THE calm and prudent discussion of the right to give to woman the ballot is gaining ground in this state rapidly. The feeling among the women of the state is not confined to any political class, as intelligent ladies on the democratic side are becoming strongly in favor of woman's suffrage. They begin to realize the meaning of a free government, and the injustice they have suffered by being deprived of any participation in the suffrage necessary to keep it in honest operation. Another mark of progress upon this subject is manifest in the fact that in many counties permanent organizations have already been made, and means adopted for disseminating correct information among the citiof commission for handling corn and | zens upon the subject of woman

Quite exciting times prevailed in reland last week. Almost continual collisions occur between the police and populace. The landlords sought redress by procuring writs and farmers in Mayo county to the number of 700, banded together to resist the writs, which they did successfully by wounding a large number of officers who were finally compelled to retire, and fears are felt by the government as to the effect of the immediate future enforcement of the land laws. The farmers are flocking into the land court in increasing numbers. One thousand five hundred cases were entered on Thursday of last week; 1,600 applied Friday and 3.600 on Saturday.

THE Lincoln Journal proves, from the U. S. cencus report for 1880, that the settled portions of Nebraska are ahead of other states for corn. MULTICHARGE CANNON. READING, Pa., Oct. 24 .-- A Lyman laskell multicharge cannon was successfully cast to-day in the presence of a large number of interested spectators. The metal was poured into the molds in six minutes. It will require two weeks to cool. Along the bore will be four pockets, in each of which a charge of powder will be placed to accelerate the speed of the ball after it leaves the chamber of the gun. It is claimed that a ball thrown from this gun will pass through two feet of solid wrought iron. The charge of powder will be 100 pounds, and the weight of the projectile 150 pounds.
