What Next?

The last half century has been particularly noted as an era of unrivalled improvements, a time in which the toiling and contriving race of men has taken long strides forward in making the forces of nature subservient to the needs of civilized man.

On every hand are seen evidences of this spirit of progress, the mere enumeration of which would fill a column of the JOURNAL.

No longer do we see farm hands by the dozen go forth to the meadows, and, side by side, stoop to the work of felling the grass; neither the boys coming after with the hand-rake.

Now, the team which formerly was idle, furnishes the main motive power through all the harvest of the grain and hay, thus doing the former work of men.

If we had suddenly to go back to the ways of the days of our grandfathers (as sometimes when the supply of gas is cut off resort is had to the candle) we should realize in its fullness, the wonderful advance that has been made in everything pertaining to in-door and out-door work.

For instance, you wish to visit a dear friend who is sick a thousand miles away. You send a telegram, which speaks to him immediately that you will take the cars, and you reach him in three days, and the trip is made in a comfortable, close habitation, as it were, scarcely any more subject to the vicissitudes of the weather than your own home. It is safer to say that men can make ten times the speed they did fifty years ago, while in the communication of intelligence, from the old-fashioned, slow-going coach, or even the galloping messenger to the winged lightning, which flashes intelligence between continents as men talking across a dinner-table, is no comparison.

Formerly, our newspapers that gave the deaths of kings and accounts of the battles of Europe three to four weeks after the occurrence, were doing well, but now the morning daily, struck off at three o'clock which does not epitomize the main events, and give minute particulars of the startling occurrences of the preceding day, throughout christendom, lies unperused at the news stalls.

Living in the midst of growing wonders, it were indeed a wonder, if the active mind did not feel the suggestions of nature, and reach out after still further triumphs of human knowledge, and we are perhaps on the eve of a day of inventions at least equally in effect to any that have preceded.

A short time since was announced the telephone, then the electric railway, then the storage of electricity so that it could be transported and applied anywhere. Now it is thought that power may be transmitted by electricity, so that, for example, the force created by the falling of the waters of Niagara, or the tides of the ocean may be transmitted by electric cables to any distant point.

But, probably the most tangible and useful invention latest talked of is the heat-magazine of M. Carriere, whereby the heat of the sun, concentrated, by highly polished mirrors, upon thin plates of iridio-platinum, is held in reserve until needed.

A magazine one foot square will store heat enough to warm comfortably a large hall for an entire season.

If we had such an apparatus in general use these severely hot days, how short a time it would take to store enough of the extra heat to do all the work required of it the remainder of the year!

President Garfield.

The President was not so well Saturday evening, and many theories were indulged in as to the cause. It might have been produced by the ball or by the formation of another pus cavity, or the excessive heat may have caused an undue rise of temperature.

The official report of August 7th says the President passed another good day.

The wound is doing well in every respect. He has partaken of an adequate quantity of nourishment and has had several naps during the day. At 12:30 p. m. his pulse was 98, at 7 p. m. 102.

August 8th 12:30 a. m. The President is resting quietly and no more unfavorable symptoms.

So the fifth Sunday of the President's illness passes without any very alarming symptoms.

GEORGE and Dana Biglow, brothers, aged about 30 and 35 years, while engaged in sinking a well at their residence on the Big Sandy, in Holt county, this State, and while both were in the well which was about twenty-eight feet deep, Thursday of last week, the curbing gave way and sand and dirt tumbled in until the men were in sand up to their waists. The curbing saved them from being covered up and killed at once, and left an opening so that they could be conversed with. They made their wills and bade their wives and children an eternal farewell. Every effort was made to save them by digging an other well along side and tunnelling into the victims, but before they could be reached on Saturday, life had become extinct, and only their dead bodies were recovered.

WM. C. WOODWARD of Marselles Ill., has recently invented a wonderful musical instrument. It consists of a piano and organ combined in the same space as usually occupied by an upright piano. Either instrument can be played separately or both together. The change from one to the other is effected without a break in the music. The combined sound of the piano and organ is peculiar in effect, representing every instrument in a full orchestra. Both are played from the same key board.

PATRICK W. CROWE charged with being the inventor of the infernal machines that were recently shipped to England was arrested at Peoria, Ill., on the 1st, by the United States Marshal on orders from Wayne MacVeagh, the United States attorney-general. His arrest created the greatest excitement. Crowe was taken on the night of the 1st to Chicago, to undergo his preliminary examination. Subsequent reports say Crowe was not arrested. It is a big joke played on the reporters.

An Immense Suit!

The County Commissioners of Antelope county, Nebraska, are about to institute suit against the Chicago, Burlington & Quincy railway company for back taxes upon their land in that county. The company owns 90,000 acres there, derived through the B. & M. the unpaid taxes upon which amount to \$47,000! These are gigantic figures and unless the C. & B. liquidates the indebtedness, Antelope county will seize the land.—Omaha Times.

A MAN undertook to cross the track the other day at Fremont, just in front of a freight train on the U. P. His effort proved a partial success so far as himself and horses were concerned, but the engine struck the wagon and literally smashed it into small pieces, throwing the driver from his seat to the ground, cutting his head and badly bruising him. The horses became frightened, ran away and were badly used up.

THE number of families evicted from their houses in Ireland during three months ending the last of June, was 1,065. This would include about 7,000 men, women and children, who have been turned out of homes. Five hundred and ninety-two of these families have been re-admitted as tenants and caretakers with no right of tenure, and are liable to be thrown out again at any moment and without notice.

PARNELL has been suspended in the Commons on the motion of Gladstone for offensive language and for disregarding the authority of the chair. The motion prevailed to suspend him for the remainder of the sitting. Parnell, when leaving, said: "I call the public to witness that you, Mr. Speaker, have refused us the freedom of discussion." Gladstone said he had never before heard such words used in the House.

A SAD picture of desolation and misery was witnessed the other day at Omaha. A young and handsome girl told her tale of misplaced confidence, and the base deception of a male scoundrel; she was seeking a home in the county poor-house to shield her relations from whatever shame attached to her offense.

ROBT. HALTINGER of Chicago was found dead in his bed the other morning. Later investigation proved that he had taken a dose of morphine and administered the same to his sweethearts, Kate Hill, who it is believed will not live.

A FARMER in Filmore county expects to receive \$2,000 from his crops on a quarter section this year, and has good proof to show that his expectations are justly founded.
