Entered at the postoffice at Norfolk. Neb., as second class matter. Telephones: Editorial Department o. 22. Business Office and Job Rooma

HOW THE PARTIES WILL LINE UP

are this year, some matters are quite clear. It is already certain that six tickets will be in the field for the presidential contest and there are possibilities of several more.

The populists will meet at St. Louis July 7 the democrats will hold their convention at Denver. Following them hibitionists with gather. William R. can well afford to stand. Hearst's new political party, the independence league, will meet at some date still later in July. They have not yet decided where they will meet. The socialists will also hold a convention but the day and place have not been named.

It is interesting to note how the different parties have demonstrated their strength in some previous cona popular vote of 7,624,480; the democrats 5,082.754; the populists 117,935; the prohibitionists 258,787; the social democrats 402,286, and the social labor party 32,088. The largest vote that 1892 when James B. Weaver, the populist candidate for the presidency, received twenty-two votes in the electoral college and 1,041,028 in the popular vote. This was the largest popular vote ever cast for a third party

These comparisons while interesting are not of much value as related to the present candidates. Not only does the popular mind change rapidly, but the popular vote increases so markedly in this country that the vote of one quadrennial contest is liable to be greatly increased at the next, As showing the phenomenal growth in the vote of this country, in less than forty years, it is a matter of interest almost every man and woman in the and significance to rember that Abra- element of uncertainty and risk. This ham Lincoln in 1860 was elected president with a popular vote of 1,866,352, while in 1896 William Jennings Bryan history is searched. was defeated, although he received a popular vote of 6,502,925.

NOT AS TRUE AS IT SEEMS.

that national party conventions are too the peasants of Italy are busy plantspectacular. It says "every national ing their vineyards and building their thing should be done to place the seal be given to the reckless dissipation of convention is turned into a scene of meagre huts at the very summit of of condemnation upon the men who natural resources but rather to their excitement and turmoil. The galleries their cones. are packed with men who have no business there, solely that they may 'root' for or against certain favorites. Pandemonium riegns for half an hour at a time. It is the rule of hysteria in a moment fraught with the most of horror before the people were getserious issues of our national life."

That there is some truth in this statement is not to be denied. And

The wild scenes of buoyant and overed on the floor of the convention among the delegates themselves. When in tones of derision "a stampede" is spoken of, as a matter of historical record, how many candidates for the presidency have ever been nominated by a stampede against the will of the people?

The truth is that the national gath erings, where once in every four years the men are named as the party's choice for the high office of presidency, are and must remain very democratic, open to all the people who can gain admission, if they are to be typical of a free, frank and self controlled people.

Imagine, if you please, some political party naming a presidential candidate then there is loss of confidence, busbehind closed doors? No one doubts iness failures, men out of employment. very fact would presage its overwhelm- is flooded with bills and panacea's altogether if he does not use it. ing defeat.

It may be undignified. But it suits the forgotten. ideas of the people. They never demanded publicity and open and above buoyant spirits and despite the disboard discussion as much as they do asters which come over and over at present. They like big convention halls and they are not alarmed at might prevent-we are constantly risnoise. There is every reason why a ing to higher heights in a great nationgreat event like a great convention al development, should not be spectacular. It gives a chance for that display of the spirit and trend of public sentiment which in itself is a mighty safeguard and and preferences, worthy of being heeded.

KEEPING IN TOUCH.

It doesn't take very long to obtain a correct estimate of a man's real value. Moreover, it is not dependent upon some things near as much as is usually supposed. A man may have themselves and yet lacking in others, fail to put his impress upon the community in which he lives.

Industry, integrity, energy, intellivertible that they are as fundamental in four. as the simple mathematical laws of addition, subtraction, multiplication and division. And yet the most ordinary observer has discovered men in every walk of life who had all these qualifications and yet falled to arrive in any sense which is seemingly commensurate with their splendid characters. It is evident that to these very valuable factors, another ingredient must be added, to make a compound which has in it the guarantee of the largest and best kind of a life which shall meet one's own highest satisfaction and leave on those with whom it comes in contact the marks of a great soul.

When the really large man is discovered it will be found that he has the capacity and the determination to keep in touch with every thing that is world over. vital to his own and his neighbors welfare. When reference is made to a large man, it is not meant that he of necessity occupies a large or a prominent position. Large men in a own, are found everywhere. In the all the time. office, in the busy marts of trade, in the factory and the work shop, and on by that happy and insistent faculity and human interests at every point he craves, and his friends desire for sions, him than to cultivate this quality of keeping in touch.

ATCHISON GLOBE SIGHTS.

It is getting to be so that if a man's mind is as pure as it should be, he can't make out half that he reads a secret from her husband for eighteen these days.

Tell a girl before marriage that she dumb knows it. is going to throw herself away, and you insult her: tell her after marriage that she might have done better and you flatter her.

What are neighbors for? They are to notice things. If you ever did anything out of the way you are reminded that was what your neighbor was there for.

People grow so suspicious with years that if a man hears that a brother he has not seen in twenty years is coming to see him, he says, 'Now what does he want?"

When a man leaves the town in which he was raised hating it, and every one in it, you may be sure he will not be any more fond of his new home than he was of his old.

When a man transgresses, punishment is the greatest charity. The people who know of his transgression should also know that his punishment is swift and sure. The warning that comes from punishment is of value to society; forgiveness of a crime is a detriment to society.

An Atchison man says the only way to cure a woman of borrowing from her neighbors is to move her away out west on the frontier, where she would have to walk five miles neighbor wouldn't have what she wanted when she got there.

Too many people cannot do a thing without stopping to give their reason for it. If they borrow a pencil, they relate how they lost their own; if they refuse fish at the table, they tell of There are two brothers in a town how too much fish once made them ill. near Norfolk who have been courting If they only knew how much too busy the same girl, as rivals for her heart. the world is to stop and listen to rea-It's a great chance for serious compli- sons, they would refrain from giving

> We were never quite so tired of guing" that goes on. Two men meet, and argue for hours. At the end of the argument the men hate each other, and have wasted a lot of time. The same sort of thing goes on in the newspapers, and among orators.

> You are apt to think if you are unmarried and old fashioned that the first request your bride will make of you will concern something she can do for your comfort, but that will not be her first request. It will be to ask you if she can go home to her mother's and stay a few weeks.

> Marriage seems to give a girl many rights in her family that she never had before. She will tell her mother how to do things, and boss every old maid aunt and sister on the place. She has been known to advise her father in his business affairs, telling him for authority that her husband

> When you see a lot of boys and girls coming from school, you will notice that the boys do not walk with the girls; they tag along behind and keep up a running conversation with them, but they seldom walk with them. Sometimes a boy will throw snow down a girl's back and pay her attention of that kind, but he seems to be ashamed to be actually in her company.

The salad is the waste basket of the pantry. If a woman has a few currants left, a scrap of cheese, an apple or two, a boiled egg, half a potato, etc., she mixes them together, pours mayonaise over the mess, and then sends out invitations to a party. The party after party, but there is always women make the same kind of cakes a variation in the salad because no "Lent lasts forty days," remarks the two women have the same scraps left to work with.

OVER NORTHWEST PRAIRIES.

Ainsworth Star-Journal: A fine specimen of almost pure copper was recently found on the Lindquist place near town. It was sent to the Smithsonian Institution at Washington. where its identity was declared-it must have come from the copper reis a mystery. It does not show any signs of having been in the drift, and we have little, if any evidence here of the drift having reached this vicinity.

Wayne Democrat: At the council meeting, Messrs. Emil and Walter Weber were present and interested the alderman in a scheme to have Weber Bros., furnish power to light the city and pump the water. The over the expenses of the city for the past five years, and taking that as a basis they believed they could save the city about \$2000 per annum on the matter of furnishing power. An hour or two was devoted to the subject at the conclusion of which the finance committee were asked to look up the exclusive expense the city had been to in past years on getting power, and to report same to the mayor, a special meeting then to be called to determine what sort of a contract could be entered into with Weber Bros. The change would leave the city a lot of valuable machinery on hand that could be sold or kept, as may later be determined.

That's Right.

Nebraska City Press: They are telling of a Norfolk woman who has kept years. However, probably everybody else in Norfolk who is not deaf and
