Sensations exist for our guidance. They are Nature's warnings. Over-worked eyes demand rest. Eyes that tire easily call for help. Properly adjusted glasses afford the only assistance possible. We make a specialty of relieving tired eyes and guarantee satisfaction.

## Did You Know

That there is a big difference in Oranges? You know there is in apples. Take a New York or Michigan apple—it's juicy and fine flavored, while the Missouri apples are flat and more or less tasteless. Same way with Oranges. The Redland orange is about perfect, while that grown in other districts is like a Missouri apple. We have bought fifty boxes of the finest Redlands and are going to have

Some miserably disposed individual has lately been smearing the windows along Main street with soap, tobacco juice and other kindred things, this piece of devilry being done at night when no one is around. C. W. Braasch thinks he has come in for more than his share of this treatment, and he makes the proposition that if the fellow who has been throwing stuff on the windows of his coal office will throw the same at him personally he will have a lot more fun.

A certain little 4-years-old Norfolk girl bids fair to shine in society when she becomes older. She is already acquiring some of the rudiments, having learned that the best and cleanest is usually for social occasions. Recently she was ordered to wash her hands, and her father handed her the soap. The mother commented on the action with the remark, "Papa thinks soap always necessary." The little miss said, "But we do have to use soap when company comes, don't we?"

Mrs. H. H. Patterson tendered an informal reception in the parlors of the Pacific hotel to the traveling men's wives of Norfolk yesterday afternoon. The time was pleasantly passed in visiting and getting better acquainted. The guests were served in the dining room with very nice refreshments and the reception was on the whole a very pleasant affair.

The Broken Bow Republican speaks as follows of this address to men: "The address of Evangelist Daly Sunday afternoon, to men only, drew a full house. A number of competent judges who have heard a number of prominent men on similar occasions, state that they had never heard a better and more practical address, or one presented in so cultured a manner." The admission will be free, and no doubt there will be a large attendance next Sunday.

Big Prices for Hay Lands.

There is reported to be a heavy demand for hay lands up the Elkhorn valley. Forty acres near Norfolk was sold a short time ago for \$2,000, chiefly for its hay yielding value and the farmer who bought it has to haul the hay eight miles to market.

Real estate men in that part of the state are enthusiastic over present conditions. They say that settlers are coming in in large numbers and taking up land. The farmers are increasing their holdings and men who were working for hire seven or eight years ago are now in prosperous circumstances on farms of their own.

One reason why good hay lands are so much in demand is said to be that as the farmers are finding that it pays to improve the quality of the stock they are taking more care of the animals. Instead of leaving them to shift for themselves when the storms come they are providing a supply of winter feed which can be used when the ground is covered with snow.

In any case, the demand for this sort of land is a big factor in the situation, the heavy buying in the eastern tier of counties has driven buyers further west and there they are coming in contact with this other class of buyers and the result is an increase in prices all along the line. Right out to the northern part of the state hay lands are bringing from \$10 to \$20 an acre.—Omaha Bee.
