

# WORTH MOUNTAINS OF GOLD

**During Change of Life, says Mrs. Chas. Barclay**

Graniteville, Vt.—"I was passing through the Change of Life and suffered

from nervousness and other annoying symptoms, and can truly say that Lydia E. Pinkham's Vegetable Compound has proved worth mountains of gold to me, as it restored my health and strength. I never forget to tell my friends what Lydia E. Pinkham's Vegetable Compound has done for me during this trying period. Complete restoration to health means so much to me that for the sake of other suffering women I am willing to make my trouble public so you may publish this letter."—Mrs. CHAS. BARCLAY, R.F.D., Graniteville, Vt.

No other medicine for woman's ills has received such wide-spread and unqualified endorsement. No other medicine we know of has such a record of cures of female ills as has Lydia E. Pinkham's Vegetable Compound.

For more than 30 years it has been curing female complaints such as inflammation, ulceration, local weaknesses, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration, and it is unequalled for carrying women safely through the period of change of life.

It costs but little to try Lydia E. Pinkham's Vegetable Compound, and, as Mrs. Barclay says, it is "worth mountains of gold" to suffering women.

ALMOST WORN OUT.

Ella Fontine—Is your knee tired, dear?

Slenderly—It must be, pet; it's gone to sleep.

**Detected.**

It was at a Fourth of July meeting in the little city. The mayor, William Smith, rose, and at dignified length read the Declaration of Independence. There was a pause; then from one of the mayor's old schoolmates came the loud whisper: "Bill never writ that. He ain't smart enough."

It takes a strong-minded spinster to believe that the reason men don't propose to her is that she never gives them a chance.

**LACK OF MONEY**  
Was a Godsend in This Case.

It is not always that a lack of money is a benefit.

A lady of Green Forest, Ark., owes her health to the fact that she could not pay in advance the fee demanded by a specialist to treat her for stomach trouble. In telling of her case she says:

"I had been treated by four different physicians during 10 years of stomach trouble. Lately I called on another who told me he could not cure me; that I had neuralgia of the stomach. Then I went to a specialist who told me I had catarrh of the stomach and said he could cure me in four months but would have to have his money down. I could not raise the necessary sum and in my extremity I was led to quit coffee and try Postum.

"So I stopped coffee and gave Postum a thorough trial and the results have been magical. I now sleep well at night, something I had not done for a long time; the pain in my stomach is gone and I am a different woman.

"I dreaded to quit coffee, because every time I had tried to stop it I suffered from severe headaches, so I continued to drink it although I had reason to believe it was injurious to me, and was the cause of my stomach trouble and extreme nervousness. But when I had Postum to shift to it was different.

"To my surprise I did not miss coffee when I began to drink Postum.

"Coffee had been steadily and surely killing me and I didn't fully realize what was doing it until I quit and changed to Postum."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

# NOTES FROM MEADOWBROOK FARM

By William Pitt

Care for the brood sow.

Hay is scarce this year.

In a fairly cool spot sow some peas for September use.

The only way to be sure of good dairy stock is to raise it.

The food of the duck is both vegetable and animal in nature.

A thrifty growth of the plants now means better fruit next year.

Gilt-edged butter will line your pocketbook with gilt-edged coins.

Muttons sheep give the best returns when fed for that purpose when young.

Extra feed increases growth, if of a suitable kind, and makes larger animals at maturity.

A hard collar is not as hard upon the shoulders of a horse as one that is unevenly padded.

Never offer a pound of poor butter for sale. Better take it right out and bury it in the back lot.

If your sheep get scab, better clean them all out and begin over. It is the best way to cure that disease.

Money makes the mare go, but you have got to hustle around and get the money, or the mare will stand still.

Clover bloat can usually be prevented by keeping the cattle off the clover when it is wet from dew or rain.

In pruning do not forget that summer pruning induces fruit bearing, and wood growth is promoted by winter pruning.

Too much onions, fish scrap and stale meat often cause eggs to have bad odor. It is unsafe to feed stale food to hens.

Half bushel picking baskets, each provided with a light iron hook, will bruise the apples much less than when picked into a bag.

When a cow once falls off in milk production it is more difficult to bring her back to her full flow than to so feed her as to keep her as near her capacity as possible.

The man who thinks it a woman's work to keep a garden going was not built on the right lines. The garden should be considered as important as any other part of the farm and treated accordingly.

The condition of the ewes at breeding time has a marked influence upon the succeeding crop of lambs. If the ewes are improving in flesh and in a vigorous condition, the chances are bright for a choice lot of strong lambs.

The farmer or fruit grower cannot possibly reach the highest success in his business without the aid of the birds (except, perhaps, the English sparrow) and yet they are often very annoying during the ripening season of the early fruits.

There appears to be some complaint about getting the ewes with lamb when they are allowed the run of a clover pasture, and therefore many think it best to cut and cure the clover for the lambs and provide other pasturage or soiling crops for the breeding ewes.

Winter radish seed are mixed with the turnip at the time of sowing the latter in the fall. The radishes will grow with the same treatment that is given the turnips. They are harvested and stored together for winter use. The radishes keep well and are excellent for use in winter.

For the first weeks of a pig's life the mother's milk is its drink as well as food, and therefore in caring for suckling sows it should be the aim to so feed them that milk of only medium richness will be furnished instead of a limited supply of that which is extremely rich, the latter being less healthful and more liable to cause thumps, scours and unsatisfactory growth.

Sanitary care of the feeding boxes for the show animals should be carefully studied, for the neglect will often cause a fastidious appetite instead of a healthy robust one, and many a time an animal is blamed for being a delicate feeder, and often ailing, when in reality the fault is with the management in not having attended to these two things.

**Study sanitary care of feed boxes.**

Grade your honey systematically.

A nervous cow is preferable to a stolid one.

Keep the spray pump going in the potato patch.

Hard coal ashes make a nice cool mulch for currant bushes.

Too many farmers sacrifice quality for mere size in the selection of a ram.

In order to realize the most for wool, there must be a uniformity of condition.

An animal that is only fed enough to be kept alive is of no practical value to the owner.

When the lambs have just been weaned they require the best possible care and need good pasture.

Phosphoric acid tends to increase fruitfulness, but a liberal supply of potash is of almost equal importance.

The grain for calves should be fed first while the calf is quite small with a little bran to aid in learning to eat.

A few hens carefully watched and liberally fed are more profitable than a large number forced to forage for their living.

When you see many bees hunting around nooks and corners, you may be sure there is robbing going on somewhere.

A good horse used in a common sense manner should live to an old age and be in condition to perform good work at all times.

During the hot weather the garden should receive very frequent cultivation to keep down the weeds and conserve the moisture.

There is no reason why a man with an acre patch of potatoes should not spray for blight, the same as a man who has ten acres or more.

Cultivation should not be continued too late in the season, or the wood will not harden by the time winter sets in, and the trees will be injured.

As a rule, no cultivating should be done in the orchard during the next two months. If the soil is in good tilth and clean of weeds it is best not to disturb in hot dry weather.

The cowpea will thrive under unfavorable conditions of soil preparation. It is, however, a plant that responds most readily and profitably to thoroughly deep breaking and pulverization of the land.

Asters suffer from root lice, which invariably kill them in a short time, if undisturbed. These lice also attack chrysanthemums, clematis, and like plants. Where these pests are at work, there will be ants also.

All wounds on trees are the better for being painted, tarred or covered with some substance to keep out the water. Then the bark covers over the wound little by little, and no rotting of the inner wood takes place.

Young animals make a much more rapid growth in proportion to size than older ones, and the ratio is decreased as they approach maturity; but they eat much more in proportion to live weight and the flesh contains much more water.

A good many farmers who have cows are now aware of what a splendid investment of time and money it would have been had they sown a plot of ground to peas and oats last spring to supplement the pasture that is now getting parched by the extended drought.

A few one-year-old hens and a flock of young early hatched pullets well cared for and carefully culled will yield more winter eggs than a flock twice the size consisting of a mixture of old and young hens, late and early hatched pullets, some half moulted, etc.

As the sire is half the flock in the sense of his influence upon the lam crop the few extra dollars required to purchase a pure-bred animal of the breed which may be favored by any sheep owner is a small consideration as compared to even a slight improvement in the lamb crop.

Some one has said that the measure of the corn crop depends not so much on the fertility of the land as on the available amount of moisture during the growing season. This is a truth which many of us fail to realize, and we are oftentimes found blaming the poorness of our corn land when we ought to be blaming out own lack of industry with the cultivator.

The importance of plenty of shade cannot be overestimated. Stock may be housed during the day, if necessary, in darkened stables through which air may pass, where the animals will be less annoyed by flies. An ample supply of water is also an essential, and the water supply should be well protected even though it costs considerable labor to haul water from a distance. Good food is also essential at this time. Green feed is preferable, although dry hay may be used without serious result.

# GOOD WORK IS PROGRESSING

**Women in Every State Join Earnestly in Campaign Against Tuberculosis.**

Four years ago the only active women workers in the anti-tuberculosis movement were a little group of about 30 women's clubs. Today 800,000 women, under the United States, are banded together against this disease, and more than 2,000 clubs are taking a special interest in the crusade. Not less than \$500,000 is raised annually by them for tuberculosis work, besides millions that are secured through their efforts in state and municipal appropriations. Mrs. Rufus P. Williams is the chairman of the department that directs this work.

In addition to the work of the General Federation of Women's Clubs, the Public Health Education committee of the American Medical association, composed largely of women physicians, has carried on an educational campaign of lectures during the past year in which thousands have been reached. The Mothers' congress, the Young Women's Christian association, and many unattached clubs bring the number of women united in the tuberculosis war to well over a million. There is not a state in the union where some work has not been done.

# IN AGONY WITH ECZEMA

"No tongue can tell how I suffered for five years with itching and bleeding eczema, until I was cured by the Cuticura Remedies, and I am so grateful I want the world to know, for what helped me will help others. My body and face were covered with sores. One day it would seem to be better, and then break out again with the most terrible pain and itching. I have been sick several times, but never in my life did I experience such awful suffering as with this eczema. I had made up my mind that death was near at hand, and I longed for that time when I would be at rest. I had tried many different doctors and medicines without success, and my mother brought me the Cuticura Remedies, insisting that I try them. I began to feel better after the first bath with Cuticura Soap, and one application of Cuticura Ointment.

"I continued with the Cuticura Soap and Cuticura Ointment, and have taken four bottles of Cuticura Resolvent, and consider myself well. This was nine years ago and I have had no return of the trouble since. Any person having any doubt about this wonderful cure by the Cuticura Remedies can write to my address. Mrs. Altie Etson, 93 Inn Road, Battle Creek, Mich., Oct. 16, 1909."

# Lemons Cure Malaria.

Lemons are said to be an infallible cure for malaria. This is the method of preparation: Take one lemon, wash thoroughly with a brush and hot water till all germs are gone, cut in very small pieces, using skin, seeds and all; cook in three glasses of water till reduced to one, and take this while fasting. A cure is generally effected within a week.

# A CASE OF GRAVEL.

Tulare, Cal., Man Cured by Doan's Kidney Pills.

Harrison A. Sturtevant, G and Maple Sts., Tulare, Cal., says: "I was in bad shape with kidney trouble. Too frequent passage of the urine compelled me to arise at night, my bladder became inflamed and I had excruciating pains in my abdomen. Soon after I began using Doan's Kidney Pills, I passed a gravel stone three-quarters of an inch in length and variegated in color. After this my trouble disappeared."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

# Not to Overdo It.

Lily—I've given to a s'prise party tonight, Miss Sally.

Miss Sally—What will you take for a present?

Lily—Well, we didn't call 'em on takin' no present. Yo' see, we don't want to s'prise 'em too much.

# DR. MARTEL'S FEMALE PILLS.

Seventeen Years the Standard.

Prescribed and recommended for Women's Ailments. A scientifically prepared remedy of proven worth. The result from their use is quick and permanent. For sale at all Drug Stores.

A man knows but little if he tells you tell me if my wife is here?

# The difference remember this—

it may save your life. Cathartics, bird shot and cannon ball pills—tea spoon doses of cathartic medicines all depend on irritation of the bowels until they sweat enough to move. **Cascarets** strengthen the bowel muscles so they creep and crawl naturally. This means a cure and only through **Cascarets** can you get it quickly and naturally.

Cascarets—10c box—week's treatment. All druggists. Biggest seller in the world—million boxes a month.

Wason E. Coleman, Wash. D.C. Books free. High of references. Best results.

# PATENTS

Color more goods brighter and faster colors than any other dye. One 10c package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. **MORROE DRUG CO., Quincy, Illinois.**
