THE NEW SCHOOL HOUSE.

An Improvement Which Does Great

Credit to the City. Last Friday, in company with the members of the school board, a Jour-NAL representative made a visit to the in Nebraska at far less money than new school building, the object of the any local gallery can do it. Come and board being to witness the working see us before making engagements of the heating and ventilating system elsewhere. G. W. Hutching, photo- with which it is to be furnished, while the visit of the reporter was for the purpose of noting, for the benefit of the public, particulars of interest with regard to the improvement in a gen-

In respect to satisfying all apparent demands and giving general satisfactin, as well as in point of a most beautiful and sightly location upon high ground, splendidly adapted to the -C. & L. Kramer is now the style purpose, the site could not have been more happily chosen.

The building is now ready for the plasterers and will, in all probability, be ready for the high school to occupy immediately following the Easter week vacation. The fact that the contractor prefers to wait before commencing the work of plastering until there shall be no risk from frost of marring a successful and satisfactory completion of the job, and that the board have coincided with him, is but one of the many little incidents which construction the work has been very wisely superintended on behalf of the day. board and fairly and honestly handled on the part of the contractor. The result is that our city has a public improvement of which she may well feel proud, a particular reason for congratulation, and one which far too often fails to materialize in such cases, is the very important fact that the cost has been, to say the least,

For the following principal details sending tickets to relatives in the old ha, the reporter is indebted to the country. A large portion of the kindness of the contractor, Mr. James

built in shape of a cross, with stone water-table, window sills, skewbacks and keystones, galvanized iron cornice and panels over windows, and partitions of brick. The basement is eight feet high, the two stories, each 14 feet in clear between floor and ceiling, making walls 39 feet from foundation to top of wall, Il foot rise to roof, tower and spire 26 feet, making 76 feet from ground to top of spire: the tower and spire to be finished with dimension shingles cut in different shapes to give a nest appearance. cresting, also adds vastly to the anpearance of the building.
