The following is a telegram to this morning's Bee from Ames: "The Standard Beet Sugar company has made arrangements with the Norfolk company by which a considerable portion of the beets raised around here are to be sent to Norfolk, the Standard company paying the farmers the same price that they were to pay for delivery at Ames. The Standard Cattle company has shipped to Norfolk a good many beets and will ship the beets of one 400-acre tract. The larger part of the beets are being siloed, the sugar company paying for the siloing of those beets the time for the delivery of which has expired. Work on the factory is progressing as rapidly as possible, but it will not be finished before December. The yield of beets per acre is not as large as was expected, but there is a good profit on them for the farmers."

LINCOLN, Nov. 16.—Interest in the election last week was revived when the tabulating of returns began at the state capitol, inasmuch as it shows that Holcomb ran far ahead of his ticket and that the Republicans have possibly elected one of the university regents, while the majority on the second fusion candidate will be less than 6,000. The count from 64 counties out of 90 in the state gave Rich (fusion), for regent, 81,887; Ely (Rep.), 81,501. The same counties gave Holcomb a majority of 11,588. Value of Old Bottles.

The old bottle trade of Omaha—how many merchants realize the importance of the growing industry? In other towns of the state the traffic has in the past few years become enormous. Every year Omaha dealers ship to the east cars of old bottles—the collection of months but nevertheless articles of commerce—in the aggregate worth thou-

sands of dollars annually. The traffic employs a small army of people and supports many families. During the past summer when the glass factories were unable to supply the demands of the trade these dealers in secondhand bottles very nearly controlled the bottle trade of the country. When it is understood that the beer and wine bottles in everyday use cost originally seven and eight cents when the bottle and contents are sold together for not more than 10 cents, it is understood what a factor the bottle trade is in the expenditure of every big establishment. The bottle dealers have learned the value of separating and classifying different brands of bottles and now they sell back to this or that beer manufacturer the stock he has had manufactured for his special use. They collect the bottles from the back doors and alleys at very little cost. When cleaned at a very little expense they were just as good as new to the manufacturer. All Nebraska of course contributes to the stock of secondhand bottle dealers of Omaha and they in turn ship the stock east. Nothing composed of glass escapes these thrifty merchants and when the glass stock of the country runs low, they can always be depended upon to place their stock on the market at a good profit to themselves. Fortunes are annually made in this traffic. It has taken the place of the buffalo bone traffic that flourished so generally in the west a few years ago. In many respects the traffic is very similar and many of the buffalo bone hunters are now in the secondhand bottle trade.—Omaha Trade Exhibit.
