The Fullerton schools have made a new departure by adopting the no-necess plan. This may prove advantageous in some respects, but, all things considered, the policy of such a radical departure from old-time customs would seem to be decidedly questionable.

Twenty years ago Mr. J. W. Brush planted a grove of forest trees on his farm in London precinct, and now the trees are large enough to furnish all the timber needed for a barn 30x40 feet, without buying a foot of lumber. What country can beat that record in the growth of timber?
Nemaha Granger.
Concerning a false report against one of our prominent citizens, we shall have more to say when we know the exact nature of the report, and the credence placed in it. Columbus politicians are generous to their opponents—especially after election, and they would not see a comrade abused unnecessarily.
We notice that J. N. Reynolds, formerly of this city, now a resident of Omaha, where he has been engaged extensively in the real estate business, has been mainly instrumental in forming a company for handling at wholesale various patent medicines which are considered staple. The Seward Blade advertises Howard J. Decker, successor to the Chicago Newspaper Advertising Agency, as a frank and dead-beat, for the good and sufficient reason that he refuses to pay for contracted advertising space which that paper has devoted to his interests. We believe as a rule newspapers would do well to have little to do with advertising agencies.
From Mr. Dan Condon, who was at Richmond last week, we learn of the ad hoc which that dread disease diphtheria has lately made in the family of Chas. Menster of that locality. It is one of the finest halls for dancing purposes in the state—the floor as smooth as glass and will be glazed by a new process which will make it very nice to dance on. Christmas chimes will soon be heard, and the children will expect a good time. Those who are most regular and attentive will appreciate the surprises that may await them. Let no one neglect the little ones who attend Sunday School, but may all prepare a memento of some kind for them.
At the Opera House Friday evening, November 22nd, 1884, Rose and Edmund Lisle, the eastern dramatic stars, supported by H. Cecil Arnold, the eminent character actor, will appear in the beautiful military play in four acts entitled, "Shiloh; or the Spy of Vicksburg." The entertainment will be given under the auspices of Baker Post No. 9, G. A. R. The Fremont papers speak highly of the entertainment at that place, since when the advance agent informs us the company has been greatly strengthened by a number of professional artists from the east. Turn out and give the G. A. R.'s a lift.

A runaway one day last week in the vicinity of the Cloth House caused eye witnesses to fairly hold their breath for fear of the safety of a woman whose life seemed imperiled. She was seated in a single conveyance and the horse attached was wildly dashing in the direction of the U. P. depot. As the first crossing was struck by the vehicle the shock threw the woman from her seat and pitched her head first between the hills at the feet of the horse. Those who witnessed the accident fully expected to find the woman badly injured if not killed, but were much relieved to see her regain her feet and make off after the runaway apparently uninjured.
The following timely and sensible advice about meeting the hard times upon the country we take from an exchange:
Be patient and forbearing with your debtors, honest and prompt as possible with your creditors, live at the smallest expense possible consistent with the health, comfort and happiness of yourself and family, quit talking about hard times, and they will soon disappear. It goes harder for those used to plenty to surrender their luxuries than for the poor to give up full fare, bow or coarse it may be, and live on half rations. Real hard times are when there is a lack of sustenance for the people, but cheap provisions are so plentiful and cheap that consuming them is the surest way to dispose of them.
In company with Superintendent Moncrief last Saturday reporter took a spin behind Mr. M.'s spanking lay roadster over the new road just completed from the city to the fair grounds. The work was done with the Lost Creek township grader in the hands of Lute Jewell and Geo. Maynard. When travelled sufficiently to reduce the unevenness of the surface it will make an excellent piece of road. On the same street, within the city limits, the ditching has been extended to a point far enough south to drain that portion of the city, which was certainly a much needed improvement and will be a benefit to the whole northwest portion of Columbus. The ditching work was done by private subscription of the property owners of the locality immediately benefited.
The Humphrey Independent has the following complimentary remarks to make of the congregation of Platte county teachers at that place on a call of the Teachers' Association at which the Columbus city schools were duly represented:
"We had always supposed until we came to Platte county that a school man was a young lady that was a sort of rigid, moonlight night, sentiment, etc., and we were surprised that the schools of the county, 'modes of discipline' and kindred subjects should be the chief subject of conversation at the evening. Humphrey, with its rural attractions, had the interest necessary to draw their minds from the all-absorbing theme of school work. Being rusty in modern school modes and appliances, we were as puzzled as the master's feet, drinking in words of learning and wisdom. Humphrey invites you to repeat the visit."
The Platte county Teachers Association will hold its monthly meeting at the Lost Creek school house, Friday evening, December 5th. It is the aim of the association to hold these meetings in different parts of the county, to give all our members and friends an opportunity to attend. In this way we hope to promote the cause of education. Come one and all, listen to our papers, and take a part in our discussions. These meetings are not only for the teachers, but for all those interested in the cause of education. Our program will be as follows: Paper—How to teach Geography, by Miss M. E. McGath. Select reading—Mr. O'Brien. Paper—The importance of the study of U. S. history in our public schools, by Mr. Fred Jewell. Declaration, by Miss Anna Bell Smith. Paper—The relation teachers should sustain to each other, by L. J. Cramer. Music.
The Democracy of Columbus had a great rejoicing Wednesday night last week over the result of the presidential election. The speech at the Opera House was made by Geo. L. Miller of the Omaha Herald, and was very well received by the democracy. The only part of his speech that might be called argumentative, referred to the doctrines of the centralization of the government, and to state rights. He denounced the theory of Hamilton and commented that of Jefferson, but did not expatiate largely upon the origin of the pretended right of nullification, secession, &c. It would be well, as the Doctor suggested, for young men to study the two theories of government, especially in the light of the facts of the last thirty years, and make up their minds whether this is a nation of people or a compact of states; whether a citizen of the United States has any rights that the states or the people of any state ought not to be bound to respect; whether the states have any rights that may be nullified and set at naught, at the pleasure of any state that may see fit to declare that they will no longer remain in the compact.
The Nance County Journal lends its endorsement to what this paper recently had to say of some freight charges on a car-load of apples shipped over the U. P. branch to Fullerton, transferred at this point from the B. & M., by quoting the article in full and commenting in the following forcible manner:
"Public carriers the railroad companies have no business to vent their spite on one another by planing the public; and when it is no doubt, this man could recover the full amount of over-charge, it could not be done without delay and expense. And it behooves our state legislature, at its coming session, to take measures to teach the railway companies that, while their rights are to be respected of all men, the people will not submit to highway robbery on the part of the roads. Right is just, and liberal compensation for the faithful performance of their contracts in the carrying business, but when they assume the character of public planners, it is time for the lawfully constituted powers that be to round up these corporations, comb them down, as it were, and establish the boundary lines of their pasture, making it a penal offense for them to forage beyond the prescribed limits."

Mr. Jas. Glynn left the city Friday last for Valparaiso, Indiana, where he goes to commence a course of study in the law college of that place with a view to fitting himself for the legal profession. The young man has been a resident of this city for several months, coming here from Galena, Illinois, and has labored diligently at his trade of carpenter at the same time he has devoted his leisure hours to study in fitting himself for the profession he wishes to adopt. We believe he has in his mental and physical make-up the kind of stuff of which successful men are made—that he has set out with the determination to win.
Was It Poison?
Wednesday evening last Dr. Martyn was hastily summoned to the residence of G. B. Hardell in this city and found Mr. H., his three children and nephew suffering from violent vomiting and cramps—in fact all symptoms pointing strongly to poisoning. For supper the family had partaken of canned chicken and shortly after were taken deathly ill with the symptoms mentioned. There was no fatal result from what would appear to be a case of accidental poisoning, and under the care of Dr. Martyn the alarming symptoms soon gave way and the patients were shortly able to be around again.
