Splendid Crops in Saskatchewan (Western Canada)
800 Bushels from 20 acres of wheat was the thrasher's return from a Lloyd-minister farm in the season of 1910. Many fields in that as well as other districts yielded from 25 to 35 bushels of wheat to the acre. Other grains in proportion.
LARGE PROFITS are thus derived from the FREE HOMESTEAD LANDS of Western Canada.
This excellent showing causes prices to advance. Land values should double in two years' time. Grain growing, mixed farming, cattle raising and dairying are all profitable. Free Homesteads of 160 acres are to be had in the very best districts; 160 acres pre-emption at \$3.00 per acre with certain areas, schools and churches in every settled, climate, excellent soil, the richest; wood, water and building material.

PATRIOT WITH HUMOR
IS CHAMPION OF AMERICAN PROTECTIVE TARIFF LEAGUE.

Appeal of Inspired Prophet Reveals Straits to Which Friends of Monopoly Have Been Reduced—President Called "Traitor."

Wilbur E. Wakeman of the American Protective Tariff League, thrills, beguiles and delights us. To be sure, we have never heard of Wilbur before this, but we are hearing a great deal now. Wilbur is doing big things, realizes that himself and tells Mr. Hearst's New York American all about it. Wilbur declares that he is deluging nineteen congressmen with telegrams urging them to vote against reciprocity. To be sure, the names signed to some of the telegrams belong to prominent citizens who weren't consulted by Wilbur when he sent the telegrams, but Wilbur is too busy a patriot just now to bother with details.

Feeling that by any other name he were as persuasive and seductive, Wilbur is beseeching these nineteen congressmen, for the love of heaven and the American Protective Tariff League, to defeat the reciprocity agreement. In this Wilbur is certainly spreading out the undeserving American Protective Tariff League to the vulgar, censorious, even hostile gaze. And he is full of stirring—though trite—patriotic rhetoric, too. For example: "We who realize how this country has been built up under this wise economic policy will not stand idly by and see the country plunged into industrial and economic confusion."

We hope that some of that splendid sentiment found its way into Wilbur's telegrams. Wilbur has also decided that President Taft is a "traitor" to the American Protective Tariff League and cannot be again nominated for president. Then listen to this glowing, intoxicating, inspired prophecy: "Vice-President Sherman, in my opinion, will lead the Republican hosts of protection to victory in 1912. 'Sunny Jim,' prince of good fellows and protectionists, will be our candidate."

It is nice to see how unconsciously, perhaps sub-consciously, Wilbur refers to "good fellows" and protectionists as synonymous. Next, perhaps, to Patriot J. Pierpont Morgan himself, "Sunny Jim" Sherman would inspire more enthusiasm in the breasts of the Republicans—yes, Democrats too—than almost any man we can think of. We should like very much indeed to know something more about Wilbur. It is too bad to lose sight of a patriot so redolent with unconscious humor and hilarious entertainment. If the enemies of the American Protective Tariff League had picked out a man to do the league as much damage as possible, in the most insidious and effective way, they could have done nothing so good as Wilbur. He is more than a calamity. He is a "scream."—Detroit Journal.

Though twenty-one republics have bestowed a medal on Andrew Carnegie as a "benefactor of humanity," it will be recalled that he has been a good deal more successful as a maker of armor plate than as a maker of peace.

Hypocrisy, Not Statesmanship.
The senate will remain the judge of the elections, returns and qualifications of its members if they are elected by direct vote of the people under the proposed amendment. The Fourteenth amendment will remain unchanged by the new amendment. It was not until 1866 that congress ever undertook to regulate the election of senators, and this was a reconstruction measure that would never have been passed but for the Civil War. In the light of these facts the claim that congress would be surrendering a great and necessary power if the direct election amendment should be adopted as drafted by the house seems to be grounded more deeply, in hypocrisy than in statesmanship.

The real object of this outcry is not to protect the present power of congress—which has acquiesced for a generation in the nullification of the Fourteenth amendment—but to incite southern opposition to the direct election of senators.

Should Join Democrats.
Insurgent senators are reported from Washington to have demanded and been refused the status of a separate party in the composition of committees. In this refusal the Republican committee of committees is reported to reflect the wishes of the president. The president is unwise. The insurgents are more nearly in line with him than the regulars are. But we do not particularly blame the representatives of the regulars for their action. They cannot expect to enjoy the privileges of membership in the dominant party and also share as a separate organization in the distribution of good things. On the whole we believe they would consult their own interests and the interests of their constituents if they would join the Democrats and make that the majority party in the senate.

It served one good purpose, at any rate. It made President Taft confess what a mess his party got this country into when it went back on the Declaration of Independence and embarked on a career of conquest—Jacksonville Times-Union.

SOMETHING TO THINK OVER
Official Figures Concerning Wool Industry Give Little Weight to Claims of Protectionists.

The preliminary census statement in regard to the wool industry shows a great growth in almost every department of the business. There has, however, been a decrease in the number of establishments, due to the tendency toward concentration in practically all forms of industry. As a result the increase in the number of employees since 1899 has been comparatively slight, it being only 29 per cent. During the same period there has been an increase of 62 per cent. in capital and of 76 per cent. in product. This, of course, proves a much higher per capita production than that of 1899.

So there has been an increase of wages. Just what this amounts to it is impossible to say, since in the report wages and salaries are lumped. Taking the total sum paid for wages and salaries, and distributing it among the wage earners, we find that in 1904 there were 142,000 wage earners, drawing a total (including salaries) of \$61,000,000, as against 163,000 wage earners in 1909, drawing \$79,000,000. The per capita wages have increased from \$429 to \$484. The amount paid in wages would be somewhat smaller if that paid in salaries was omitted.

Remembering that the main object of a protective tariff is to maintain the American standard of wages, it is a little disconcerting to know that in this highly protected industry the average wages are only \$484 per capita. Such wages can hardly be called high. Many men in unprotected industries do much better. If we take the other view, which is also taken by some of the defenders of high tariff taxes, that protection is needed, not so much to make high wages as to enable employers to pay wages that are already high, it is still to be said that no great amount of protection should be needed to meet this wage bill. Something seems to be wrong with the application of the principle of protection in this case, for the blessings supposed to flow from it have not, apparently, reached the workman—who, as we all know, is the individual for whose benefit the scheme was devised. Has there been a fair division of the taxes which the people have so generously voted to this great and thriving industry?

MERELY BUSINESS MATTER
Judge Gary's Explanation of Shut down Will Be Understood by the Initiated.

The definite denial by Judge Gary that the closing of work on the new wire mill of the steel trust at Birmingham was not an attempt to influence the tariff discussion in congress, may be taken as evidence of how sensitive even large corporations are these days to public opinion. It did not use to be so. If a corporation thought it could gain a point by flouting the public in any way or by scaring it, it went right ahead and did it. There was no care for what the public might say. It might howl all it pleased, but the corporation merely laughed. It never had to pay any attention to the public, which really existed to be milked. But there is a difference now. The public has learned that it can make it very uncomfortable for the person who is doing the milking and that it is possible even to kick over the milk pail. That is why corporations are more inclined to treat the public with a certain amount of consideration.

Judge Gary does not disguise the fact that the United States Steel corporation feels that if certain proposed tariff legislation relating to steel duties were enacted it might affect disadvantageously the manufacture of certain wire products. Therefore, the local Birmingham officials were advised to shut down on a part of the work then underway. These orders being misunderstood, all work was closed down, but has now been resumed with the exception of the erection of houses for workmen and the equipment of the mills. But the judge would have it understood that this curtailment is not intended in any way to influence congress. Certainly not.

Get in Motion!
Once the Democrats governed the country for 40 years without interruption by what the Philadelphia Record calls not new nationalism, nor old federalism, nor socialism, nor paternalism, but by the Jeffersonian doctrine that seeks the greatest good that legislation and government can do for the greatest number. Now, after sixteen years' exclusion the party comes back fresh from the people. It gives indication, as we have endeavored to reflect, of having the correct ideas as to the needs of the time, and the intention of fulfilling them. The question still remains to be tested whether it can translate intention into action—and that is always a great question—it seems that the safest way to it is to get in motion. The program has been well mapped out. The size of the popular approval may be measured by the fact that a Republican house has been made Democratic by a majority of 63, while in the senate the nominal Republican majority has been reduced to nine, and it remains to be seen how solid this will be. But the test of everything is getting it done. So action should be the watchword. Many a strong front has been weakened and broken by delay.—Indianapolis News.

CURED ITCHING AND BURNING

"I was taken with the itch in April, 1904, and used most everything. I had a friend pay me a visit from Cumberland, and she advised me to use Cuticura Remedies which I did. The cure was certainly quick, and I use them to this day. I had it terribly under my knees. I only used one box of pills, but two boxes of Cuticura Ointment, and I use the Cuticura Soap all the time. I hope this will benefit others, as it has me, after Dr. — and others could do nothing for me." (Signed) Miss Lu Johnson, 1523 Ninth St., N. W., Washington, D. C., April 3, 1910.

In a later letter Miss Johnson adds: "The trouble began with an eruption under my knees, and extended upwards toward my waist, until I was not able to sit down. It kept a constant itching and burning all the time, night and day. I went to my doctor, but he could do me no good after I do not know how many medicines he gave me, and then told me I would be compelled to go to a skin specialist, which I positively refused to do. I cried all the time. Finally I made up my mind to try Cuticura Remedies, and tried Cuticura Pills, Ointment and Soap, and was entirely cured of the itching three days after I started using them. The healing took about eight days. I consider Cuticura Remedies marvelous, and would recommend them everywhere." Cuticura Remedies are sold throughout the world. Send to Potter Drug & Chem. HE HAD \$400.00 IN CASH IN 1903; NOW WORTH \$8,000.00.

My parents were originally Canadians from Essex County, Ontario. I was born in Monroe County, Michigan, from which place I moved to Red Lake Falls, Minnesota, where I farmed for 22 years. I sold my farm there in the summer of 1903 and in September of that year came to Canada with my wife and eight children. I had about \$400 in cash, team of horses, a cow, a few sheep and some chickens. I took up a quarter section of land near Jack Fish Lake, Meota P. O., and later on purchased for \$2,000.00 an adjoining quarter section. I have now 48 head of cattle, a number of horses, good buildings and consider my holding is worth at least \$8,000.00. My children have raised from \$300 to \$500 worth of garden truck each year since we have been here. I have never had a poor crop and have never had one frosted. My wheat has averaged from 25 to 30 bushels per acre with one or two years considerably more. My oats have always yielded well up to 50 bushels per acre and once or twice as high as 85. My cattle have never been stabled in winter, and do not need it. I consider that this country offers better opportunities for settlers than anywhere I have ever been. I am sure that almost any person can come here and buy land at say \$15.00 per acre and pay for it in one crop. My experience is that if a man farms his land in the right way he is not likely to have his crop frosted.

Most of the settlers in my district are Americans and Canadians and I know lots of them who came here with little or no capital who are now doing well, but I do not know of any who have left through disappointment, or becoming discouraged, have returned to their former homes.

SHE SUFFERED FIVE YEARS

Finally Cured by Lydia E. Pinkham's Vegetable Compound.

Erie, Pa. — "I suffered for five years from female troubles and at last was almost helpless. I went to three doctors and they did me no good, so my sister advised me to try Lydia E. Pinkham's Vegetable Compound. I bought a bottle, and when I had taken only two bottles I could see a big change, so I took six bottles and I am now strong and well again. I don't know how to express my thanks for the good it has done me and I hope all suffering women will give Lydia E. Pinkham's Vegetable Compound a trial. It was worth its weight in gold."—Mrs. J. P. ENDLICH, R. F. D. No. 7, Erie, Pa.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases we know of, and thousands of voluntary testimonials are on file in the Pinkham laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaint, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. Every suffering woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial.
