The last big sensation in Baltimore, Md., is the fact that a wealthy husband leaves his wife who is tainted with negro blood; he is about commencing a suit for a divorce to annul the marriage contract. No less than sixteen children were killed, and a number of others seriously injured, some of whom it is thought cannot live. The school is conducted by sisters of Notre Dame. The building is five stories high and has nine classrooms, seven for girls and two for boys. Over fifty children were precipitated to the floor by the giving way of the ballusters.

The record of the state senate on the bill introduced in that body by the railroad committee is briefly as follows: The bill was passed,—27 to 3, and 3 absent. Brown, of Lancaster, explained that he thought the bill was the best that we could get, so voted yes. Butler explained that he had estimated the amount of freight transported over the railroads and believed this bill would save the people \$7,000,000 or \$8,000,000 a year. Conner and Kinkaid said they would hand in explanations in writing. Sang explained that he believed the bill was unconstitutional and unjust, and therefore voted no. Shoehet explained that he voted for the bill on the same principle that Christ was crucified on. The Jews cried cruelly him! The people are crying for a railroad bill, and he voted for it for that reason.

PETER COOPER'S 92d birthday was celebrated on the 12th inst. It may serve to illustrate the advance of civilization to read what is said of him: When he was born New York had only 27,000 inhabitants. He remembered Washington's funeral passing through New York and hearing his mother speak of a chevron de frise erected at what is now Duane street to keep off the Indians. He was in Albany when Commodore Perry passed through, after his famous victory on Lake Erie in the year of 1812, and remembered the triumphal arches erected in his honor. Soon afterward he made the trip from Albany to New York on Robert Fulton's steamboat, the Clermont, then the "wonder of the age." He had previously had business relations with Fulton, both being interested in a scheme of Mr. Cooper's devising to propel ferryboats between New York and Brooklyn by means of compressed air.

Live Stock Notes. Horses should come through the winter in good flesh, and be in fine trim for the hard work of spring. Horses' feet need special care at this time of slush and mud. When the horses are brought in from work, they should be rubbed down, and the feet and legs thoroughly dried. If left covered with mud, the skin may soon become diseased, and cracked heels or foot fever may result. Look well to the horses' feet. Any cow that is out of condition will need the best of care now. Warm bran soup, with a little ginger, is excellent. If the animal is poor and weak, there is danger of feeding largely of rich food. Calves infested with vermin are known by their rough coats. A mixture of lard and sulphur rubbed along the back, with a dose of a teaspoonful of sulphur and molasses once or twice a week, is effective. Ewes should have dry and clean pens and yards, with a plenty of good, wholesome food. If the wool is falling, a few ounce doses of equal parts of sulphur and cream of tartar will relieve the irritation of the skin. Early lambs may be pushed forward with fresh cow's milk, given warm, a quarter of a pint to a meal. Do not run any ricks in over-feeding. Breeding sows should be separated from other pigs, and provided with warm, dry pens, bedded with leaves or straw. A rail fastened to the wall, eight inches from the floor, will prevent the young pigs from being crushed. It is well to feed the sow some raw lipped oil a few days before the pigs are born.—Agriculturist for March.
