## WRECK VICTIMS SCALDED

Two Killed and Twenty-eight Injured Near Newark.

DERAILED BY SPREADING RAILS.

Accommodation Train on Northern Central Railroad Wrecked—Steam Pipes Burst and Add to Horror of Accident—Coaches Badly Broken Up.

Newark, N. Y., Aug. 30.—The accommodation train leaving Sodus Point over the Northern Central railroad and which arrives in this village at 6 o'clock was derailed last night at Fairville. Engineer William Meagher and Howard Tubbs, ticket agent at Sodus Point, were killed and 28 persons were injured.

The train was made up at Sodus Point and consisted of four coaches, a baggage car and engine, with William Meagher at the throttle. The train was running nearly 40 miles an hour. Approaching the station at Fairville there is a curve and gravel pit. For some unknown reason the engine jumped the track while passing the gravel pit. The force of the accident turned the engine completely around, throwing the five cars on their sides. The train load of some 150 passengers was thrown into the ditch and the engine and all the cars were badly broken up.

The cause of the wreck is not known exactly, but it is thought the rails spread. The country near the scene of the wreck is thickly populated, and it was not long before farmers were driving from all directions. The injured and dying were quickly pulled from the debris and improvised couches were made on the grass. Medical help was summoned and within a short hour several physicians were on the scene. Nearly all the injured were badly scalded and this was caused by the bursting of the steam pipes running under the cars.

### HORROR GROWS WORSE.

Appalling Results of Trenton Explosion Become Apparent. Nineteen Are Missing.

Philadelphia, Aug. 30.—It developed yesterday that the result of the explosion of the boiler on the steamer City of Trenton while on her way up the Delaware river from this city to Trenton Wednesday was more appalling than was at first supposed. Nine persons are known positively to be dead, at least 19 are missing, most of whom are believed to have been on the steamer, and two of the injured still in the hospital probably will die.

Although the searchers, consisting of a corps of city police, have been dragging the river ever since yesterday, they have been unable to find any more bodies. That there are more victims in the river, is the firm belief of the authorities and their failure to find additional dead is supposed to be due to the strong current in the river at the point where the explosion occurred. The water was pumped out of the hull of the burned steamer, after which a careful search was made for additional victims, but none were found.

As to the exact cause of the explosion nothing is known, but a rigid investigation is to be conducted at once. Many of the passengers who escaped maintain that the City of Trenton, which was late when she left this city, was racing at her topmost speed and that if this had not been the case the accident would not have happened.

A telegram received from Bristol, Pa., says that Miss Elizabeth Lippincott, a school teacher at that place, who was on the City of Trenton, had not been heard from. This makes 20 persons reported as missing.

### Bark Barado Stranded.

Marshfield, Or., Aug. 30.—The bark Barado, bound from Callao for Portland, went ashore early yesterday morning, nine miles south of the Coquille river. The accident occurred at Lobato sidetrack, about 100 yards from the high bridge, five miles east of Chama. The railroad men and passengers are alike unable to explain why the car turned over, as the time was slower than usual. The car was dragged about 75 feet. Mother Baptiste was thrown across the aisle and half way through an open window, her head and shoulders being dragged between the side of the car and the ties. She was dead before any one reached her, her head being split open. Sister Mary Nora is hurt internally and her injuries are quite serious. Harley McCoy was asleep when the jar came. His arm slipped through the window and his hand was ground off at the wrist. Conductor Whan had his left hip crushed and was also internally injured.
