READY FOR THE PRESIDENT

Senate Agrees to House Amendments to Oleo Bill.

SIBLEY DENOUNCES GEN. SMITH.

Expresses the Hope That President Roosevelt Will Strip Him of His Uniform—Conference Report on Chinese Exclusion Bill is Adopted.

Washington, April 29.—After a brief discussion yesterday the senate agreed to the house amendments to the oleomargarine bill as passed by the senate. The measure now goes to the president for his signature. An effort was made by Teller to amend the measure so as to levy a tax of 10 per cent on the capital or assets of any butter trust that might be formed, but it was defeated.

Simmons (N. C.) addressed the senate on the Philippine bill. He urged that the Philippines ought to be turned over to the inhabitants of the islands. He denounced the cruelties and barbarities alleged to have been committed by the American army and said he felt like calling upon the great, brave humane man now in the white house to probe these things to the bottom and at least to make them odious.

The conference report on the Chinese exclusion bill was adopted. Consideration of the sundry civil appropriation bill was begun, but not concluded.

Harris (Kan.) presented the following telegram he had received from the Kansas Millers' association: "Kansas millers, on account of foreign discriminations, with the best wheat in the world at their door, are not producing over one-third of their full capacity. Unless your committee on foreign relations can give us relief through reciprocal concessions, placing our millers on an equal basis with foreign mills, many of our mills will shut down indefinitely and some of them will be forced to the wall. In our distress we look to our senators for relief."

SIBLEY ATTACKS SMITH.

Bitter Denunciation of Orders Issued in Samar Campaign.

Washington, April 29.—Representative Sibley (Pa.) created something of a sensation in the house yesterday during the general debate on the agricultural bill by denouncing General Jacob H. Smith for the orders he issued in the Samar campaign. He declared General Smith was a disgrace to the uniform he wore, and expressed the hope that the president would strip him of the uniform within 48 hours. Sibley's speech was enthusiastically applauded by the Democrats and was received with some evidences of approval on the Republican side. The speech was considered the more remarkable in that it came from a Republican who left the Democratic party on the issues raised by the Spanish war, and who has since been an ardent expansionist. Williams (Dem., Miss.) endorsed what Sibley had said. Upon the conclusion of the general debate, slow progress was made with the bill, only 25 of the 49 pages being disposed of.

Representative Burleson (Tex.) introduced a resolution calling on the secretary of war for information as to whether General Smith's order relative to the war in Samar was based on orders issued from Washington, and requesting the transmission of all orders issued from Washington relative to the suppression of the insurrection in Samar.

NOT MANY GOOD WAR SHIPS.

Chairman Foss Says United States Navy is Not Up to Highest Standard.

Washington, April 29.—The naval program for 1903, as presented in the naval appropriation bill and accompanying report, filed by Chairman Foss of the house naval committee, is one of unusual interest. The report does not take an optimistic view of our naval progress as generally is held, and Mr. Foss points out that comparatively few of our ships have any real fighting value. He accompanies this with a statement of the enormous naval armament and programs of other countries, particularly Germany.

It is shown by the report that the number of the vessels in our navy, built and building, is 138, and the total cost will be \$235,082,209. The report adds:

"While we have built and are building, all told, 138 ships, yet comparatively few of them have any real fighting value. Our naval progress lies almost entirely in our 18 battleships, eight armored cruisers and 21 protected cruisers. The rest of our ships would cut but little figure in actual war. Ships in battle line alone determine the naval strength of a nation."

Concerning ships for our navy, the report says: "The committee recommends that for the purpose of further increasing the naval establishment of the United States the president have constructed two first class battleships carrying the heaviest armor and most powerful ordnance for vessels of their class upon a trial displacement of about 16,000 tons, and to have the highest practicable speed and great radius of action, and to cost, exclusive of armor and armament, not exceeding \$4,212,000 each; two first class armored cruisers of about 14,500 tons trial displacement, to cost exclusive of armor and armament, not exceeding \$4,559,000 each, and two gunboats of about 1,000 tons trial displacement."

The detailed statement shows that the appropriation bill carries \$77,675,386, which is slightly below the appropriation made last year.

SAVAGE OUT OF THE RACE

Governor Formally Announces Withdrawal as Candidate.

WILL NOT SEEK NOMINATION.

Says He Does Not Desire His Name to Be Presented Before Next State Convention—Defends Pardon of Ex-Treasurer Bartley.

Lincoln, April 29.—Governor Savage has withdrawn from the race for renomination, his formal announcement having been made public late yesterday afternoon, as follows:

"Executive Chamber, Lincoln, Neb. It now seems to be the proper time to announce as final my decision in regard to being a candidate for renomination for the office of governor. After thoughtful consideration of the matter I have concluded it best not to further embarrass my loyal friends and more especially my party by remaining longer in the field, thus standing in the way of some one who could bring more peace and harmony into the convention. In my official capacity I have tried to give the state an honest, strong and economical administration. Looking back over the year already spent as Nebraska's chief executive, I would not, had I the power, change one important official act. My action in commuting the sentence of J. S. Bartley met strong disapproval of many, most of whom are less conversant with the facts than I and to most of whom I give credit for honesty in their opinions. I now state frankly that with all the results of that act before me, I would commute his sentence today were it still undue. Fully appreciating the honor of being the governor of a great state, and of having the opportunity of serving the people through many avenues, under existing circumstances I hereby announce myself not a candidate for office. Hoping to see some strong, honorable Republican nominated and elected as my successor, and with malice toward none and charity for all, I am, respectfully,

"E. P. SAVAGE."

PRICE OF SANDWICHES RAISE

Increased Cost of Meat Has Its Effect on Patrons of Restaurants.

The price has been 5 cents, but the restaurants have put up their valuation because of the prices that are compelled to pay for meat. Rose beef sandwiches have advanced 2 cents, from 10 cents to 12 cents. It is estimated that 300,000 ham sandwiches are consumed in Chicago every day and the increased cost to the public will therefore be \$15,000 on the ham proposition alone.

An Oddity of Lost Caste.

It is not necessary to go to India to hear curious stories of caste. In a professional man's household recently a maid-servant fell ill of diphtheria. Her mistress nursed her herself through tedious illness until she was quite well. When that happy result was established, the maid immediately informed the mistress that she intended to leave her service. The reason of the maid's departure was this—"I could not live with a mistress who has been waiting on me herself." Quite evidently this is no mere indifference to kindness or in gratitude. The girl was the slave of that mysterious influence of caste which splits up into minute sections every modern society, as it split up every ancient society, and seems likely to split up any future society that it is possible to imagine.—London Saturday Review.

The Pearl Hunters' Superstition.

The pearl hunters of Borneo and the adjacent islands have a peculiar superstition. When they open shells in search of pearls, they take every ninth find, whether it be large or small, and put it into a bottle which is kept corked with a dead man's finger. The pearls in the vial are known as "seed pearls" or "breeding pearls," and the native Borneo firmly believes that they will reproduce their kind. For every pearl put into the vial two grains of rice are thrown in for the pearls to "feed upon."

Some Whites in Borneo Believe as Firmly in the Superstition as the Natives Do, and Almost Every Hut along the Coast has Its "Dead Finger" Bottle, with from nine to fifty seed pearls and twice that number of rice grains carefully and evenly stowed away among them.
