ON A PROFIT-SHARING BASIS

Manager's Offer Most Generous, Sti It is Possible That the Greaser Rejected It.

A common method of dealing with greaser laborers in the new state of New Mexico is to have them work on shares. A somewhat original application of the system is cold on a wellknown manager of one of the 30,000acre ranch corporations.

A certain Mexican had been accosting the manager several times and asking for a job.

"Well, come over to my office," the boss told him finally, "and maybe I can fix up something with you."

"Now, I need a lot of postholes dug," he began.

"What will you give me?" asked the Mexican.

"Well," replied the employer generously, "I will give you half. You can dig my half on my ranch, and can put your half wherever you please-pick out soft ground for them if you want to."-Metropolitan Magazine.

"WHY SHOULD I USE CUTICURA SOAP?"

"There is nothing the matter with my skin, and I thought Cuticura Soap | April establishing three depots, which was only for skin troubles." True, it is for skin troubles, but its great mission is to prevent skin troubles. For more than a generation its delicate emollient and prophylactic properties have rendered it the standard for this purpose, while its extreme purity and refreshing fragrance give to it all the advantages of the best of toilet soaps. It is also invaluable in keeping the hands soft and white, the hair live and glossy, and the scalp free from dandruff and irritation.

more than that of ordinary toilet traveled about 100 kilometers. The soaps, it is prepared with such care and of such materials, that it wears to a wafer, often outlasting several cakes of other soap, and making its use, in practice, most economical. Cuticura Soap is sold by druggists and and were found dangerous in only dealers everywhere, but the truth of two places. For the rest-long, these claims may be demonstrated smooth undulations. without cost by sending to "Cuticura," Dept. L, Boston, for a liberal sample cake, together with a thirty-two page book on the skin and hair.

had to be solved.

Already, the day before, we had brought our sledges to the starting high mountains, the Fridtjof Nansen place for our search toward the south. Only in the beginning of September did the temperature rise to such an extent that there was any question of setting out then.

The First Start for the Pole.

On the 8th of September, eight men, with seven sledges, ninety dogs, and provisions for four months, started. The ground was perfect. The temperature was not bad. The next day it REACHED DESTINATION DEC. 14 appeared that we had started too early, as the temperature of the following days fell and kept steadily between minus 50 and 60 celsus (58 degrees and 76 degrees below zero Fahrenheit). Personally we did not suffer at all from the cold. Our good furs protected us. But with our dogs it was a different matter. It could easily be

seen that they shrunk from day to day, and we understood pretty soon that they could not stand the long run to our depot at 80 degrees south. We agreed on returning and to wait for the arrival of spring. The provisions were cached and off we went Hobart, Tasmania, March 8 .- On for the hut. With the exception of the loss of a few dogs and a couple of Only in the middle of October spring came in earnest. Seals and birds appeared. The temperature was steady between 20 and 30 celsius (68 de-

The original plan that all of us should go toward the south had been changed. Five men had to do this work, while the other three were to

start for the east and visit King Edward VII. Land.

This last mentioned trip was not included in our program, but owing to The ground and the state of the the fact that the English had not reached it, at least this summer, as While its first cost is a few cents dogs. On February 15, we had thus the best thing to do was also to make was their intention, we agreed that this trip.

> On October 20 the southern party started-five men, four sledges, fiftytwo dogs, and provisions for four months-everything in excellent order. The Journey to the Pole.

From the start it was the intention not to drive more than 30 kilometers a day, but it appeared that this was

body ready to set about the task that | turesque surroundings at a height of 5,000 feet. The glacier here was narrowed in between the two 15,000 feet

> and the Don Pedro Christophersen. At the foot of this glacier, the Devil's glacier, a depot for six days was established at 86.21 degrees south latitude. The hypsometer indicated

weather. On December 8 we came out of the sponse. "Honor thy mother and bad weather. Once again the sun smiled down on us. Once again we could get an observation. Dead reckoning and observation were exactly fragist days upon which we have fallalike-88 degrees, 88 minutes, 16.6 seconds south.

Before us lay an absolutely plain plateau, only here and there marked with a tiny sastrugi.

Establish Last Depot.

In the afternoon we passed 88 degrees 23 minutes (Shackleton's furthest south was 88 degrees 25 minutcs). We camped and established our last depot, depot No. 10. From 80 degrees 25 minutes the plateau began to slope down very gently and smoothly toward the other side. On the 9th of December we reached

88 degrees 39 minutes; on December 10, 88 degrees 56 minutes; December 11. 89 degrees 15 minutes; December 12, 89 degrees 30 minutes; December

13, 89 degrees 45 minutes. Up to this time the observations and dead reckoning agreed remarkably well and we made out that we ought to be at the pole on December 14 in the afternoon.

That day was a beautiful one-a light breeze from the southwest, the temperature minus 23 celsius (9.4 degrees below zero Fahrenheit) and the ground and sledging were perfect.

three p. m. we made a halt. According to our reckoning we had reached our destination. All of us gathered around the colors-a beauti-

ful silk flag-all hands taking hold of it and planting it. Name Plateau King Haakon VII.

The vast plateau on which the pole is standing got the name of the "King Haakon VII. Plateau." It is a vast plain, alike in all directions; mile after mile during the night we circled

Father Now in Second Place. She was a prim miss of thirteen who stood before the rector of a well known New York Episcopal church and looked him squarely in the eye. "Please repeat the fifth commandment again," he said, for he was catechising her with regard to her knowledge of the Scriptures apropos of the coming confirmations. "Honor thy mother and thy father, that thy days the Devil's glacier, always in misty may be long in the land which the Lord thy God giveth thee," was the thy father," mused the rector. "Who taught you that?" "Mother," was the response. "These are certainly sufen," remarked the minister. "Father used to come first."

> Counterfeiter Gets Stiff Sentence. William Fink, a Brooklyn, N. Y., dealer in drugs, was sentenced by the New York Court of Special Sessions, to imprisonment in the penitentiary at hard labor, for four months. The charge was counterfeiting the trade-mark for Carter's Little Liver Pills, in violation of the penal law.

The Carter Medicine Company detected the counterfeit before any quantity of the spurious goods had been placed upon the market. In sentencing Fink, Judge Deuel laid special stress upon the injury done to the public when a remedy so well known as Carter's Little Liver Pills is counterfeited and put on the market. He imposed the sentence not only as the prop-er punishment of Fink himself, but in order to deter others from the commission of like frauds in the future.

Stingy Thing.

utes.

In the fine weather we spent the following day taking a series of observations from six a. m. to seven p. m. The result gave us 89 degrees 58 min-

In order to observe the pole as close as possible we traveled, as near south as possible, the remaining nine kilometers

On December 16 there we camped. It was an excellent opportunity. There was a brilliant sun. Four of us took observations every hour of the day's twenty-four hours. The exact result will be the matter of a professional private report.

This much is certain-that we observed the pole as close as it is in human power to do it with the instruments we had-a sextant and an artificial horizon. On December 17 everything was in order on the spot. We fastened to the ground a little tent we had brought along, a Norwegian flag and the Fram pendant on the top of it.

The Norwegian home at the south pole was called "Polheim."

The distance from our winter quarters to the pole was about 1,400 kilometers. The average march a day was 25 kilometers.

Start on Return Trip.

We started on the return trip on the 17th of December. Unusually favorable weather made our way home considerably easier than the journey to the pole. We arrived at our winter quarters, "Framheim," on the 25th of January, 1912, with two sledges and eleven dogs, all well.

Among the results are the determination of the extent and character of the Ross Barrier, and the discovery of the connection of South Victoria land and probably King Edward VII. land, with their continuation in the mighty mountains running toward the southeast, which were observed as far as 88 degrees south, but which in all probability continue across the antarctic continent.

The entire length of the newly discovered mountains is about 850 kilometers. They have been named "Queen Maud's Range."
