A Card.

A. MILLETT.

—Adolph Schadd recently held "close communion" with a rattlesnake while feeding hay to a horse at Dr. Heintz's stable. Adolph was scared, as he wouldn't be, but it wasn't a running scare, and he said that snake instanter, the little panic that he was in lending vigor to the blows. The "danger signals" carried at the end of his snake-ship's tail numbered four.

—A burglary occurred Sunday on 11th street. The bakery of H. —The Halladay wind mill was awarded first premium at the late Platte county fair. Messrs. Krause & Lubker had two of these mills on exhibition and were saved the trouble of taking them back to their warehouse, as they sold both of them as soon as premiums were awarded, on the fair grounds, one to Mr. C. E. Steele for his dairy in Columbus, and the other to Mr. David L. Bruen of Stearns Prairie. Both these gentlemen were satisfied with the decision of the judges of the fair, and bought the mill that took the first premium. 1

Her new departure in this line will be on a larger scale than heretofore at this place, having bought the good-will and furniture and started business in a large boarding house. The best wishes of her many friends here go with her. She deserves to succeed and no doubt will. Her sister, Mrs. Phil Schroeder, succeeds to the management of the boarding house in this city.

—The provident farmer will now look after his potatoes and either sell the surplus or store away for a better market in the spring; haul out the manure; do the fall plowing; husk the corn and put it into good cribs before the snow flies, and in the meantime see that the hogs and cattle that are to be sold to the butcher are put upon liberal allowance of feed, and have constant access to good, pure water; besides, he will not allow the milk cows to fall or partially fail for want of a little encouraging feed—because the provident farmer knows that it pays to look after things of this sort, and give close attention to details.

COLUMBUS, Sept. 28, '82.
EDITOR JOURNAL:—I notice in your issue of the 27th an account of the meeting held at the Congregational church, in which you say you were informed that myself, among others, was called upon to express my views, and that I declared myself in favor of the amendment.

I wish to say through the columns of your paper that I am not now, never have been and unless more convincing arguments can be produced in favor of such proposed amendment than I have yet heard, I never will be in favor of female suffrage.

Camp Meeting.
The Seventh Day Adventists of Nebraska closed their annual camp meeting and state conference at Heintz's grove last week, (Wednesday).

Elder Cudney reports a successful and pleasant meeting, beyond the most sanguine expectations.

At least 500 persons were on the ground, five large tents and some fifty small ones being in use and picturesquely dotted the grove.

The attendance from the city and surrounding country was quite large, it being estimated that on Sunday, the 24th inst., over one thousand persons were present.

The business of the conference was harmoniously and agreeably transacted to the satisfaction of all concerned, and over \$3,000 raised for the advancement of the cause in the state.

—G. R. Nunnally, well known in these parts by the sobriquet of "Antelope Dick," has had one of his "crank" spells at St. Joseph, Mo., where he has lately been employed on an afternoon paper as city editor. The Herald, in a lengthy report of the affair says "his conduct convinced all who saw him that he had been drugged. A strange hallucination seized him, and in this state of temporary mental aberration or derangement he went to the Missouri river and deliberately threw himself into the treacherous stream." Yes, in those actions it is easy to recognize "Dick," but he wouldn't have drowned himself. The "drug" was, more than likely, a very poor article of whiskey. He had anticipated the whole business, autopsy and all in his obituary written by himself. Here it is:

DIED.—The great newspaper and polish Bohemian is dead. An autopsy will be held to-morrow. It was certainly a true heart it was certainly at the heart of this peculiar and eccentric man. St. Louis and eastern papers please copy the death of the renowned J. Wilkes Boobler.

Sparks from Creston.
Mr. Grundy, the M. E. preacher who is on this circuit again, proposes to organize a vocal and instrumental music class at Leigh. That will be an excellent opportunity for our young men and women to learn the rudiments of music.

"The Western Wave," Creston's wide-awake newspaper, made its second appearance last week.

A short discussion on woman's suffrage took place at the Alliance on Friday last, in which there were but few facts shown on either side.

The poor discussion probably could be attributed to the non-preparation of the disputants. Every Alliance and Literary Society in the state should debate the question before they make the final leap into the unforeseen abyss. It is the writer's opinion, if men will cast away their prejudice and let justice prevail, that the suffragists will triumph at the coming election. However, it would be well to remember, on election day, the old maxim, viz: that "taxation without representation is tyranny."

It is to be hoped that persons of ordinary intelligence will not obey such loquacious fellows as Rosewater, without considering their authority. If Mr. Rosewater would be so kind as to furnish us with his authority for asserting that "woman suffrage is demoralizing Wyoming," that "Ex-Gov. Hoyt is in a trance," and that "the leading journalists of Wyoming are asleep and do not study the degrading effects of woman suffrage," etc., then we would probably have some faith in his assertions, but not until then. In a late issue of the Bee was an article calculated to lead us to believe that Wyoming's honorable men and women know nothing of the effects of universal suffrage in their territory, while he (Hon. Rosewater) appears to be a modern prophet and not only able to predict Nebraska's future career, if the suffrage amendment is adopted, but also seems to understand the more foreign affairs of Wyoming better than her own legislators.

If he (Rosewater) is such an intelligent man it would be well for John B.—I to give him a commission in the army, as he would know more about the Egyptian army than Arabi Pasha himself. We doubt, very much, his being in Wyoming at all. If he ever was, we think, it must have been in some fanciful mining-camp. Mr. Rosewater will have to produce stronger arguments, than those included in the Bee, in order to make any converts out of intelligent people. Meanwhile, Mr. R., pass around your whitewash again.
Yours Reporter.

Important to Travelers.
A great many people are under the impression, when about to travel East or West, that it is cheaper to purchase tickets to the nearest important city or town and thence to their destination.

Inquiry of any ticket agent of the Burlington routes will prove the rates quoted to be the lowest to all points via this line, as they are invariably based on the most direct routes.

Daily fast express trains are now run between Denver and Chicago and Kansas City and Denver, and by a recent arrangement with connecting lines, through cars are run in connection with the Chicago express via Peoria to Indianapolis without change.

Through tickets, quick time, baggage checked to destination, elegant Pullman Palace cars and day coaches are but a few of the many attractions that tend to make the Burlington Route the favorite with the traveling public. 23-1

Preparing Seed Corn.
Thomas M. Wilson, of Bismarck precinct, gives the following as his plan of preparing seed corn, to prevent its being taken by the gophers, squirrels and other animals.

He gathers his corn for seed when it is in the dough, and carefully dries it a few days in the shade, then smokes it with grass or other substance that will produce a dense smoke. The drying should continue until the cob shows hollow spaces, a week or more. The smoking if continued will be sufficient if continued three or four days, during the daytime. No blaze should be allowed to heat the corn. It will become so impregnated with smoke that nothing will disturb it. The vitality is not in the least impaired. He has tried this plan two years, (1881 and '82) with success, while in 1880 he did not follow this method and his corn was badly taken.
