"Jim" Brindley and Chris. From are fixing up their billiard hall in fine style. They will also keep fruit and confectionery, and with "Pretty Chris," to shake up lemonade and dish out the peanuts, are sure to make it win.

The Schuyler News says that Columbus's request in regard to the new route between here and Lost Creek "is perfectly harmless and will probably be granted." Much obliged, but why use the word "probably"?

Travel between Columbus and Lost Creek station is brisk, and lively teams are having a big run, and so it will continue until the new road is built, when the horse of flesh and blood will have to give way to the iron horse.

Our horsemen are making arrangements to have a number-one race course built this spring. With what fast horses we have here and what that would come, were good purses offered, we could have one of the best fairs in the State.

Now the city has three printing offices we suggest the propriety of the city having its work done where it can be done the cheapest. Those who work for the public are justified in having things done just as economical as they possibly can be.

Having procured the services of Jacob Gregorius to help me out on Saturdays and Sundays, my customers will still find three chairs running as usual these two days. Give us a call at the well known Chicago Barber Shop. H. Woods, proprietor.

David Carrig gave us a business call Saturday. Those who trespass upon his hay lands must take the legal consequences. His patience has been worn down to the quick. "Don't turn to the right, don't turn to the left, but keep in the middle of the road."

Old settlers cheer us up with the information that fourteen years ago the spring was cold and backward as it is in this year, and that they did not sow wheat till the middle of May, but were rewarded with a yield of 28 to 30 bushels per acre.—Seward Reporter.

Elliott & Luers have established themselves in the implement business, and both being reliable, respectable, thorough business men, and well informed in their line, those wishing farm implements, buggies, pumps, &c., will find it to their interest to see them.

In buying farm implements, it pays to buy a good article, and then take care of them. The John Deere goods have been sold at Uhlig's old stand for the past five years, and have given universal satisfaction. Geo. D. Foster continues their sale, and at bottom prices.

Squire Bailey says that fourteen years ago, on the Elkhorn bottom, the season was later than this, and they had the largest kind of a crop of wheat. The only object in putting wheat in early, in this country, is to secure moisture enough. There seems no probability now that we shall lack in that respect.

We have just received a copy of the Columbus Democrat. It is a spicy and readable paper, and we hope it may have a more prosperous career than its predecessors. The Era, Republican, Independent and Platte Valley Democrat, have all budded, bloomed and faded within our memory.—Butler Co. Press.

A. W. Doland wishes to sell his property in Columbus, and will give a good bargain. Good house and lot 132x132, enclosed by good fence; a good barn, nearly new, all in good repair. A good horse and buggy, harness, robes, etc. Will sell them at a big sacrifice, and give time if desired. Apply to A. W. Doland or to Becher & Price.

The melting snows have kept the roads muddy the last week; if the warm, bright days continue a little while longer, Nebraska will be herself again, and there will be no more growling at roads. In many a place east, under similar circumstances, the mud would be twelve to eighteen inches deep, while here two to three inches is considered out of place.

The B. & M. at their bridge over the Platte southeast of the city will have four hundred feet of bridging to do, more than when they laid their road. There was so much of a wash that in one place, which before the flood was prairie, there is now a stream fifteen feet deep, requiring a bridge two hundred feet long. They have had to go out of their original right of way to re-lay their track.

On Sunday evening the Presbyterian church was filled to its utmost seating capacity, on the occasion of the special Easter service, which consisted of readings by the pastor, Rev. Cate, and responses by the congregation. The pulpit and organ were profusely decorated with flowers pleasing to the eye. The music furnished by the choir on this occasion was excellent, especially the anthem sung previous to the register services, and which, by request, was repeated at the close.

The officers of the Episcopal Church elected on Easter Monday were as follows: James Smith, Sen. Warden, Dr. C. B. Stillman, Jun. Warden. Vestrymen: G. W. Hulst, Byron Millett, Gns. Becher, John McFarland. The Easter collection for church repairs was forty dollars. The delegates elected to the Diocesan Council at Omaha on the 17th of May were James Smith and Byron Millett.

Dr. Bonesteel returned home Friday evening from his extended visit east. A friend in Montreal sends us a copy of the Herald of that place of April 5th, which contains the following mention: "Dr. S. A. Bonesteel, of Columbus, Nebraska, has left for home by way of Boston and New York, which cities he intends to visit. This gentleman received degrees honoris causa of his profession at the late convocation of the McGill University. He considers Montreal a very fine city, and speaks in high terms of the courtesy extended to him by those of the medical fraternity he met during his stay here. We wish him success."

The Grand Lodge Knights of Honor met at Nebraska City Tuesday and Wednesday last week. The ball and banquet, attended by some three hundred couples, was a magnificent affair. There were thirty-one delegates present from subordinate lodges, H. P. Smith representing Monitor lodge of Columbus. The officers for the ensuing year are: D. M. Welty, Fremont, Grand Dictator; C. W. Phillips, Neb. City, V. D.; J. Connelly, Crete, G. A. D.; J. Graf, Tecumseh, G. C.; H. P. Smith, Columbus, G. G.; D. H. Wheeler, Plattsmouth, G. R.; J. S. Gibson, Omaha, G. T.; E. A. Richardson, Clarksville, G. G.; J. H. Miller, Peru, G. S.; Grand Trustees: J. W. Brant, Lincoln; A. P. Grant, Syracuse; A. C. Hull, Fremont, Supreme representative, D. H. Wheeler. State medical examiner, Dr. S. R. Conklin, Omaha. The fourth annual session of the Grand Lodge will be held at Seward, Neb.

We hear such a good one on John Hammond that we can't keep it, and yet scarce durst tell it. We'll risk it, however, and suit out of town a day or two. Somebody got into the boat the other day "to cross the ferry," and when in mid water, the current was so swift that the boat went down stream. "Ding bang went down," said John, "why the bang don't you row across? Point up stream." Finally, John was so concentratedly interested in the matter that when the passenger did at last come to land, John jumped in and pulled for the opposite shore. No sooner had he got into the current than the boat began to observe the laws of force which require that the majority shall do the principal part of the rowing, and down stream she was going. All the on-gazers remained quiet. Not a word was whispered; not a ripple of laughter floated to John over the surging waves of the forceful Loup, but everything was as serene as the sunny April heavens above them, excepting the fat man in the boat who was rowing and puffing, and puffing and rowing for dear life to head that ding-banged boat up stream and get across, but all to no purpose, and the Captain, in despair, jumped out and swam to shore. Seeing the unruddered countenances on the bank, he shouted, as only John can shout:—"Ding bang you, why don't you laugh?"

There appeared in last week's JOURNAL, published by request, an article headed "A wful," concerning what was to take place on the earth, between 1880 and 1887, according to the notions of a professed astrologist. It was published by us, not as a matter of news, not as a matter in which we believed, but as giving the whole of an article that had been quoted by our exchanges, here and there, by pieces, without connection and as entitled to some credence. At this time in the life of the JOURNAL, it ought not to be necessary to say that its editor is not a believer in astrology, witchcraft, conjuration, or any such thing. We had often been asked, "What about this awful prediction concerning the perihelion?" and we concluded to simply give the whole of it, as we found it in circulation. But it is wonderful, isn't it, that in this age of the world, and in this country of schools, and books, and teachers; in this age of science when the atoms of things are almost seen and the planets in their awful rounds are weighed and measured, that there should be such a fearful amount of superstition; such believing, without sufficient evidence; such acquiescence in the mere dictum of a sensational writer? We see that men are born, that they grow and work, that they have their day, that they weaken and die, their bodies returning to the elements—there is no superstition about this, and it is true religion and true philosophy to recognize these general facts and make every act, possible and desirable as nearly perfect as they can. Thus we shall be doing the highest duty known to the human mind, and, we submit that belief should rest upon evidence alone, and belief in the most important concerns of life should always be preceded by evidence that excludes all doubt.

Attention, Farmers. I will close out my stock of implements at cost price. Call and examine, and learn prices of Gorham seeders; also harrows, plows, cultivators, wagon springs, buggy tops, &c. My goods are equal in quality to any on the market, and it will pay you to buy while you can get them cheap. Wm. Beckman.
