on Governorship.

WILL TAKE TIME TO CONSIDER

Has Not Been a Candidate Against Mickey and Thought He Would be Nominated-Dinsmore's Candidacy Changes Conditions Materially.

For a long time there have been mutterings among the republicans against the renomination of Governor Mickey, based upon the fact that his administration has not been considered quite up to the standard desired by the party that nominated and elected him, and many have been casting about to see who would make an available candidate to take his place. Quite naturally the public mind has been directed toward those men who were candidates before the convention which placed Mr. Mickey in nomination, Messrs. J. B. Dinsmore of Sutton, J. P. A. Black of Bloomington and W. M. Robertson of Norfolk.

Two years ago Mr. Robertson was unquestionably the leading as well as most popular candidate before the convention, and if he had staid in the them at his place of business. race he would have been nominated, in face of the fact that many of the delegates were pledged to other candidates. A great many of the representatives met him on the day of the convention for the first time and they were much taken with his strong ability and democratic disposition. Since then not one but many of those same delegates have expressed sincere regret that they did not break away for Robertson

The convention is yet three months of times concerning the disposition pealed by Evans, in many quarters that he become a coming republican convention, and he Mr. Mickey would be renominated.

to hunt up Mr. Robertson last evening. He was found comfortably smoking a cigar and reading an even-ing paper in the Elks club rooms. He PASS WEEK OF FRIGID WEATHER the side of the animal, ing paper in the Elks club rooms. He had just seen Mr. Dinsmore's announcement, and was apparently somewhat prepared for the question which was propounded to him:

"Mr. Robertson, Mr. Dinsmore has announced himself as a candidate for governor and it is said that you are likely to be a candidate. The News would like to know what you have to say to the proposition."

"Well," replied Mr. Robertson, "I have always felt that an official who has served the state acceptably for one term would under ordinary circumstances be entitled to a renomination. If, however, the majority of his party is dissatisfied with him, I suppose it is their privilege to nominate some one who is satisfactory to them. I have not up to this time been a candidate for governor against Mr. Mickey, since the time he was nominated by the republican state convention. With the changed conditions precipitated by the announcement of Mr. Dinsmore's candidacy, however, I feel like consulting my friends before determining what I will do."

Mr. Robertson went to Lincoln this afternoon, where he will address the annual banquet this evening.

Cold Wave Has Been One of Enduring Qualities, But it Appears that the End is in Sight.

For about a week now Nebraska has been experiencing an unusually severe siege of cold weather, with the mercury registering below zero each day. Last Saturday was warm and agreeable, but with Sunday the mercury took a tumble and has been remaining near the bulb since. The indications are that the limit has been reached, however, and a rise in temperature is confidently looked for.

That other points in the northwest have known lower temperatures is shown by this morning's report:

Duluth-Clear, calm, 24 below. Fargo-Clear, calm, 35 below. Sioux City-Cloudy, calm. 2 above. Lincoln-Clear, calm, 10 above.

When Farmers Harvest Their Stalks as Other Crops the Disease Will no Longer Worry-The Process of Digestion in Cattle.

Norfolk, Feb. 11.-In a recent issue It is said that a new independent of your paper I read an article by Mr. telephone company is organized in S. H. Perry of Elgin on the old sub-Madison county, just west of Madison, ject of the so-called corn stalk dis-A large number of the farmers of that ease, in which he believes the cause section are reported to be interested of death to be due to "lack of nutriin the new company which is prepar- ment in the stalks." I would like to ing, if possible, to enter the city of say a few words in reply. In many cases of corn stalk disease that I have A very pleasant party was given had experience with, the trouble has it the home of Arthur Simms, South occurred early in the fall before the Eighth street, at which a large num- stalks have been "frost bitten and ber of friends were invited. Delicious sun bleached so many times that they refreshments were served at the close are worthless," and I have been in herds where they have been dying, where the cattle have had grain feed, corn, or corn and oats, before going out in the stalks.

Then he says the stomach of the cow or ruminant has two parts and the folds in the second stomach are the same as the folds in the first stomach, which is wrong. The stomach of the ruminant is very complex and made up of four compartments. First, ill at the home of Mrs. Elsie Desmond, is the rumen or paunch; 2nd, is the reticulum or honey-comb, and is the smallest of the four compartments; manyplies; 4th, is the abomasum, or

The first three compartments have land sale, was yesterday decided in little to do with the essential process when it was time and cast their votes | Conley's favor by County Judge Bates | of digestion, being principally conat Madison.
