CHICKERING

The Master-Piece of Piano Construction.

The Chickering Piano has lived and grown in the most highly artistic atmosphere, for three quarters of a century. Masters of composition and musical expression, the world over, have praised the perfection of tone and action in the Chickering.

It represents the highest human achievement for the making of melody. Soft, mellow and sympathetic, it blends with the modulated voices for singing at home; yet it is strong, true and powerful for concert or other uses. String by string and key by key, it has been brought up to absolute purity of tone and responsive touch.

The home where the Chickering is has the best the world can give in music-making machinery.

A piano is bought for a lifetime—nothing less than the best should be considered—the extra cost is too trivial as compared to the artistic importance of a lifelong entertainer and instructor. Can be bought now in North Nebraska only at

Dakota City Eagle: In several towns the merchants have established a "resting room" in connection with the store, a place where customers may take off their wraps and sit down while waiting. The plan is intended especially for the convenience of the country customers and ought to be generally adopted. A great many farmers' wives, especially if they have children, dread to come to town because they have no place to rest while waiting for the men to finish trading. Such an arrangement would make the trip to town far more pleasant and would be quite a drawing card for the stores that adopt the plan.
