold Remedy cures a cold in one day. Price 25c. Munyon's Rheumatism Remedy relieves in a few hours and cures in a few days. Price 25c.

To Make Farm Smokehouse.

What I have found to be a good smokehouse for curing 75 to 100 hams should be about 12x14 feet. Build a good, strong frame and fill the space between the siding and ceiling with soft brick, writes A. C. Wharton in American Agriculturist. This will make your house cooler in summer and will keep the temperature more even in winter. Cover with shingles. A good solid clay floor will do very

well, but a tight plank floor is better, but best of all is a good concrete floor. In the center of the floor there should be a firebox built of brick; this is about 12x18 inches inside measurement and 12 inches deep. When curing build your fire in this and cover with a piece of perforated sheet iron. The house should be eight feet high at the corners and left open to the comb, the inside of the rafters preferably celled. Place 2x8 joists two feet apart on the plates, and 2 1/2 feet above these put in another set of joists on the rafters; these will be used to hang your hams place iron meat hooks two feet apart and two inches from the lower part of the joists. These hooks can be made of one-quarter inch rod iron and should be long enough to let the meat hang clear of the joists.

A window should be made in one end of the house to give light when

needed, and this fitted with a tight shutter, as we do not want much air and sunshine to strike meat before or after curing.

Culture of the Orchard.

Cultivation of the orchard is mainly for conserving soil moisture. If cultivation is begun early in the season and continued until midsummer, growth of wood will be stimulated and fruit developed. Less moisture in late summer and early fall is desired, so that wood will properly develop and harden to be able to stand the cold of the following winter. Arrange to cultivate the orchard early in the summer and have the soil in good fix for sowing to rye or other cover crop toward the last of summer. The cover crop will afford some good winter pasture and will keep hilly land from washing away.

Judging Worth of Farm.

The best time of the year to look over a farm for the purpose of buying is in the summer, just before the binders get to work. The good and poor places will show up then as at no other time, and, if the season prior to that time has been an average one, the crop will be a fair index of the value of the land. The common practice of going farm hunting just after the spring's work is over has little to commend it, save the inconsiderable matter of time saved. The poorest time in the whole year to pick out a farm is when it is covered with drifts of snow.

Control of San Jose Scale.

Although the San Jose scale is a thing to be avoided, it is not dreaded so much as it used to be. The lime sulphur wash will prevent the disease from spreading. It is a cheap wash for small trees, but quite expensive for large trees, but it pays. Spraying, cultivation, pruning and care of any crop, if properly done, are to a certain extent expensive and troublesome, but they pay in the end in the quantity and perfectness of the fruit.

Preparing Corn Seed Bed.

It is a good rule in plowing never to leave the corn field either at noon or at night without first harrowing the ground that has been plowed. Spring plowing is often abused by turning the clods up to the sun and dry wind to bake and dry, and depending upon a shower to mellow the ground before planting. No ground is

really properly prepared as a seed bed for corn without the use of the disc. A poorly prepared seed bed means a poor stand and an uneven growth. Such corn suffers from drought and insects.

Corn Cut for Silage.

Corn of any variety is at its best for feeding or silage as it comes from the field when about half of the ears are just past the age for table use—commonly called roasting ear stage—and the lower leaves on the stalk are beginning to dry out, says Hoard's Dairyman. For silaging purposes, it is impracticable to have the crop at its very best for any considerable time. Commence to cut a few days before it reaches its maximum value and continue after this stage is passed. Experiments appear to have demonstrated that for fodder the largest amount of nutriment per acre is obtained by planting in continuous rows and so thick that the tendency to form ears will be much lessened. The yield per acre depends so much upon the variety and the soil and care in planting and cultivating that no satisfactory estimate of the average can be given. There is almost no limit to the amount that may be fed, provided one commences with a limited amount and increases gradually up to the limit of each cow's appetite, but probably thirty to forty pounds a day is about as much as it would usually be profitable to feed.

Stiff Tongue for Sled.

This is a very great improvement over the old way of having the tongue mitered into a roller which would turn and when the team would try to hold back going down hill the tongue would fly up, sometimes clear over their heads, and prove to be of very little account. Many people, says a writer, do not know of any better way yet, so I will try to show you a better way, a way that takes the weight off

the horses' necks and at the same time holds the tongue rigid when going down hill. First get a nice straight locust sapling for a tongue, one having a natural fork at the end for the neck yoke, as shown. Have your blacksmith make two loops from an old wagon tire as seen at A, with half inch holes and bolts to attach them to the two forward cross-pieces of sled, holes being bored in the cross-pieces to match holes in irons. The tongue is then notched a little to receive the cross-pieces.

How Often to Milk.

Most farmers and dairymen milk their cows only twice a day, and that is right. Sometimes a fresh cow needs to have an excess of milk drawn between times in order to prevent congestion and fever, but not for a long period. Some cows again have leaking teats, which waste the milk if not relieved three or four times a day, but such cows are a nuisance and should be disposed of. To milk twice a day is enough as a general rule. To milk three times a day does not seem to bring more milk, though some people have thought so and acted on that supposition.

Keeping Cellars in Order.

Very frequently the cellar is lacking in conveniences. This should not be so; there ought to be a cement floor, bins for potatoes and a rack for milk pans and such articles. Here is a good rack. Take a post 6 inches square; on this nail cleats, 1 inch thick and 1 1/2 inches wide, in pairs, that is, one on the north side, one on the south side exactly even, and just above these one on east and one on west, leaving 4 inches between each two pairs, and have them long enough to hold milk pans at each end. To use for plates, cans, etc., fasten some boards on for shelves.—Cor. Farm and Home.

Pointers in Farm Management.

The wise farmer wants assurance on the soil of any land that he may contemplate buying.

Clover alone can not indefinitely maintain the land. A rotation will not enable us to maintain the fertility of the soil.

Acidity may be overcome by applying from 500 to 1,000 pounds of lime per acre, or by the use of floats or grounds shells.

There is much of value written these days about work on the farm which will never benefit some farmers, because they have the notion that they are too busy to read.

No other people set so high a value on good soil as the Hollanders, and we are learning that not many acres, but rich ones, make the profitable farm.

The roots of the cowpea penetrate rather deeply into the subsoil and enable the plant to feed upon the mineral food that is not readily extracted by other crops.

It is the wise farmer who feeds all he raises and then buys some from his neighbors to feed. The farmer who carries such an amount of live stock will be constantly improving his land and making it more productive.

THE WONDERBERRY OR SUNBERRY

Has Proved a Great Success—Thousands Say It's the Best Thing They Ever Grew.

The Wonderberry or Sunberry, the marvelous garden fruit originated by Luther Burbank, and introduced by John Lewis Childs, the well-known seedsman of Floral Park, N. Y., has proved a great success all over the country. Thousands of people say it is the best thing they ever grew.

Mr. John Burroughs, the well-known author, Naturalist and bosom-friend of Theodore Roosevelt, says it is the most delicious pie berry he ever tasted, and a marvelous cropper.

A Director of the New York Agricultural Experiment Station says it fruits abundantly even in pure sand. In the short season of Northwestern Canada it is a godsend, and fruits long after frost has killed most garden truck.

D. S. Hill, Wichita, Kan., says thirty people grew it there last season with perfect satisfaction.

K. S. Enochs, Hammond, La., says it yields \$250 worth of fruit per acre with him. Mrs. J. H. Powers, 4732 Kenwood avenue, Chicago, raised enough berries on a space 4x10 feet to supply herself and friends.

J. P. Swallow, Keaton, Ohio, says its equal for all purposes does not exist.

Rev. H. B. Sheldon, Pacific Grove, Cal., says he likes the berries served in any and every way.

W. T. Davis, Enon, Va., says it is true to description in every way, and fruits in three months from seed.

Judge Morrow, of U. S. Circuit Court, says the Wonderberry is simply delicious raw or cooked.

Mr. Childs exhibited one plant five months old bearing 10,375 berries which measured about eight quarts.

Mrs. Hattie Vincent, Hayden, New Mexico, says it stands long, hard droughts of that climate and fruits abundantly all summer.

It is certainly the most satisfactory garden fruit and the greatest Novelty ever introduced.

A Wabash Avenue Opinion.

"Speaking of good things, I'd like to show you something in the London Punch that—"

"You can't show me nothin'." Jack Johnson's got a punch that has all them furriers gaspin' fur breath!"—Chicago Tribune.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

E. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known E. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by his firm.

WALDRON, KINMAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c per bottle. Sold by all Druggists.

Take Hall's Family Pills for constipation.

Another Delusion Shattered.

The messenger boy was hurrying. "Here goes de champion prize fighter," he explained. "I want to get a good look at 'im."

FILES CURED IN 6 TO 14 DAYS.

FAZO OINTMENT is guaranteed to cure any case of Itching, Burning, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 5c.

Unaccounted Exposure.

"Chumley, how did you catch that beastly cold?"

"I came away from home this morning without me eye glasses."

EXPOSURE TO COLD

and visits the first step in Pneumonia. Take Perry Davis' Pain-Exposer and the danger is averted. Un-equalled for colds, sore throat, croup, etc. 50c and 1.00.

British Patents.

According to the report of the comptroller general of patents, patent applications in the United Kingdom of Great Britain and Ireland in 1908 numbered 28,598, a decrease of 420 from 1907; of the total, 572 were from women and 1,459 from abroad, the United States furnishing 572 of that total and Germany coming second with 515.

A Picture of Eternity.

The negro preacher is noted for his enthusiasm and his picturesque—almost poetic—way of expressing things. In "Life in Old Virginia," J. J. McDonald tells about a new colored minister who was conducting a revival without much success. At last, however, he awakened his congregation by asking:

"Does yo' know what eternity is? Well, I tell yo'."

"If one of dem lil sparrows what yo' see roun' yo' garden bushes was to dip his bill in de 'Lantic Ocean an' take one hop a day an' hop 'cross de country an' put dat drop of water into de 'Cific Ocean, an' den he hop back to de 'Lantic Ocean—jes' one hop a day—an' if he keep dat hoppin' up 'twell de 'Lantic Ocean wuz dry as a bone, it wouldn't be break o' day in eternity."

"Dar, now," said one of de brethren, "yo' see for yo'se'f how long eternity is."

Italy's Rest Days.

Under a law which went into effect Feb. 8, 1908, all industrial and commercial concerns throughout Italy must grant their employes a weekly rest of not less than twenty-four consecutive hours. It does not apply to public utilities, transportation lines or places of amusement. The general sense of the law is that Sunday shall be the rest day, but it is provided that freedom from work may be given on a day other than Sunday in the case of restaurants, photograph galleries, pharmacists, etc.

Woman's Power Over Man

Woman's most glorious endowment is the power to awaken and hold the pure and honest love of a worthy man. When she loses it and still loves on, no one in the wide world can know the heart agony she endures. The woman who suffers from weakness and derangement of her special womanly organization soon loses the power to sway the heart of a man. Her general health suffers and she loses her good looks, her attractiveness, her amiability and her power and prestige as a woman. Dr. R. V. Pierce, of Buffalo, N. Y., with the assistance of his staff of able physicians, has prescribed for and cured many thousands of women. He has devised a successful remedy for woman's ailments. It is known as Dr. Pierce's Favorite Prescription. It is a positive specific for the weaknesses and disorders peculiar to women. It purifies, regulates, strengthens and heals. Medicine dealers sell it. No honest dealer will advise you to accept a substitute in order to make a little larger profit.

IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.

Dr. Pierce's Pleasant Pellets regulate and strengthen Stomach, Liver and Bowels.

are responsible—they are daily give relief—they permanently cure Constipation.

Small Pills, Small Dose, Small Price.

Genuine—see our Signature.

WESTERN CANADA

What Prof. Shaw, the Well-Known Agriculturist, Says About It:

"I would sooner raise cattle in Western Canada than in the corn belt of the United States. Feed is cheaper and climate better for the purpose. Your market will improve faster than your farmers will produce the meat and grain. Wheat can be grown up to the 80th parallel and the International boundary. Your vacant land can be taken at a rate beyond present conception. Adaptable soil, beautiful climate, splendid schools and churches. Homes for those who want to take up this land." Nearly 70,000 Americans will enter and make their homes in Western Canada this year. 1000 produced another large crop of wheat, oats and barley, in addition to which the cattle exports was an immense item. Cattle raising, dairying, mixed farming and grain growing in the provinces of Manitoba, Saskatchewan and Alberta.

Free homestead and pre-emption areas, as well as lands held by railway and land companies, will provide homes for millions.

Adapted soil, beautiful climate, splendid schools and churches. Homes for those who want to take up this land."
