word living means food, shelter and clothing. These, we claim, the world dividual is the civilization which surrounds him. The civilization of today which enables the few to count their millions while the masses suffer for the necessaries of life, is indeed an unsound civilization. We of the 19th century, who in turn

ing the pages of history, hold up our hands in holy horror at the cruelty and barbarism of ancient times, have but to look at the present condition of some of the countries, for instance, India and Ireland, under British rule to realize that the masses of the people are vainly struggling for a living. England in her greed does not hesitate to wring from the tillers of the soil, the very food which their labor has produced, to support the alien landlords in idleness. And shal

we of America take no warning? Of the three great fortunes of America the foundation of but one was obtained by real service to the world. Vander bilt rendered a real service to the people when he completed the through l railway system. Gould's immense fortune was made by speculation, and truly.

Astor's by the rise of real estate. Every dollar that is thus gained by specula tion is so much received without giving an equivalent, and this is what we must have if each one has an equal chance for a living. We can look over any one of our fair fertile western states and see large tracts of land owned by one person, who is making no improvements holding it until it rises in value by the labor of others. When he can sell it for thrifty manager, little thinking or caring, stands alone, no ancestors, no fellows that for the money he has received he has given nothing in return. The world itself acknowledges, to a certain extent, the right of each and every one to food, shelter and clothing, by its many institutions. The majority of the states, by their public school system, supported by taxation, and by their industrial schools, are providing for the future welfare and usefulness of their youth. The magnificent buildings that are erected all over our country for the care of the sick, infirm and unfortunate of all classes, that are unable to do service, are evidences of the fact that the world realizes it owes them a living.

Civilization is co-operation. The think-Civilization is co-operation. The think ing men of today are beginning to realize that a great wrong has been done by allowing the comparatively few to claim ownership of the land; and are presenting many reasons why land should be common property. Henry George says: The equal right of all men to the use of land is as clear as their equal right to breathe the air-it is a right proclaimed by the fact of their existence. In this country we have not as yet felt the importance of this question. But the great fortunes that are being ac cumulated by the few on the one hand

For an ignorant person could not enjoy a leisure. He would probably so use it as to be an injury instead of a benefit, spending it either in dissipation or reading the trashy literature of the day. There are classes of persons who want a living and a leisure also, but are not willing to earn it. They expect to be supported by those who do work. Criminals, paupers and gamblers are Criminals, paupers and gamblers are among this class of persons. They readily accept the idea that the world

Not every man can attain greatness, not every woman can become a Florence Nightingale or a Mrs. Stowe, but it is the duty and the privilege of each one to so live that the world may be the better for their being in it.

Cured by Administering Dr. Haines' Golden Specific.

It can be given in a cup of coffee or tea without the knowledge of the person taking it; is absolutely harmless and will effect a permanent and speedy cure, whether the patient is a moderate drinker or an alcoholic wreck. Thousands of drunkards have been made temperate men who have taken Golden Specific in their coffee without their knowledge, and THE WORLD OWES US A LIVING, BY GRACE today believe they quit drinking of their own free will. IT NEVER FAILS. The system once impregnated with the Specific it becomes an utter impossibilowes to every one, or at least the right ity for the liquor appetite to exist.
