U. S. Experts Will Aid Work of Forest Products Laboratory at Madison, Wis.

READY FOR OPENING JUNE 4 State Pays for Construction and

Maintenance and Government Supplies the Equipment.

Completion of the forest products laboratory at Madison, Wis., which was established for the purpose of lessening, through experiments and demonstration, the waste in the manufacture and use of wood, is an event of importance to the wood-using industries and the engineers of the country. According to a Washington correspondent of

the Chicago News, the laboratory, a cooperative undertaking between the Uni-

versity of Wisconsin and the United States Department of Agriculture, has received the hearty approbation of the lumber-manufacturing and wood-using interests generally.

The new building at the university has been erected by the State, which also will furnish light, heat and power, while the United States Department of Agriculture will supply the equipment and apparatus and will maintain a force of thirty-five or forty experts taining common sense rules for health, to carry on the work. Well Meant, but Rude.

The wedding was over and the guest had departed, when a terrific din broke upon the stillness.

The tooting of fish horns, the beating of tin pans, and the ringing of cow bells could be distinguished clearly, while agonizing screeches from unidentified instruments and the diabolical noise produced by drawing a scantling across one edge of a dry goods box contributed their share to the volume of sound.

The bride, a young woman recen from Boston, turned pale.

Japanese Test of Madness. On Monday at the Tokio Appeal Court, before Judge Miyamoto, a farmer named Gisei Haseba, 26 years old, convicted of murdering his parents-inlaw and severely injuring his wife at, Osato-gori, Saitama prefecture, 1908, appealed from the judgment of the Urama local court, where he was sentenced to penal servitude for life.

Since April last year, during the public trial of the accused, he has not uttered a single word, the Japan Advocate says. This attitude led the judge and the public prosecutor to conclude that he feigned madness as a last resort, hoping to get released. He was medically examined by Dr. Kure and Dr. Miyake, and in this examination Dr. Miyake adopted a singular method.

There is a belief that the blood of a venomous snake is soluble with that of an ordinary man, but not with that of a madman. The doctor appied this principle to the examination of the suspected lunatic, and sure enough the blood of a venomous snake did not dissolve in the blood of the accused. Thus the doctor concluded that he was really mad.

The other doctor also gave evidence about the lunacy of the defendant. The judge ordered that the trial should be postponed until the accused was recovagainst each other and his eyes star- ered from his abnormal condition.
