British Delegate Proposes International Federation of Labor.

UNIVERSAL UNION SUGGESTED.

Plan is Received with Cheers by Delegates at Boston Who Favor Work-Ing Arrangement Between British and American Federations.

Boston, Nov. 12.-The plan for an International labor federation was enthusiastically received by the convention of the American Federation of Labor. This international alliance was proposed by James O'Grady, fraternal delegate to the federation from the cabinet makers and unholsterers of Great Britain, who urged that the laboring element in England and America work together in harmony. Delegate O'Gradv's plan was supported by James Simpson of Toronto, a member of the International Typographical

The morning session was enlivened by heated debates on the seating of Delegates Steel and Guild of Cleveland and Delegate Ernest Bohm, representing the Central Federated union of New York City. In each case it was decided to postpone action.

COTTON MILLS CUT WAGES.

Managers at Fall River Order Ten Per Cent Reduction.

Boston, Nov. 12.-Reports from the centers of the cotton mill industry throughout New England indicate that the announcement at Fall River that a 10 per cent reduction in wages had been decided upon by the cotton manufacturers there, to go into effect Nov. 23, has caused general uneasiness, due to the belief that an equal reduction at other places is inevitable. It is conceded that this will be the case in Rhode Island and eastern Connecticut and it is thought other cities in eastern Massachusetts may follow the example set by Fall River, though their cases are somewhat dissimilar.

In Torrington the Carr Manufacturing company has already ordered a 10 per cent reduction, and while the mill men at New Bedford, Lowell and Lawrence are reticent concerning their plans, they admit that the condition of the cotton market is all against the manufacturers. This is believed to be equivalent to saying that a wage reduction is something to be seriously considered.

Representatives of the labor unions in Fall River and other cities do not appear to anticipate any concerted action on the part of the unions in opposition to the new schedule. While not admitting the necessity for so sweeping a reduction, it is doubtful if any considerable number would join in a fight with the mill agents at this time. Although the outlook at Fall River from the operatives' standpoint is a rather gloomy one, it should be remembered that the new schedule is really a return to the conditions existing two years ago when an advance was made by the manufacturers.

CHICAGO STREET CAR STRIKE. General Suspension is Decided Upon by Union Men.

Chicago, Nov. 12 .- A general strike of the 3,000 employes of the Chicago at once, was decided on at a mass reached after a controversy that has management of the railway. Numereffort to adjust the difficulty by arbieration, but without satisfactory result, and the decision to strike was of the union were for a wage increase of 25 per cent, recognition of the union and several other minor concessions. The company, it is said. has several hundred men in readiness to take places of the strikers and will endeavor to run the cars with nonunion men.

SMALL OPERATORS SETTLE.

Independent Mines Make Terms with Colorado Strikers.

Pueblo, Colo., Nov. 12.-An increasing number of the independent coal mines are one by one making terms with the strikers and this cannot but have an influence with the two principal operating corporations. The San Juan Coal company of Aguilar has agreed to every demand except the 20 per cent advance. A compromise on this point was finally effected at 10 per cent.

Trinidad, Colo., Nov. 12.-It is reported here that negotiations are pending between the Colorado Fuel and Iron company and the Victor Fuel company and the operators in this district whereby a settlement of the difficulties may be reached before the end of the week.

A Paradox Explained.

Why does not a man weigh a pound more immediately after eating a pound weight of food? A little reflection will readily explain this apparent mystery. During the process of mastication, deglutition, etc., certain muscles are brought into active play, and the exercise of any muscle necessitates a temporary waste of its tissues, and a certain amount of carbon is eliminated and passed off during the course of the meal. This loss, however, is trifling as compared with that due to respiration and perspiration, both of which are increased during the various operations of making a meal.

The length of time one may take to consume a pound of food makes but with local applications, as they canlittle difference to those losses, for if it | not reach the seat of the disease. Cais eaten leisurely there is but slight tarrh is a blood or constitutional disthe time the pound is eaten the consumer has lost appreciably in moisture surfaces. and carbonic acid.

He Was His Own Grandfather.

Of all genealogical curiosities the one City Railway company, to take effect set forth below is probably the oddesta singular piece of reasoning to prove meeting of the men. This decision was that a man may be his own grandfather! Here it is: There was a widow (Anne) lasted for three weeks between the and her daughter (Jane) and a man representatives of the union and the (George) and his son (Henry). This testimonials free. widow married the son, and the daughous conferences have been held in an ter married the father. The widow was therefore mother (in law) to her husband's father and grandmother to her own husband. By this husband she endorsed by the men. The demands | had a son (David), to whom she was, of course, great-grandmother. Now, the son of a great-grandmother must be grandfather or granduncle to the person to whom his mother was or is great-grandmother, but in this instance Anne was great-grandmother to him (David); therefore David could not be other than his own grandfather.

Prodigality of Life In Ancient Egypt. The reckiess prodigality with which this respect, as the monuments yet remaining abundantly prove, they stand alone and without a rival. We may form some idea of the almost incredible waste when we hear that 2,000 men were occupied for three years in carrying a single stone from Elephantine to Sais, that the canal of the Red sea alone cost the lives of 120,000 Egyptians and that to build one of the pyramids required the labor of 360,000 youth. That's what Rocky Mountain men for twenty years.

A Remarkable River In Spain.

There is in Spain a river called the Tinto, which has very extraordinary qualities. Its waters, which are as yellow as a topaz, harden the sand and petrify it in a most surprising manner. If a stone falls into the river and rests upon another they both become perfectly united and conglutinated in a year. It withers all the plants on its banks as well as the roots of trees, which it dyes of the same hue as its waters. No fish live in its stream.

CRUSHES OUT

living things is the serpent, and the vilest and most degrading of all human diseases is Contagious Blood Poison. The serpent sinks its fangs into the flesh and almost instantly the poison passes through the entire body. Contagious Blood Poison, beginning with a little ulcer, soon contaminates every drop of blood and spreads throughout the whole system. Painful swellings appear in the groins, a red rash and copper colored splotches break out on the body, the mouth and throat become ulcerated, and the hair and eye brows fall out; but these symptoms are mild compared to the wretchedness and suffering that come in the latter stages of the disease when it attacks the bones and more vital parts of the body. It is then that Contagious Blood Poison is seen in all its hideous-The deep cating abscesses and sickening ulcers and tumors show the whole system is corrupted and poisoned, and unless relief comes soon this serpent disease tightens its coils and crushes out the life. The only antidote for the awful virus is S. S. S. It is naturo's romody, com-
