OVER

CORN PLANTING IS

THAT CANADIAN TRIP SHOULD NOW BE TAKEN.

If you had intended going to Can-

ada for the purpose of purchasing land on which to establish a home and accompanying some land company, whose holdings you proposed to look over or to go up on your own account to select one hundred and sixty acres of land free, you should delay no longer. Corn-planting is over, your wheat crop is well ahead, and you have a few weeks' time before you are required in the fields again. Now make your intended trip. Reports at hand show that the crop prospects in Canada were never better than they are today. The cool weather has not affected the crop, but if anything, it has been a benefit. There has been plenty of noisture and those who have had their land properly prepared look upon this year as likely to be one of the best they have had. A great many are going up this season who expect to pay two or three dollars an acre more than they were asked to pay last year. Others who wish*to homestead are prepared to go farther from the line of railway than would have been necessary last year. Still it is worth it. So it will be with you. Next year lands will be higher-priced and homesteads less accessible. There is a wonderful tide of immigration to Central Canada now. It is expected that one hundred and fifty thousand new settlers from the United States will be numbered by the end of the present year, an increase of fifty per. cent over last year. In addition to this there will be upwards of one hundred thousand from the old country, which does not include those who may come from the northern countries of the Continent. These all intend to settle upon the land. The reader does not require an answer to the questions, "Why do they do it?" "Why are they going there in such been popular with town and gown; and messages-in other words. I'm on a large numbers?" Western Canada is no longer an experiment. The fact that one hundred and fifty million bushels of wheat were raised there last year as against ninety-five millions the year previous, shows that the tiller of the soil in Central Canada is making money and it is safe to say that he is making more money than can be made anywhere else on the Continent in the growing of grains. He gets good prices, he has a sure and a heavy crop, he enjoys splendid railway privileges, and he has also the advantages of schools and churches and such other social life as may be found anywhere. It is difficult to say what district is the best. Some are preferred to others because there are friends already established. The Grand Trunk Pacific, on its way across the Continent, is opening up a splendid tract of land, which is being taken up rapidly. The other railways -the Canadian Pacific and Canadian Northern are extending branch lines into parts inaccessible a couple of years ago. With a perfect network of railways covering a large area of the agricultural lands it is not difficult to secure a location. Any agent of the Canadian Government will be pleased to render you assistance by advice and suggestion, and a good plan is to write or call upon him. The Government has located these agents at convenient points throughout the States, and their offices are well equipped with a full supply of maps and literature.

Carr had discovered her tenor without his help. He and Balcomb were standing in the Carr library, where the last undress rehearsal of "Deceivers Ever" was about to begin. Leighton, who was stage manager, also sang in the chorus, which appeared in one act as foresters and in the other as soldiers. Mrs. Carr always had a reason for everything she did. Her reason for insisting that the Dramatic Club, of which she was president, should give a comic opera was thoroughly adequate, for at this time she was exploiting a young musician who had lately appeared in Mariona, and who was not, let it be remembered, a mere instructor in vocal music, but a composer as well. He was a very agreeable young man, who wished to build up a permanent orchestra in Mariona, and Mrs. Carr was backing this project with her accustomed enthusiasm. Nothing could help matters forward so well as a social success for Max Schmidt. He had written an opera, which many mana, gers had declined for the reason that the music was too good and the book

too bad. "Deceivers Ever" was the name of the work, and Mrs. Carr was preparing to produce an abridged version of it on the night before Thanksgiving. The scene was set in Germany, and there were six men-the gay deceivers-all of them officers in the army. The chief girl character was the daughter of a new commandant of a post, but at a ball given in his honor she changed places with her maid, and no end of confusion resulted. Mrs. Carr had urged Zelda to take the principal role, and Zelda had consented, with the understanding that Olive Merriam was to be elected a member of the club and

given a part in the opera. While Leighton and Balcomb stood talking in the library, Herr Schmidt, in the drawing-room, lectured the rest of the company in his difficult English. He now fell upon the piano with a crash and nodded to Zelda, who began one of her solos. When titis had been sung to his satisfaction, the director called for Olive and Captain Pollock. Pollock was greatly liked by the people he had begun to know in Mariona. The men about the Tippecanoe Club had the reputation of scrutinizing newcomers a little superciliously, in the way of old members of a small club, who resent the appearance of strangers at the lounging-room fireside. But Pollock fitted into places as though he had always been used to them. He told a good story or he sang a song well, when called on to do something at the grill-room Saturday nights. Mrs. Carr had given him one of the best parts in the opera. The young officer and Olive carried off with great animation a dialogue in song into which Herr Schmidt had been able to get some real humor. "You haven't told me how much you

Jellied Chicken an Ideal Dish Either for Luncheon or Dinner-How to Prepare It.

After dressing a young roasting chicken, cut it in joints as for fricasseeing, put it in a deep saucepan over the fire and nearly cover the chicken with cold water; add a level teaspoonful of salt, a half dozen pepper corns, a blade of mace, two sprigs of parsley, two stalks of celery, a half of a lemon, a large white onion cut in slices; cover the sauce pan closely and as soon as the scum rises to the surface remove it with a skimmer; then let the chicken cook gently till the bones may be easily removed. A quart of broth should be left when the chicken is done. With a skimmer remove the chicken from the saucepan, then strain the broth and return it to the saucepan, adding two tablespoonfuls of gelatin dissolved in half a pint of water, and let it simmer for about ten minutes. In the meantime remove the bones from the chicken, and cut it in small slices. Line a bowl or oval earthen dish with alternate slices of hard-boiled eggs and slices of lemon; stir the pieces of chicken through the broth, stand the saucepan in a cool place, and when the mixture begins to stiffen pour carefully into the moid, distributing the bits of chicken evenly through the broth. Let the mold stand in a cool place for a day, when the whole will be well jellied; then turn it out on a platter and ornament it with sprigs of parsley. When already for use cut the jellied chicken in thin slices and serve on a plate with celery mayonnaise.

BATHING TROUBLES IN JAPAN.

Unconventional Bathroom Arrangements in Country Towns.

The bath in Japanese inns was often something of a difficulty, says a writer in the Worldwide. Once we were invited to bathe in the kitchen, where

the steaming bathtub stood amidst a little group of men, who had gathered in the room in the evening to gossip and smoke. Often the bathshed had no door, and when it had it was not infrequently a glass one. Much as the country folk of Japan stare at foreigners, they do not, however, take advantage of these defenseless bathrooms, so that the anticipation was always worse than the event.

Often at the busier inns, two people if it isn't impertinent? It's hard to it'll be easy to sell Uncle Sam's Treasgish liver. They conis added to it. Set right on the ice have to bathe together. Place the fruit in the preserving kettle with just enough water to create steam, and arrange the parings over the top. Cover the kettle, let heat slowly and stew very gently until tender. Carefully remove all the parings from the surface, then take the fruit out with a skimmer, draining as thoroughly as possible. and spread out on large dishes. Strain the liquor through a cheese cloth bag, then return to the kettle, adding granulated sugar, measure for measure. Stir until the sugar is dissolved only, and let the syrup boil for ten minutes, skimming repeatedly. Place the quinces in the boiling syrup and simmer gently until they become clear and take a rich color-probably 20 minutes. Lift the fruit out with a perforated spoon and pack in jars. When the syrup is partially cool fill to the brim and seal air tight.

Lost Bill Under a Plaster. The mystery of the disappearance of \$50 bill, which has disturbed a Middletown business man and his family for a week, and which caused considerable unpleasantness, has been solved. Suspicion attached to at least two members of the man's household. A week ago he planned a business trip to New York. That evening he laid numerous bank notes on the dresser of his bedroom. A \$50 bill was on top. Next morning he missed it. That night his wife put a porous plaster on his back. This morning he wanted to get it off and called his wife to assist. When she got the plaster off the missing bill was found fast on the inside of the plaster.-Exchange.
