Judge Sedgwick carried his town by a majority of 412 and his county by 550 majority. The home people did the right thing by both candidates for supreme judge and their home vote was a handsome compliment to each. Other towns might learn a valuable lesson in of Mr. Stutts. neighborliness by studying the returns from Fremont and York.

Chairman Lindsay's gness of 5,000 or 6 000 was good and more than good. His forecast was evidently based on a comprehensive knowledge of the situation, but what of the fusion chairmen's prophecy that Hollenbeck would be elected by 10,000 or 12,000? Perhaps they made a mistake in the name and excellent.

In the death of Li Hung Chang, China -progressive China-has sustained a loss which will be hard to replace and that country may never know his like. He was acquainted with America and Americans and therefore was the best friend of this country China has ever produced. It is to be hoped that his life's work may be an example to his fellow countrymen that will never be forgotten.

The strongest argument used against Dietrick last year was that he entered saloops and took a glass of beer occasionally and yet the liquor dealers association hadn't a good word to say for him. It may therefore be readily believed that the association officers never support the six months ending May 1, 1902, up anyone but a fusionist and especially if to 7:30 p. m., November 13. Contractor a clean and moral republican is arrayed is required to deliver the coal within the against him. It is probable that Dietrich met with no stronger opposition than this same association.

There were evidently a lot of fusionists in the state who have had their desire to vote fused out. They have learned that the bugaboos of their leaders were stuffed with straw and harmless and if they couldn't support the republican candidates they at least wouldn't exert themseves to oppose them, and concluded to remain at home and husk corn. Nebraska farmers are not as simple as the fusion leaders graceful figure and assures a perfect fitwould endeavor to have the world believe.

But two persons have died in Havana since April 1 from yellow fever and during the same period only 11 deaths have occurred from malarial fever. Last year 52 deaths from yellow fever and 22 from malarial fever occurred during the

An American eagle was shot on John Stutts' farm, nine miles northwest of the city, Tuesday by the young brothers

ladies, Miss Minnie Zimmerman, a sister

of Hon. P. F. Zimmerman, state repre-

A little girl ran onto the eagle in the house yard and thinking it was a turkey started to drive it off but it ruffled up

its feathers and flapped its wings and started towards the little girl, who be- not lawful for a Moslem to pray on any coming frightened, ran to the house. When the boys returned from school they were told of the savage turkey and upon seeing it were convinced that it was not a Thanksgiving bird and went back to the house for a shot gun. One pilgrimages, the rugs which they take meant Sedgwick. If so their guess was of the boys took a shot at it but only with them having been preserved from slightly wounded it so that it rose in

> the air and started to fly off. The other boy then took a shot and brought down the bird that proved to be a fine , specimen of the American eagle.

It weighed eight pounds and measured eighty inches from wing tip to wing tip. It was brought to town yesterday and sent to the taxidermist at Norfolk to be mounted.

It is said that this bird has been playing havoe with fowls and small stock. The young man who brought it to town reports that it had carried off a lamb .--Madison Chronicle.

Notice to Teamsters.

Bids will be received by the city of Norfolk for hauling coal from the cars to the waterworks pumping station for time required by the railroad company or pay demurrage. Bids to be filed with the city clerk and contract to be awarded by the auditing committee of

the city council at the above time. Dated November 8, 1901. S. R. MCFARLAND,

City Clerk

Relief for Stout Women.

The "Nemo Self-Reducing" is the only corset for stout women that positively reduces the abdomen, relieves those who are physically weak, gives a ting dress. All this is accomplished by the "Self-Beducing Idea," a new method of adjusting.

See exhibit in south show window. See the 50 cents pleated satin belts we are selling for 25 cents.

two or three years. The Mohammedan rand and makes his employer think

regard the law of the Koran animal forms are seen on some Persian rugs. The prayer rug was evidently invent ed for the purpose of providing the worshipers with one absolutely clean place on which to offer prayers. It is place not perfectly clean, and unless each one has his own special rug he is not certain that the spot has not been polluted. With regard to the purity of the place of prayer Mohammedans are specially careful when making their pollution by being rolled up until the journey is begun or until the hour for prayer arrives. It does not matter to these followers of Mohammed how unclean a rug that is on the floor may be, because over it they place the pray

er rug when their devotions begin. The Turkish rugs made at Sivas are always woven of wool, and almost every hamlet carries on the industry of weaving in the homes. There are no factories, the young girls and women doing the work here as in other parts of Turkey. Sivas rugs are in most cases small, measuring about eight by four feet, but in these years larger and more attractive rugs are being made. Even the poorest families have fine rugs, for they regard them as valuable property, to be sold only under the pressure of great extremity. The weavers are so frugal in their manner of living that their daily earning of 15 to cated by the appearance of small red 19 cents is sufficient to supply their wants. Their food consists usually of rice and crushed wheat, with occasionally a small piece of mutton.

Smyrna is only a mart for the sale of comparatively inferior rugs that are made in the interior from the coarse hair of the Angora goat. These are woven in irregular designs and, although not artistic, are largely sought as coverings for the bare floors and to add warmth. The weaving of these rugs is crudely done by girls and women. Sometimes the loom is primitively constructed from the trunks of trees. The designs are very simple and have either been handed down from earlier generations or are supplied from the city.

Yuruk rugs are so called from a band of nomads who dwell among the mountains of Anatolia. They have large flocks of fine sheep and weave rugs of firm, even texture. The colors are very good, the field often of dark brown, ornamented with large designs. About 200 years ago small embrolder-

ed rugs were largely made in Persia, chiefly at Ispahan. These were prayer

thing himself, one feels like discharging such a boy on the spot, for he is convinced that he was not cut out for success. That boy will be cursed with mediocrity or will be a failure. There is no place in this century for the lazy Success.

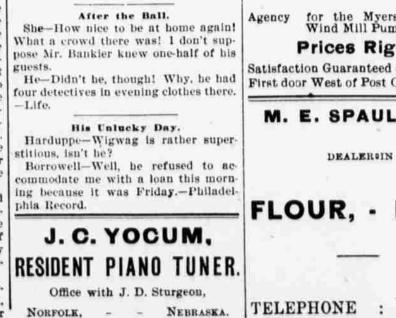

Shoulder Protection.

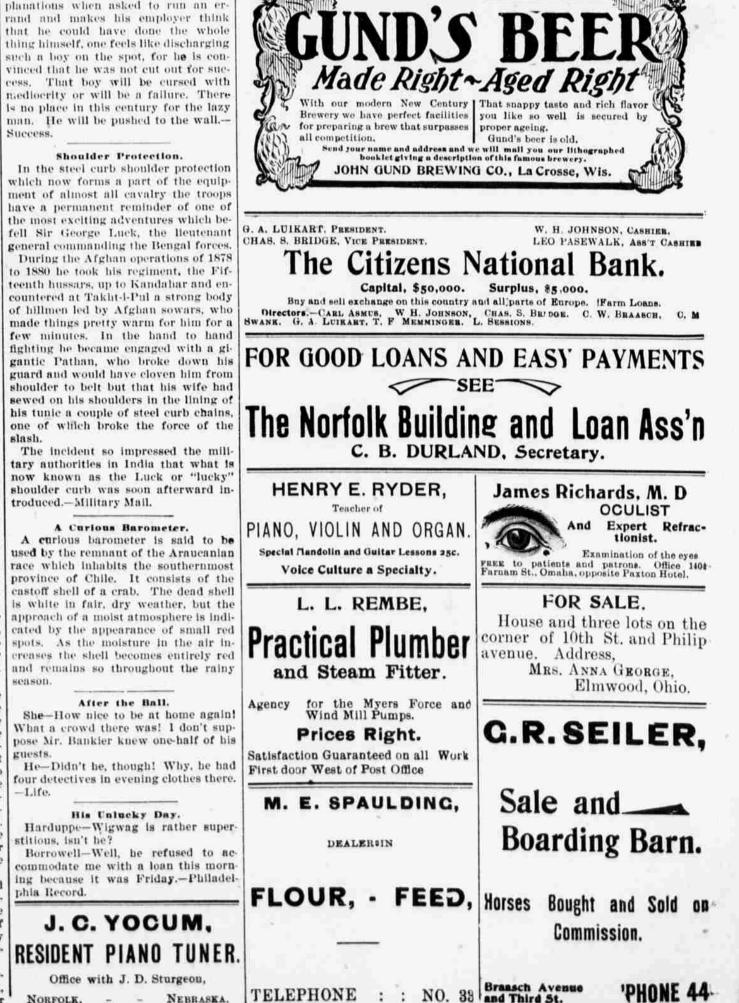

In the steel curb shoulder protection which now forms a part of the equipment of almost all cavalry the troops have a permanent reminder of one of the most exciting adventures which befell Sir George Luck, the lieutenant general commanding the Bengal forces. During the Afghan operations of 1878 to 1880 he took his regiment, the Fifteenth hussars, up to Kandahar and encountered at Takht-I-Pul a strong body of hillmen led by Afghan sowars, who made things pretty warm for him for a few minutes. In the hand to hand fighting he became engaged with a gigantic Pathan, who broke down his guard and would have cloven him from shoulder to belt but that his wife had sewed on his shoulders in the lining of his tunic a couple of steel curb chains, one of which broke the force of the slash.

The incident so impressed the military authorities in India that what is now known as the Luck or "lucky' shoulder curb was soon afterward introduced.-Military Mail.

A Curious Barometer.

A curious barometer is said to be used by the remnant of the Araucanian race which inhabits the southernmost province of Chile. It consists of the castoff shell of a crab. The dead shell is white in fair, dry weather, but the approach of a moist atmosphere is indispots. As the moisture in the air increases the shell becomes entirely red and remains so throughout the rainy season.
