NEBRASKA CROP CONDITIONS.

Late Corn Continues to Show Improvement in Most Sections.

Lincoln, Aug. 28 .- The week has been warm, with light showers in most localities. These have proven beneficial to late corn and pastures, and where sufficiently heavy have placed the soil in condition for fail plowing.

The warm weather of the week has caused early corn to mature rapidly; considerable of the early planted is being cut for fodder in a number of southern counties. Late corn continues to show some improvement in most localities.

Fall plowing is progressing rapidly In the southeastern section; in other localities the soil is generally too dry to plow, and this work in being retarded. Reports indicate that a large or an increased acreage of fall wheat will be sown. Haying is nearly completed in a number of northern counties, and the crop is good.
