No Question Settled Until the "Court of Last Resort" Has Passed Upon It.

It is reasonably safe to say that nc legislative body would pass a Payne-Aldrich tariff bill had the people the power to veto it. On the contrary, congress would revise the tariff in accordance with national rather than special interests.

Moreover, that would be the best thing in the long run for the special interests themselves. Once the people accepted a tariff law, we should hear no more of that troublesome question for a generation, and surely the manufacturers stand in need of protection from agitation and instability quite as much as from foreign competition. So it ought to work out in all things.

Representatives at best can only guess at public opinion ,and often they mistake a loud noise for the voice of the people, forgetting that "the shallows murmur, but the deeps are dumb." Throughout a generation congress was guessing on the question of a money standard, whether it should be paper, silver or gold, and there was no rest or security. At last, in 1896, the problem had to go squarely to the people, as every problem finally must, and the people promptly gave a decision far more conservative than a timid congress ever had dared to give and at once put an end to all doubt and debate. All matters of importance soon or late must be submitted to them for final determination. Delay only prolongs the uncertainty. Under the initiative and referendum every law has the direct or tacit indorsement of the public, and thereby gains a stability and force that can be derived from no other source.

No question is settled until the people have settled it.

The New Reciprocity Treaty. For the first time in more than fifty years the governments of the United States and Canada have been able to prepare a trade agreement that both parties to the negotiation believe will prove acceptable to the people and increase the already great business passing over the border. The attempt to drive the Dominion into the Union has been definitely abandoned. The abrogation of the reciprocity treaty in 1866, the long period of notoriously hostile tariff legislation culminating in the McKinley and Dingley tariff acts, the constant friction over fisheries and boundaries and bonding privileges and alien labor laws-all these have ended in acknowledged defeat. Canada has grown and prospered in spite of them, and Washington has at last had the grace to acknowledge that the Dominion must hereafter be treated as the nearest neighbor and one of the best customers of the republic should have been treated long ago. It is asserted in some quarters on this side of the boundary that there is an ulterior motive behind the change of attitude of the United States, and that, having discovered that Canada could not be coerced, the political strategists south of the line are now seeking to cajole and bribe her into the Union. That may be the motive, although there is no evidence of it, but anyone who believes that Canada's future depends on tariffs or trade agreements knows nothing of the intense love of country that is developing among the rising generation, the patriotic spirit nothing material can destroy or even shake .-- Toronto

An unusual incident marked a recent fire in New York. The fire started in the cellar of a five-story tenement and before it was extinguished the firemen were weeping copiously from inflamed eyes. In the cellar many bags of onions had been stored. The chief fireman allowed the tenants to remain in the building, assuring them that the fire was confined to the cellar. They did not stay, however, when the onions had got well afire.

for the disfranchised colored voter was not manifested until it seemed wise to affect sympathy for him in order to frighten the white south with the bogey of a federal force bill as a means of defeating the popular demand for the Borah amendment.

When the people shall have won their irresistible fight for the direct election of senators the Roots will forget all about the disfranchised negro. If occasion should demand it. and it would serve the cause of special privileges so to do, the present champions of the trampled colored voter would no doubt some day strike hands with southern senators to keep him ground to the dust, and would defend, in impassioned pleas for white sovereignty at the south, the electoral injustice they now sanctimoniously condemn.

#### **Reciprocity and Revision.**

Those Democratic leaders who are to prepare the bill revising the Payne law should rejoice in the appearance of the tariff pact with Canada at this time. Had it been sent to congress as a surprise next winter it might have upset their calculations-might have obliged them to go over a portion at least of their work. As they Globe. are just beginning the shaping of their plans, they can take the pact into account now, even should it fail of indorsement by the Republicans at this session.

There has been an idea, particularly since the Baltimore jubilee, that the tariff next year would be a simple proposition. Might it not take the form of a revision of the wool schedule of the Payne law as a starter? The Republicans are not united in support of that schedule. The president did not like it at the time he signed the new measure, and the the 18 families in the building and all Democrats to a man were opposed to it. Why should not Mr. Clark and his friends content themselves with overhauling a schedule not acceptable even to many of the Republican leaders, and then ask for an indorsement at the polls upon a promise to go on with the work, piece by piece, until the whole Payne law should be revised out of existence?

The president's message next win ter in its tariff feature should be a particularly interesting document. The chances of his renomination are tion .- New York Times.

today nine in ten, and that the tariff will be the paramount issue seems certain. How, then, will he put the matter up to congress, and what response in the way of a bill will the house make? Both sides will have the presidency in mind and both will find it advisable to walk warily.

-Washington Star.

For a Tariff Commission.

The titular leader of the Democratic party in the house is Mr. Clark. The Democrats of the house have organized a central committee-the majority of the ways and means committee for the next congress-to which has been committed the administration of party affairs through the selection of the committees of the house, and who will necessarily have charge of the chief matter of legislation, the tariff. The chairman of this committee is Judge Underwood of Alabama, a man of large experience, sound judgment and high character. Mr. Clark and Judge Underwood after careful consideration have reached the conclusion that a tariff commission, on the lines followed by the pending bill, is a wise, fair, practical measure. In this conclusion they will certainly be sustained by the great body of the Democrats of the country. In acting on it, we believe

that they will serve the country, their party and especially their own sec-

MILD, GENTLE LAXATIVE

### Restored to Health by Lydia E. Pinkham's Vegetable Compound

A woman who is sick and suffering, and won't at least try a medicine which has the record of Lydia E. Pinkham's Vegetable Compound, is, it would almost seem, to blame for her own wretchedness. Read what this woman says:

Richmond, Mo. - "When my second daughter was eighteen months old I was pronounced a hopeless invalid by specialists. I had a consultation of doctors and they said I had a severe case of ulceration. I was in bed for ten weeks, had sinking spells, and was pronounced to be in a dangerous condition. My father insisted that we try Lydia E. Pinkham's Vegetable Compound, and brought me six bottles. I soon began to improve, and be-fore it had all been taken I was as well and strong as ever, -my friends hardly recognized me so great was the change." - Mrs. Woodson Branstetter, Richmond, Mo.

There are literally hundreds of thousands of women in the United States who have been benefited by this famous old remedy, which was produced from roots and herbs over thirty years ago by a woman to relieve woman's suffering.

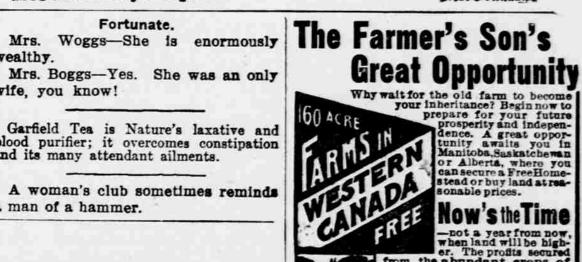

Read what another woman says:-

Jonesboro, Texas. - "I have used Lydia E. Pinkham's Vegetable Compound for myself and daughter, and consider it unequalled for all female diseases. I would not be without it for anything. I wish every mother in America could be persuaded to use it as there would be less suffering among our sex then. I am always glad to speak a word of praise for Lydia E. Pinkham's Vegetable Compound, and you are at liberty to use this testimonial."-Mrs. James T. Lawrence, Jonesboro, Texas.

Since we guarantee that all testimonials which we publish are genuine, is it not fair to suppose that if Lydia E. Pinkham's Vegetable Compound had the virtue to help these women it will help any other woman who is suffering from the same trouble?

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

If the slightest trouble appears which you do not understand, write to Mrs. Pinkham at Lynn, Mass., for her advice-it is free and always helpful.
