A & N. Depot.

OVER THE WAY.

No fresh young beauty, laughing eyes,
Who reckons lovers by the score,
But just a sweet old maid who died
When I was yet in pinafore.

UNDER THE ICE.

All through the long, pleasant summer
on the Williams Farm, the two girls
had been rivals—almost to the death.
Society has restrained well for years
of us that it is so! For, on the last evening
of her stay at the farm-house, the
heart of Kate Jarvis was full of a cold
and deadly anger, as she reviewed the
events of the campaign, and knew that
it had failed.

ARCtic BALLOONING.

Capt. George E. Tyson, who has had
thirty years' experience of Arctic life,
recently addressed a letter to the editor
of the New York Herald, in which he
said that, having seen the working of
ice in summer and winter, he was
of the opinion that it is utterly impos-
sible for any vessel to reach the North
Pole and live to return, and that sledges
journeys from all latitudes yet obtained
by ships are impracticable. Despite the
modern inventions in steam and the un-
questioned skill of our present naviga-
tors, he says, so far does very little
more poleward than the navigators
nearly 300 years ago accomplished in
their little shallops. The obstacles in
the way to success are natural ones. No
matter in what meridian navigators sail,
about latitude 80 degrees is met that
barrier of ice which no navigator has
been able to penetrate very far.

What a Cabbage Did.

Nothing is so readily collected, not
even wedding fees, as a crowd. The
smallest point is sufficient for others to
crystallize around. An amusing illus-
tration of this fact is reported by the
San Francisco Evening Post. Two gentle-
men were looking out of the window of a
house on Market street, when they saw a
cabbage roll off a market wagon that
was passing.
Instantly, more than a dozen well-
dressed and apparently sane persons be-
gan yelling after the wagon as though
the vegetable had been a gold watch, or
a thousand-dollar bill.
The driver stopped about half a square
off, looked back at the cabbage, yawned
and drove on.
What an absurd fuss people in the
street make over trivial occurrences! One
of the gentlemen said: "Now, I'll bet
I'll take the bet." "Are you ready?"
"I'll give the word." "Give the word."
"Now eleven-thirty. Go!"
The proposer of the wager led his
friend to the window, threw up the sash,
and taking a cane pointed earnestly at
the mid-covered cabbage with a terri-
fied expression.
Presently a hack-driver noticed the
action and began to stare at the vegeta-
ble from the curbstone; then a boot-
black stopped, then a bill-poster, a mes-
senger-boy and a merchant.
"What's the matter?" inquired a
German, approaching the innocent base
of his national dish.
"Stand back!" shouted the gentleman at
the window.
At his horror-stricken tones the crowd
fell back precipitately and formed a
dense circle around the innocent cabbage.
Hundreds came running up, and the
excitement increased rapidly.
"Look out there!" frantically screamed
the better, waving his cane. "Take that
dog away from the cabbage!"
Several stones were thrown at a cur
that was sniffing at the cabbage.
"Take care!" said a car-driver to a
policeman, who was shouldering his way
through the mass of infuriated ladies at
machine, nitro glycerine or something
else."
Meanwhile the sidewalk was blocked,
the street became impassable. The two
gentlemen, who had been invited to the
window, and sat down. In a few moments
there appeared a man who had been sent as
a delegate to a meeting held outside.
"I should like to know, gentlemen,"
he said, "what the facts are."
"Why, what there is peculiar about
that cabbage is this: On Saturday last,
"Nothing in the world," was the soft
reply, "except that it seems to be sur-
rounded by persons who ought to be in
better business."
The Two-Headed Girl's Hotel Bill.
Miss Christine, the two-headed girl,
who serves at the hotel, has attracted
able attention from Dr. Fancost and
other prominent members of the medi-
cal fraternity, is at present a guest of
the Great Western Hotel, on Market
street, about 100 feet from the corner
parallel and 20th degree east longitude;
Germany at Franz Josef Island; Amer-
ica Cape Union, in about 82 degrees 20
minutes and 60 degrees 10 minutes west
longitude; and Alaska at Blagovest Is-
lands or New Siberia, near where the
Jeannette was lost. The necessary
preparations having been made, the
balloons will start on a single day, and
will probably be within the vicinity of
the pole, the distance to which from
Cape Union being only about 480
miles, from Spitzbergen 500 miles, from
Franz Josef Land about 180 miles, and
from New Siberia about 80 miles.
The pole having been reached, the
return, the Captain thinks, would be an
easy matter. The men would be fresh
and unweakened and have the entire win-
ter to work in. Their provisions would
be ample and everything would be in as
good condition as when they started, and
the Arctic current, against which the
navigators who go by vessel are always
hardly to contend, would be continu-
ally carrying them southward without
any effort of their own. Even should
they happen to be caught in the polar
whirl, the men would be able to swim
quietly settle themselves down on some
strong floe of ice, build their snow-huts
and secure all the game possible before
the Arctic night overtakes them. During
the winter the polar current would
carry them southward, and they could
without difficulty escape in the spring.
Nervous Americans.
Why are Americans more nervous
than people of other nationalities? It
is stated as a fact that Englishmen and
Germans become so in a few years after
residing among us. Their children have
not the phlegmatic temperament of their
parents. There is a marked difference
between the Americans who descended
from the English and Englishmen at
home. We have taken on a national
type which differs as distinctly from
the English as does the French from the
French. In the crowd that surges along
the street of any city it is not difficult
to distinguish the American countenance,
and it is never mistaken for that of any
other nationality. Instead of being not-
ing, it is said that the nervous temper-
ment predominating in America is in-
creasing, and that we are being sep-
arated further and further from the En-
glish, making a national temperament
and type unlike any other that has ever
existed. Physiologists who make a
study of race and nation-building re-
gard this as a corrective to some extent
of this, and a most fortunate thing for
our future national character. But the ten-
dency of life here joins to that of el-
deness, to make new as well as old resi-
dents nervous. The immigrant who
only hoped to live in reasonable comfort
sees fortune within his grasp, and enters
the race with an eagerness his ancestors
never knew. He sees wealth accumulate
and disappear in a day, and the muta-
tions of fortune, the prizes and disap-
pointments, contribute to divert him
from his inherited calmness. But more
than this, he has a national temperament
well understood that assists in convert-
ing phlegmatic men into nervous ones.
It is well known that the same amount
of any kind of intoxicating liquor has
a very different effect upon the Amer-
ican person here and in Europe. So that
it would be impossible to grow the typical
Englishman in this climate if he is
aware of it. It is said that the Aus-
tralian already begins to develop a com-
mon type of face and temperament as
unlike the English as is the American.
—Indianapolis Journal.

Why He Left.

A Woodward avenue business man
was advertised for a coachman and
an application yesterday from a man
who seemed to fill the bill exactly, but
the fact that he was out of a place caused
the citizen to ask:
"Where you discharged from your last
place?"
"Oh, no, sir—quit of my own accord."
"Anything wrong?"
"There was. The place was very
pleasant, the pay good, and I came
away without a hard word. But the
gentleman was a bit reckless, sir."
"How reckless?"
"Why, he wouldn't be vaccinated,
and he insisted on coming to the bar
every day and exposing me to danger.
I spoke to him several times about it,
but he seemed so obstinate and reckless
that I don't like to say his name. He
job. Ah, sir, but no one knows how in-
curable some of these high-toned peo-
ple are! They'd even lay a baby which
had eyes and a tongue right into the
coaches and bed-rooms, and then expect
him to buy his own medicines and
do his whooping at night after every-
body was asleep!" —Detroit Free
Press.

For nose-bleeding, bathe the face and neck with cold water.

"I should like to know, gentlemen,"
he said, "what the facts are."
"Why, what there is peculiar about
that cabbage is this: On Saturday last,
"Nothing in the world," was the soft
reply, "except that it seems to be sur-
rounded by persons who ought to be in
better business."
The Two-Headed Girl's Hotel Bill.
Miss Christine, the two-headed girl,
who serves at the hotel, has attracted
able attention from Dr. Fancost and
other prominent members of the medi-
cal fraternity, is at present a guest of
the Great Western Hotel, on Market
street, about 100 feet from the corner
parallel and 20th degree east longitude;
Germany at Franz Josef Island; Amer-
ica Cape Union, in about 82 degrees 20
minutes and 60 degrees 10 minutes west
longitude; and Alaska at Blagovest Is-
lands or New Siberia, near where the
Jeannette was lost. The necessary
preparations having been made, the
balloons will start on a single day, and
