The one year old daughter of Sam Grooms and wife, who recently moved into the Maxwell property, died of pneumonia Wednesday evening of last week.

The dance last Saturday night in Quigley's hall was not very well attended owing to the severe weather, though those who attended watched the new year in, and now just see what a time we've had.

John Mead, a real estate and insurance agent of Chadron, shot himself in the mouth and was found dead in his office last Friday morning by his eight year old son. Suicide because of family troubles is believed to be the cause.

Mrs. J. M. Ralya brought her son and daughter to town Tuesday to start them back to college. She informs us that they will have another of their popular dances Friday night, the 13th. What a famous day! But we guess they'll have a good time just the same.

Edward A. Searby of Crookston was in town last Saturday. He owns five quarter sections of good land north of Crookston that ten years ago was thought to be worth very little by some financiers who had been successful but time has proved that values of land were underestimated. Farms that sold ten years ago by the quarter at \$300 to \$500 are now priced by the acre at \$20 to \$40 in this locality.

Fred Buechle, wife and children and his brother, Elward, went down to Seward day before Xmas and visited Fred's father, who has three lots between two railroads and has a four-room house in Seward where he and his wife live comfortably from their garden. On Monday after Christmas Fred says they went down to Lincoln and spent two days looking at the sights, visited the penitentiary, and, upon returning to Seward, went to Milford and visited the Soldiers' Home. They returned home Sunday morning in the snow storm and stayed in town Sunday and Monday. The family enjoyed a splendid visit and saw many things and places of interest.

The thermometer went down to 20½ below zero Sunday night and 23½ below Monday night. Tuesday the weather warmed up over 55 degrees, though the weather bureau didn't appear to know anything about it until their records showed it had happened, and had no report out predicting a change until the change was on record. We like to praise everybody but it also seems to be somebody's duty to call attention to these blunders or they'll come to believe that we don't expect anything of them. A little investigation back east in Willis L. Moore's office might disclose the fact that somebody is drawing big pay for mighty poor weather deductions or else we need more weather stations for their assistance. What the country needs is better service. If they can't do better than some of the past six months' predictions we'd as soon or rather trust to Charley Tackett.
