DOCTORS DISCUSS LORENZ.

Congress of Physicians and Surgeons Talk of Austrian's Methods.

Washington, May 14.—Fifteen of the component congresses of the Society of American Physicians and Surgeons held meetings and some of them concluded their work. The methods of Professor Adolph Lorenz, the Austrian surgeon, in the treatment of congenital hip disease and club feet, furnished the feature of the Surgical and Orthopedic associations. To the surgical association the case of Charles Willett, operated upon last November by Dr. Lorenz, for club feet, was presented. Although one of excessive difficulty, the operation was pronounced a perfect success. No decision specially condemnatory of Lorenz's methods was elicited, but some of the more conservative members of the association were adverse in their criticisms. The statement was made that the operation of Dr. Lorenz upon Lolita Armour, daughter of J. Ogden Armour of Chicago, to perform which the Austrian surgeon had come to the United States, had not proved entirely successful. It was evident from the tone of the discussion that a majority of the surgeons in attendance were supporters of the Lorenz methods. No action, however, was taken.
