THE HORSE AND THE GOOSE.

In summer, when the grass is green and the sun is shining, a horse and a goose are seen together in a field. The horse is good-natured and somewhat fat. He is on a tract of his own property, and the goose is on a tract of his own property.

"Tell me, poor horse, how can you be so fat and so good-natured? Do you really get the grass and the sun?"

"I can afford my wages and sweep up after you and your kind. You are fat and good-natured because you are on a tract of your own property."

"The goose, poor goose, how can you be so thin and so good-natured? Do you really get the grass and the sun?"

"I can afford my wages and sweep up after you and your kind. You are thin and good-natured because you are on a tract of your own property."

THE HORRORS OF LEPROSY.

Heart-rending scenes in the New Brunswick Lazaretto.—Imprisoned for life and awaiting death.

The eight hundred and thirty-two leprosy cases in New Brunswick are not surpassed in horror by those common in the islands where the contagion is believed to have originated. Half a century ago a man named Gardner, a Scotchman and a resident of the town of Miramichi, was a fair-colored man on his wife's forehead. Another day he was seen with a red spot on his forehead. The wife, who was a fair-colored woman, was also seen with a red spot on her forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The second case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The third case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The fourth case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The fifth case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The sixth case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The seventh case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The eighth case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The ninth case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

The tenth case. The victim was a fair-colored man, living seven miles from Miramichi. Of French extraction, he was in no way related to the first case. He was a fair-colored man, and he was seen with a red spot on his forehead. The doctor, who was a fair-colored man, was also seen with a red spot on his forehead.

OSCAR'S WILSON'S BIRD.

The London press received the great news of the death of Oscar Wilde on his return from America with honors and a pension. The London press received the great news of the death of Oscar Wilde on his return from America with honors and a pension.

During the recent transit this observation was repeated, with results not precisely the same, yet perfectly accordant with those obtained in 1874, and even to the present day. The arc of light was not perfect, but broken near the middle, so that only two fine horns of light could be seen, extending from either cusp of the solar disk (that is, from the two corners, so to speak, where the outlines of the sun and Venus intersected).

From the St. James Gazette the following account is given of the death of Oscar Wilde. The London press received the great news of the death of Oscar Wilde on his return from America with honors and a pension.

Learn What Others Have Done.

An old French adage reads: "There is nothing new under the sun." It is true that some of us are spending time and money in devising new machines and processes as well as new compositions of matter, and we are doing so with a view to the improvement of the human race.

The material and preparation of the Florida Shell Heaps differ from those of other countries in that the shells are not broken up, but are used whole. The day elsewhere is mingled largely with broken shells and sand in the Florida shells almost pure clay is used, though at times vegetable fiber is present, which produces a cellular and porous structure, which the original makers have found to be the best for the use of an outside film of slip clay.

Application is made for a patent, and it is refused. In most cases a refusal of a patent is not a final decision. It is only a refusal to grant a patent for the time being. It is often possible to secure a patent for an invention which has been refused at first.

Statistics of Suicides. The statistics just made public of suicides in the United States during the month of March 1883 present some curious and interesting facts. During the month of March 1883, there were 142 suicides in the United States.

The Globe Court Calendar makes its appearance for the year with its usual interest. It is a book which contains the names of the judges of the Supreme Court, the names of the Justices of the Supreme Court, and the names of the Justices of the Supreme Court.

Among the items of news received respecting the recent transit of Venus, some which have little bearing, or none, on the question of the sun's distance, yet are full of interest to those who wish to learn something of the real condition of our planet, and of the world which has been sent up to us, perhaps, to regard Venus in transit more as an adjunct to our telescopic measuring instruments (micrometers, heliometers, and so forth).

The most important of these physical inquiries is that relating to the distance of Venus from the earth. It is a question which has been discussed for many years, and it is a question which has been discussed for many years.

That Wonderful Bee Story.

For several years a story about bees, attributed to Darwin, has been circulated by many papers. It is the story of a bee which was found in a jar of honey, and it was said that the bee had been in the jar for many years.

The story is so complimentary to the intelligence of bees that it is hard to believe that it is true. It is, however, exceedingly probable. Bees do not live to the age of patriarchs. In fact, they are very short-lived. According to most authorities, they live only a few days.

A Brother's Signature.

A man from a neighboring town wished one of our banks to take a list one short time ago. The directors said they would cash the note if his brother would endorse it. The next day a man from the neighboring town came to the bank with a note for \$500, and he asked the directors to cash it.
