-In another place will, be found a communication from J. H. R. concerning grazing cattle on dry corn stalks. The Journal wishes to add emphatically, Don't, if you value the lives of your cattle. With all the precautions, it don't pay. Our cattle have too much dry feed anyway, and they should have constant, free access to all the fresh, pure water they can drink; besides, the best method to compel them to seek the water is to mix plenty of salt with ground feed thrown in their feeding-troughs .-They eat the tempting feed, get abundance of salt which literally drives them to the water, thus saving them from the bad effects of dry feed. But keep them out of the stalks, at least until after heavy snows or rains Fred remarked "H -, it's the moon!" have thoroughly moistened the stalks, and even then it would be well to keep them out.

Hemp Binder-Twine Factory. One of the directors of an eastern concern has written here to know it there would be any disposition to invest in a twine factory to be established here, provided it could be

shown to be fairly profitable. The company is looking for a location in Nebraska, and gives very good reasons for preferring Nebraska : they sell a large part of their twine in Nebraska, and very largely in Dakota; they raise their own bemp or have it raised, and it grows well in Nebraska; they can save about half the cost of transportation over the railroad, and the twine can be

made cheaper here than east. Mayor Kramer will call upon the business men of the city with reference to this project. Let us have every enterprise that
