involuntary discharges, impotency, general debility, nervousness, languor, confus-ion of ideas, palpitation of the heart, timidity, trembling, dimness of sight or giddiness, diseases of the head, throat, nose or skin, affections of the liver, lungs, stomach or bowels-those terrible disorders arising from solitary habits of youth, and secret practices more fatal to the victims than the songs of Syrens to the mariners of Ulysses, blighting their most radiant hopes or anticipations, rendering marriage

Young people are apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now who that understands this subject will deny that procreation is lost sooner by those falling into improper habits than by prudent? Besides being deprived of the pleasure of healthy off-springs, the most serious and destructive symptoms of both mind and body arise.

The system becomes deranged, the physical and mental functions weaken. Loss of procreative powers, nervous irritability, dyspepsia, palpitation of the heart, indigestion, constitutional debility, wasting of the frame, cough, consumption and death.
