

STATE CAPITAL LINCOLN

Searching for Anthrax.

State Veterinarian Boostrom has returned from Omaha, where he examined cattle on a farm ten miles from town to ascertain whether or not anthrax was prevalent. He found no diseased animals on the place, but investigated the death of two animals that died last week. The owner of the animals skinned one of the carcasses and carried the hide on his back a distance of a quarter of a mile. Later a physician said the man had contracted the disease. He was taken to a hospital in Omaha and is now being treated. The state veterinarian said blood from the man's back was found by an Omaha physician to contain bacilli of anthrax. A little blood was taken from one corner of the hide and injected into four guinea pigs. Two of the pigs died and the others are now sick.

Funds to Enforce Seed Law.

The enforcement of the new pure seed and commercial stock food law passed by the last legislature will now be enforced as soon as the state food commissioner can buy apparatus and obtain an assistant or two. Deputy Attorney General Ayres has given State Auditor Barton an opinion holding that the Gerdes act requiring fees of all state departments to be deposited in the state treasury also appropriates fees of the several departments for the biennium and the fees to be collected for inspection under the pure seed law may be used by the state food commissioner to pay the necessary expenses of such inspection.

Prison Labor Contract.

The board of public lands and buildings is now receiving \$400 a month as a result of charging the prison contractor 5 cents a day for each convict who does a full task. This charge is made in lieu of \$200 a month formerly paid by the contractor to the state for rent, power and heat. The contractor formerly paid 55 cents a day for convict labor. The price is now the same with 5 cents a day added, making a total of 60 cents a day. Whether or not the contractor should pay 5 cents additional for each convict who starts to work each day or 5 cents a day for each convict who does a full task has been brought before the board, but it has been decided that the 5 cents is to be paid only for a full day's task.

Worth is Alive and Well.

The order of retirement has been issued by Adjutant General Ernest H. Phelps. General Hartigan enlisted in the Nebraska national guard in 1897 and has served as captain, major, colonel and adjutant general.

Acting State Food Commissioner Redfern has found considerable adulterated linseed oil in use in Nebraska, but he is of the opinion that there is no penalty. Two years ago the legislature passed a pure paint and oil law, but the words "linseed oil" were omitted from the penalty clause.

In reply to an inquiry from E. B. McDermott, county attorney of Buffalo county, the attorney general's office has transmitted an opinion stating that police magistrates under the Grossman bill, are properly nominated at a primary and that the voters qualified to vote for the police magistrates are those within the corporate limits of the city or town and that the voters in the three-mile district outside the town, over which the police magistrate has authority, are not qualified to vote for the officer.

County branches of the alumni of the University of Nebraska will be organized throughout the state during the month of October. Organizations will also be perfected in a number of the larger cities. For the first time in the history of the Nebraska university a permanent organization is being formed along the lines of the policies pursued by Harvard, Yale, Minnesota, Wisconsin and other large schools. The "old grads" become militant boosters for their alma mater, the local organizations acquainting the common people with the advantages of the school.

Murder at Syracuse.

He has been driving a dray team of late and went home as usual at night, and next morning his body was found without a sign of any struggle about the house or any instruments to show with what the crime had been committed or by whom. A neighbor heard a team drive up to the house about 10 o'clock at night, but did not hear it leave. It took Mr. Meeker twenty-two months to make the trip, starting January 29, 1906, driving overland in a prairie schooner. He followed the famous Oregon trail through Nebraska.
