Fusan, Korea, June 10.—The first division Japanese army has recently been engaged in most important operations. The Japanese casualties were sixty-five men killed or wounded.

Persistent rumors are in circulation of a battle at Port Arthur, that place being attacked by land and sea. Nothing definite is known, however, except that the attack made by the Japanese has not so far succeeded.

JAPS ARE SAYING NOTHING.

No Definite Information Obtainable at Liao Yang.

THIRTY-TWO CLERKS FOR ROSEBUD

Department at Washington Will Send Large Corps of Men to Bone-steel and Fairfax.

Washington, June 10.—Chief Clerk Macy of the department of the interior is perfecting arrangements necessary to send thirty-two clerks to the Bonesteel country to assist at the opening of the reservation to settlement. The clerks will have charge of the entries of intending homesteaders under the direct supervision of W. A. Richards, commissioner of the general land office. They will be experts in their line of work and according to the itinerary prepared they will be assigned to the following points in South Dakota: Yankton, Bonesteel, Chamberlain and Fairfax.

The clerks are made necessary by the enormous filings which will be made at the four points mentioned, which are expected to far exceed the anticipations of those most greatly interested in the opening of the Rosebud country. The failure to pass the bill until the closing hours of congress gave the exponents of the measure little encouragement that the reservation might be opened during the early summer, but the members of the South Dakota delegation with push and enterprise, forced the adoption of regulations as early as the law permitted, and in consequence it now seems as if there would be thousands of applications for drawing when the lands included in the Rosebud reservation are drawn under the direction of Commissioner Richards.

It is expected that the corps of land office clerks who are sent to relieve the congestion in the four land districts above named will leave Washington July 1, thus giving them ample time to reach their several destinations in season for the opening.

From the Mississippi river to Chicago the rates are three cents less.

HOLT COUNTY HERMIT IS INSANE

Has Lived Eleven Years in a Dugout in the Sand Hills—Graduate of the University of Iowa.

O'Neill, Neb., June 10.—Special to The News: Thomas Williams, living three miles west of Inez, a graduate of the University of Iowa, 1874, was declared insane by the board of examiners here yesterday. For eleven years he has lived alone in a dugout in the middle of the sand hills, with only a bed of straw to sleep on and an old worn out hay burner to cook his meals. As nearly as can be found out, years ago he had some trouble with his relatives over the settlement of his mother's estate and he left them at that time and came out here. He has been considered a little off all the time, but only during the past two weeks has anything definite developed. He imagines the hills around him are filled with cowboys, under the ground, that he can hear them talking, and when the sheriff came out after him he wanted to file a complaint against them. On all other subjects he seems very rational and can talk on almost any subject and shows his education very plainly. He is a very good worker, helping his neighbors but accepting only about half of the ordinary wages and more often nothing. He wears nothing but old rags and would take nothing else, while his beard and hair are long and unkempt. Some time ago his brother sent him a money order but he sent it back at once and will accept nothing from any one else. He will be sent to Lincoln, but his relatives, who live near Iowa City, will probably take him to Chicago, as soon as they can persuade him to go.

A complaint has also been filed against a man named Akerman, living near Stuart, and the sheriff went up yesterday afternoon to bring him down before the board of insanity.

A number of additional arrests have been made. General Bell says that some of the mines will resume operations tomorrow with non-union miners.

The Portland people are preparing to fight the action of Bell in ordering their mine closed.

Cripple Creek, June 10.—The excitement in this district is gradually subsiding. The first of the non-union mines was opened today and the opening of others will follow promptly.

The warfare against unions of all character and all organized labor is gradually being extended. Employers in every branch of industry in this city have already agreed not to employ union help of any kind and the movement will be extended to other cities of the district.

KNOCKS THE PERSIMMON

ATTORNEY GENERAL KNOX WILL BE SENATOR.

HE SUCCEEDS TO QUAY'S SEAT

Announcement Made That the Republican Leaders of the Keystone State Had Agreed on Appointment of Knox to Succeed Quay.

Philadelphia, June 10.—The announcement was made yesterday by the republican leaders of Pennsylvania that Attorney General Philander C. Knox had been agreed upon as the successor of the late Senator M. S. Quay, and the announcement of his appointment to the office is expected at an early date.

It has been agreed that the attorney general will be appointed tomorrow by Governor Pennypacker to the office. He will retain his position in the cabinet as attorney general until December when congress convenes. His term as senator will expire next March, but it is expected that the legislature will re-elect him. The president gave his consent to the change by Knox from the cabinet to the senate with great reluctance.

The vacancy was caused by the death of Senator Quay and the leaders have found it difficult to settle upon who should have the support of the party for the place. The matter was thought to have been settled when George T. Oliver of Pittsburg was agreed upon, but the whole matter was again thrown open by Mr. Oliver's withdrawal, and was only settled by the agreement upon Knox as the man.

A representative of Knox was before the leaders Wednesday urging his appointment and yesterday the attorney general went to Washington to learn whether his acceptance of the office and withdrawal from the cabinet would be acceptable to President Roosevelt. The president gave his consent to the change and the matter was soon disposed of, but a vacancy is left in the cabinet.

Philander Chase Knox, the new Pennsylvania senator, was made attorney general in the cabinet of President McKinley in 1901 as successor to John William Griggs of New Jersey and was sworn into office April 9, 1901. He was the choice of President Roosevelt for attorney general in his cabinet and was confirmed by the senate December 13, 1901. He was born in Brownsville, Pa., May 6, 1855, his father being a banker. He graduated at Mount Union college, Alliance, Ohio, in 1872 and entered the law office of H. B. Swope at Pittsburg and was admitted to the bar in 1875; was assistant United States district attorney for the western district of Pennsylvania in 1876 and in 1877 formed a law partnership with James H. Reed and was elected president of the Allegheny Bar association in 1897.

THE BEST IN THE WORLD

NEW LABORATORY OF UNIVERSITY OF PENNSYLVANIA.

BUILDING DEDICATED TODAY.

Opens Up a New Era in Medical Teaching by Associating Research Work of Value to Medical Men—New Building Cost \$700,000.

Philadelphia, Pa., June 10.—Scores of the most eminent physicians of this country and Canada, who have been attending the convention of the American Medical Association at Atlantic City this week, were present today at the formal dedication of the new medical laboratory of the University of Pennsylvania. Besides the medical men the participants in the dedication exercises included presidents and instructors of many leading medical schools. The students, faculty and guests marched in procession from Haddon Hall to the new building where the exercises took place. The speakers included Professor H. P. Bowditch, professor of physiology at Harvard university; Dr. R. J. Chittenden, director of the Sheffield scientific school, at Yale university; Professor Horatio C. Wood, of the University of Pennsylvania; and Prof. George Dock, professor of medicine at the University of Michigan.

The medical laboratory provides for the teaching of students and the carrying on of research work in pathology, physiology and pharmacology. In completeness of equipment the laboratory is said to be without a rival in Europe or America. The construction of the buildings has occupied about five years, and has cost, exclusive of its ground or equipment, in the neighborhood of \$700,000. The first floor of the building is to be devoted to physiology and pharmacodynamics, and the second floor will be devoted exclusively to pathology. There are two demonstration rooms, each of the latter having a seating capacity of 400.

The museum and gross morbid anatomy demonstration rooms are in close proximity to the large class laboratory of pathological histology with the important aim of closely relating the instruction carried on in each. The laboratory of pathological histology, the front of which consists almost entirely of glass, is located so as to face a spacious court, thus insuring an excellent and uniform light and admirably adapting it for microscopic work carried on by a large class. In drawing up the plans for the building the same care was taken to insure perfect lighting in all of the laboratories and demonstration rooms.
