—A. W. Clark tells us of a brother farmer who is trying an experiment this season for wheat, sowing nine barrels of salt to twenty acres, leaving portions of the same ground without the addition of salt. He claims that there is "not a bug," and that the sated land will yield 6 or 7 bu. more to the acre than the other, similarly treated.

—Patriotic people to the number of three hundred assembled at the school-house in district No. 27, and celebrated the Fourth in becoming style. Mr. Fred. Wikin, the teacher, delivered the address, and the festivities continued till midnight. The house was decorated with flags, and everybody was gay, even the older folks had an amusing race about sundown.

—Our exchange are all making suggestions as to the proper thing to do when you see a tornado coming. Dave Brumbaugh, who wades the river when he comes to town instead of going round by the bridge, says he believes that if a man can get his feet squarely planted in the quicksand in the Loup, he will stick, tornado or no tornado.—Sherman County Times.

All who heard the oration unite in pronouncing it a brilliant and most practical speech; one that the people will do well to heed, and profit thereby."

—Those who think to make a hog-tight fence exclusively of wire had better take a second thought about it. The experience of some of his neighbors afar off may teach him. Henry Rickert has a good fence for cattle and hogs, a wire within three inches of the ground, three, six-inch fence boards, then another wire, with posts every eight feet.

CENTRAL BAPTIST CHURCH. The original Tennessee Jubilee and Plantation Singers gave one of their concerts at the Central Baptist Church, April 14, 1882, and gave entire satisfaction to a large audience. They attempt nothing artistic, but to reproduce the simple melodies of the plantation, and this they do exceedingly well.

E. O. TAYLOR, Pastor, Chicago.

—Beware of all kinds of traveling tricksters that you don't know. Don't sign papers of any kind for them. Buy of reliable home dealers. There are too many tricksters, scamps and swindlers peddling machinery, lightning-rods, tracts, &c., and it is best to have nothing at all to do with them. Platte county men, notwithstanding the warning paragraphs of her newspapers, have lost thousands of dollars by these gentry.

—D. L. Bruen was in the city Friday, of course on business (he is one of the business farmers of Platte county), and says that he never in all his life saw corn grow any better than it is doing just now—it is fairly jumping along. In speaking on farm matters, he gave a very decided opinion in favor of fall plowing, for corn as well as small grain, and says he would fall-plow every acre when he had the time and the ground was moist enough.

—Mrs. Margaret W. Campbell will deliver a lecture upon the proposed amendment to the State Constitution, in the Opera House to-morrow (Thursday) evening, beginning at 8 o'clock. She is reported as an able advocate of impartial suffrage, and is sent out by the American Woman's Suffrage Association. The lecture is free, and everybody is invited to come out and hear a woman give reasons why women should be allowed to vote.

—As the result of the work of the "temperance" advocates in Iowa may be interesting to Nebraska readers, in more ways than one, we give the amendment as voted upon and carried. Of course this action will strengthen the confidence of the prohibitionists in contiguous states, and another strong effort may be looked for: "No person shall manufacture for sale, or sell, or keep for sale, as a beverage, any intoxicating liquors whatever, including ale, wine and beer. The general assembly shall by law prescribe regulations for the enforcement of the prohibition herein contained, and shall provide suitable penalties for the violation of the provisions hereof."

—The enterprising business men of Schuyler are not slow to see any advantages that may accrue to their town by the establishment of far-reaching ventures. Recently a committee visited this city with a view to ascertaining facts with reference to pork-packing, and the Sun makes these, among other, remarks on the situation: "The Columbus packing company was organized last fall. The capital stock is \$50,000. Work on the buildings was begun in October and packing began about the middle of December and continued until March. In that time between six and seven thousand hogs were packed. Arrangements are now being made to increase that number during the coming season to twenty-five thousand head. The packing house has been a great help to the business interests of Columbus. The establishment could pay a price for hogs most shippers could not meet and this attracted farmers from a great distance. Colfax county contributed liberally to the Columbus packing house supply last winter and unless a similar institution is started here the contributions will be on a still more liberal scale another season. But a town meeting or a ward caucus won't start a packing house. Whenever a few men of capital and energy will take hold of the enterprise it will move and not till then. Resolutions and salt barrel oratory won't help it. We have enough of capital and enough energy in Schuyler to set the institution right on its feet if the men possessing these requisites will but come to the front, and at this writing we have every reason to believe that they will."

—We were much surprised at the announcement of the death of Martha Kennedy, wife of Martin S. Kennedy, of Cadiz, Ohio, on the 3d of July, '82. But a short time since we enjoyed her society and hospitality at her own home, when she was in the very best of health and expected to live long and happily. She was suddenly and unexpectedly stricken down by spinal disease. She was an unexceptionable woman and must receive her reward.

—A number of members of the Alliance (none but actual operative farmers can be members), will be a little surprised at the resolutions adopted at the county alliance. Already different constructions are being placed upon the resolutions, and to some ardent republicans (and perhaps democrats) an explanation will be in order. Do they mean that former parties are to be abandoned, and all former political loves buried in the alliance? Do they mean that the alliance in this county and generally is to be a separate, distinct political organization, membership in which would be exclusive of and inconsistent with membership in any other political organization? If so, we assure the gentlemen who voted for those resolutions that there are members of their organization, as firmly fixed in the faith of their general principles as any, who will not follow such leading.

LOYALTY. Cal., June 28, '82. EDITOR JOURNAL.—Please allow me to correct a few of the mistakes that occurred in my letter as printed in the JOURNAL of the 21st.

In the first place there are no "tulip beds" here, but plenty of tulips, a kind of worthless flag or rush. But the most astounding assertion is that the red clover has a stately blue blossom and the root is used as food! What I referred to was the wild potato growing here, and a portion of that clause was left out entirely. Then, again, it was to the lady of the manor that I recommended my hungry friends, not to the lord. While my humble suggestion in regard to the old school of etiquette was directed to the new school, not to the men.

The fault was doubtless due to my careless writing. Yours truly, SUSIE M. WEST.

As to the Small-Pox. The inmates of the hospital were five grown-up people, six sisters and five children, besides those taken sick. The well have been removed to a small house at the rear of the hospital. The names of the sick so far, are Willie Boyle, Geo. McAnany, Rudolph Caboska, Francis Peral, Willie Conway, Lena Stanton, Edie Boyle and one of the sisters. The deaths have been Edie Boyle, Wednesday, July 5th, and Willie Conway, July 11th, 8:30.

To the JOURNAL it looks as though there had been some strange proceedings going on. We are credibly informed that the church authorities at the Monastery, within a few feet of the hospital post-house, contrary to the orders of the Mayor, had invited members to come there at 2 o'clock in the morning, and had sent word to their Polish adherents to come into church; also that during one of the public days of the church not long since, two of the inmates of the hospital, children, were put into the procession and mixed with the crowd. While it is true that these two children were not afflicted with the small-pox, it is yet true that, according to all our American ideas of the contagious character of this disease, whoever allowed this thing is severely reprehensible. It strikes us that the Father Superior at the Monastery has been dealt with all too leniently in this matter, being allowed to go back and forth, in hospital and out, not altogether just as he pleased, but pretty much as he would, believing that the small-pox was not a particularly dangerous disease, and that there was no call for the civil authorities being so strict against the probability of its spread.

We must say to all concerned that this people will neither sanction nor tolerate any such work, and the sooner it ceases the better for all concerned. The Sisters are deserving of all praise for their faithful, intelligent and kindly ministrations to the afflicted.

Supreme Court. We copy from Northwestern Law Reporter of July 1st, which will be of more or less interest to our readers.

In the case of Gerhold v. Wynn, from Platte county, the court held that "a man formally married to a woman who, because of her insanity, which he discovered soon afterwards, was incapable of entering into the marriage contract, and continuing thereafter voluntarily to co-habit with her as his wife, is under a legal obligation to support her; and, having furnished such support, he cannot, upon a decree of separation on the ground of the invalidity of the marriage, make the same a charge against her separate estate.

In Friedhoff & Co. v. Smith,—"a parol lease for two years, although void by the statute, yet if the tenant enter into possession may be valid as a lease for one year."

Care. No matter how good the season, unless the crops are harvested and cared for the labor is wholly or partially thrown away. Improper stacking of grain and hay, as well as improper shelter after threshing have been prolific causes of loss, here as elsewhere.

Everybody recognizes the necessity of care in stacking grain, but not so readily as to hay, and now that the hay crop is becoming valuable for shipment, to the amount of tens of thousands of dollars to each county in the Platte valley, it is well to recognize the fact that care is money. The following suggestions from the Schuyler Sun we know to be timely in more counties than Colfax:

"As the season for putting up hay approaches, there are some suggestions that become timely. The proportion of hay that is spoiled each year through ignorance or neglect, is astonishing. One of the principal causes of hay spoiling is neglect in stacking. The custom of sweeping up the hay for a base prevails to a considerable extent, and when this is done the bottom of the stack can be relied upon to spoil if left standing any great length of time. Mr. Clarkson, who has had occasion to investigate this subject extensively, says that in order to keep the hay in good, saleable condition until Spring, the stack should be built on the bottom, solidly and carefully, and not less than sixteen feet high. Too much care cannot be taken in topping out the stack so that it will shed water properly. There are many other who expect to realize a good profit from the hay crop, and upon such these suggestions should not be lost, as those buying to bale and ship cannot use hay that is in the least damaged. Last winter when hay was high, the damaged portion of the stack could be disposed of to good advantage, but in ordinary season it would be a total loss."

The Fourth at Waterville. Quite a crowd of people assembled in Mr. Nicholson's grove at Waterville, on the fourth. They came from all directions, far and near. Mr. J. Ferree brought the glorious old flag of the stars and stripes poised high upon his wagon, and quite a number of vehicles well loaded with people and big baskets followed him from the west, while others came from the east, north, and south.

Rev. A. J. Wright from St. Edwards had been requested to address the meeting, which he did in his usual earnest and feeling way. He was followed by Rev. Mr. Osborn from Massachusetts, a brother to our fellow-citizen Osborn. He said a good deal in praise of Nebraska, of its splendid looking crops, as well as of the people composing the crowd, among whom he did not see nor smell any whiskey.

Rev. A. Henrich being called upon responded in a few remarks. It being a Sunday School picnic as well as Fourth of July celebration, he maintained that the Sunday School work had a good deal to do with supporting and preserving our liberties for future generations. Some little amusement was produced by the rehearsal of an incident of a bunch of sheep running after a big white puddle. He advised the people not to run after a puddle.

Then followed the discussion of the substantial piled in great abundance on a long table, as well as spread on the grass, where a number of families dined by themselves.

For the amusement of young and old a swing had been provided and some youngsters tried their best to get hold of the silver dollar stuck on top of the gressed pole, and one little fellow finally succeeded and got it, under the cheers of the crowd. Altogether it was an occasion of enjoyment and pleasure, and the Waterville people deserve credit for the arrangements made and provided. VIDZO.
