

Knife Handles.

First in importance for the making of cutlery is, of course, the steel for the blade. Next comes the handle, which forms the handle, which it is the principal purpose of this dispatch to consider.

The substances thus laid under various and the whole world is laid under contribution to supply them. The most common are pearl and tortoise shell, cast, beak, buffalo and all other kinds of horns, bone, fawn wood and various other substances, but by the name, ylonite, parkite, sponite, etc.

The cutting of these various materials into sizes and shapes suitable for use by the cutter is a very large business by itself, and with the purchase of the material, the cutter is a large outlay of capital.

When I first pitched tent in this town, one of the first things that I did was to buy a pair of trousers that were made in Murray Hill and fronted Fifth Avenue.

It is entirely natural that a horse should be kept in the most comfortable and convenient of the stable.

It is a source of no little discomfort to the animal while not at work, and may cause illness to the heated animal.

Especially in those cases where the horse is driven that the lungs are wrought up to an excited state, is liable, if placed in a cold stable, to contract pneumonia or bronchitis.

Of course the great railroad lights have set up their establishments here in force and numbers.

The Murray Hill (N. Y.) Aristocracy.

Murray Hill, as you know, named after one of the lucky ones who held on to his cabinet, rather than to the growing town reached and absorbed it.

It is not really a hill, only a little swell in the land. But it is the highest point on the east side of Manhattan that gets named to streets and brown-stone fronts.

And yet, low as it is, it is a height that hundreds of thousands of brave hearts have been broken to reach and hold.

How few, indeed, of tall their place here for any length of time, even after years of toiling, sweating and struggling to reach it.

Little Attention Required by the Horse.

It is right to call the horse a sagacious animal, though he is not so sagacious as he is generally supposed to be.

It is a source of no little discomfort to the animal while not at work, and may cause illness to the heated animal.

Especially in those cases where the horse is driven that the lungs are wrought up to an excited state, is liable, if placed in a cold stable, to contract pneumonia or bronchitis.

MISCELLANEOUS.

Recently they had an "Eisteddfod" in Chickerling Hall, New York, at which one man read an "Englynion" and another recited an "Ewyl" and another sang a "Cryddid Furfur" and another sang a "Hen wlad fy nhadau."

It is a source of no little discomfort to the animal while not at work, and may cause illness to the heated animal.
