I have ha ned from the Clerk's books that the general fund levy for 1879 is exhausted, and that bills amounting to from three to five hundred dollars are due in excess of said levy, and would recommend that if possible you devise some plan to supply the necessary means to enable us to meet our current expences on a cash basis, and take the liberty to call your attention to the fact that on 10th and 11th streets the tract of land formerly known as Columbia Square recedes from the line of those streets twenty feet, and perhaps the property owners at those points would be willing to pay a fair consideration for the twenty feet necessary to bring them into line with the streets, and would recommend that steps be taken to negotiate such transfers if you deem

it advisable. The protection afforded by our city against fire, in my judgment is entirely insufficient; outside of the range of wells now provided the only protection we have is what the Hook & Ladder apparatus affords, which is very good, but by no means sufficient, and I would recommend that you investigate the chemical or Babcock principle of protection against fire, believing that to be more economical than to supply the whole city with cisterns or wells.

I would also suggest that the proper officers of the U. P. R. R. and the L. & N. W. R. R. Co's, be solicited by you to arrange their water tanks (at the expense of the city if demanded,) so that water can be supplied for our engine, in case of fire in their localities.

I would also call your attention to the fact that for many years there have been deep and dangerous holes at points where the U. P. R. R. main track crosses Washington Avenue and L street, both being important crossings in our city over said R. R., and that you request the proper officers of the R. R. Co. to fill up those holes and arrange the crossings so that at least two teams can cross at the same time; and to fill up the ditches the full width of the
