The JOURNAL does not suppose that congratulations will be in order for some time at least.

Only once in a long while during the eighteen years that we have been publishing the JOURNAL have we had reason to complain of Uncle Samuel's mail clerks. We issue the JOURNAL on time, print each subscriber's name on his paper or the wrapper, deliver them promptly at our post office here, and consequently have very little to complain of. Mr. Talbitzer of Niles, Ohio, a reader of the JOURNAL, the past four years, tells us that in that time he missed but one copy of the JOURNAL. Some who have been members thirteen years, have never lost one in the mail.

Judge J. G. Higgins, Uncle Sam's chief officer at the Grand Island land office, was in the city several days last week on business, and gave this office a very pleasant call. In speaking of the prosperity of Grand Island, he said that, as usual, they had two booms on hand just now, one of them a best-angel establishment, the location of which is virtually assured, and the other the Baptist State University. The Judge thinks that a considerable portion of the advancement of Grand Island the past few years is due to the energy of C. W. Searf, a young man, resident of Grand Island the past six years. He works hard, corresponds, travels, and gives of his time and his means to help build up the place, and his work is telling.

School Exhibit. Friday afternoon the different departments of the city schools exhibited in the two lower rooms of the High School building, the regular written and kindergarten work of the several grades. In the display of the primary grades we noticed especially the workings of the little ones, on mats, weaving, stitching, designing, and quite a display of pen and ink work.

In this department was exhibited some very fine written work executed by scholars whose ages ranged from 5 to 7 years. First was displayed the pencil writing on slates, then the next higher step, writing on paper. The second primary grades displayed the second step in the graded work consisting of the last five gifts in the kindergarten work and also the various occupations. With the kindergarten work was shown the regular written work of the grades, consisting of spelling, writing, arithmetic number work, and language exercises of the grades. In the intermediate department display, we noticed besides the papers on arithmetic, geography, grammar, etc., some very fine drawings consisting of landscapes, pictures, and regular pen work. A number of them were very pretty and nicely executed. In the seventh and eighth grades the map drawing was unusually excellent—the penmanship was very fine and the various papers written neatly and accurately.

The High School exhibit consisted of the regular daily writings of the school, essays, algebra, geometry, civil government and book-keeping.

These papers were neatly written and their manner of handling the different subjects was very good.

During the afternoon a committee consisting of Messrs. C. W. Pearsall, M. Brugger and D. F. Davis was chosen, to pick out the papers displaying the best general work, taking age, grade, writing, etc., into consideration. The committee decided that Ada Lewis, age 12, of the Third Ward School, had the best papers, and she was awarded the "Fitzpatrick prize"—a handsome pen and holder.

A large number of our citizens visited the High School and inspected the work; one and all concluded that they had highly repaid. The work will be taken to Fremont and placed on exhibition during the State Teachers' Association, this week.

The citizens of Columbus who were present Friday were very well pleased with the exhibit, and may well congratulate themselves and the children in having so good a school system, and such competent instructors.

AN OPEN LETTER. To Mr. Louis McMurray, Frederick City, Maryland.

DEAR SIR:—The JOURNAL is informed that your establishment at Frederick, for the canning of fruit and vegetables, is the largest in the United States, and that, consequently, your business is immense.

Without disparaging your section of country at all (a summer's sojourn there during the war and what we there learned forbids that), the JOURNAL wishes to call your attention to a few facts: that is no state in the Union that has soil better adapted to raising vegetables than has Nebraska; we are nearly the middle of the United States; we are close to the mining regions of the west—the market-houses, so to speak, for the great bulk of your products, freights are in our favor; a practically unlimited quantity of land would be at your disposal here,—the raw products could be had in great abundance.

An establishment here, similar to the one at Frederick City, would be worth a good deal of money to you, at once, and (the reason we write this open letter to you) it would be a great benefit to this particular locality.

If you will say to me what you will think of it, the JOURNAL will endeavor to still further make the way plain. We have a splendid country, a magnificent future, a people who honor enterprise, energy and native worth, and you will be a thousand times welcome.

Very truly, COLUMBUS JOURNAL.

Problem. A man died leaving \$23,480 to his sons aged 11, 13 and 15 years, the amount to be loaned out at 5 per cent, simple interest, and divided equally among the boys so that each would get the same amount when they become of age.

Solution:—I first find the number of years before each boy will be of age; 21—11—10, 21—13—8, 21—15—6. Taking \$1.00 for a basis in each case, I find that \$1.00 given to the 11 yr. old son at 5 per cent for 10 yrs. will amount to \$1.50, \$1.00 given to the 13 yr. old son at 5 per cent for 8 yrs. will amount to \$1.40, and \$1.00 given to the 15 yr. old son at 5 per cent for 6 yrs. will amount to \$1.30.

To find the proportion in which the money is to be divided, I find the least common multiple of 150, 130, 120 which is 2700. Dividing this by 150, 130 and 120 gives, respectively, 18, 19, 210. I then find that the money is to be in the same proportion as these numbers are to each other, that is, the sum of these (387) divided into \$23,480 gives \$40 as the unit of comparison, which, multiplied by 18, 19 and 210 gives, respectively, \$720, \$760 and \$8400 the share of the 11 yrs. old son; \$7800 the share of the 13 yrs. old son; \$8400 the share of the 15 yrs. old son.

Proof:—\$7200 at 5 per cent for 10 yrs. amounts to \$10920; \$7800 at 5 per cent for 8 yrs. amounts to \$10920; \$8400 at 5 per cent for 6 yrs. amounts to \$10920. SARAH J. HALL.

In Memoriam. Mrs. Belinda V. Davis was born in the year of our Lord, 1827, in Frederick county, Maryland, and departed this life at her home in Columbus, Platte county, Neb., March 18th, 1888, aged 61 years, 1 month and 4 days. She leaves a faithful and devoted husband and eight dutiful sons to mourn their sad loss. Mr. and Mrs. Davis were married 43 years on the day her sainted spirit left the church militant for the church triumphant with God.

Mr. G. W. Davis with his family came to this county from Baltimore City, Maryland, 15 years ago, and has remained here ever since.

Sister Davis was a member of the M. E. church in Baltimore City. She remained in the same faith until her death. She was also a member in good standing of Columbia Lodge Daughters of Rebecca of this city. The funeral services were conducted by U. P. Pavers, pastor of the M. E. church, to a large and attentive congregation, after which all that remained earthy of sister Davis was peacefully laid away to rest in the Columbus cemetery. H. Hudson and C. A. Speice pronouncing the touching ceremony of the Rebecca ritual.

Many of our county teachers have taken a commendable interest in the work of the Fremont exhibit; while the display is not so large as might have been desired, it is mostly of a high order. We wish especially to mention the fine drawings by the pupils of Miss Annie Freeman, Miss Alice Kingdon and Mr. Louis Leavy. These are of a very high degree of merit. The most notable matter in the whole exhibit is the work from the pupils of Miss Nellie Curtis of Loupe township. The work consists of the assembled friends of the bridal couple, and their married life was inaugurated under the happiest auspices.

To the School District Officers. LINCOLN, Neb., March 14, 1888.—I hereby call your attention to the fact that during the severe winter of 1887 and 1888 many schools were found without fuel during a severe and very cold storm. In all schools remote from town I desire to have the school officers see that a supply of fuel sufficient to last during the winter term is provided and delivered at the school-house before the winter term begins.

Please call the attention of the attending meeting to this matter, and see that proper provision is made for carrying it into effect. Very respectfully, GEO. B. LANE, State Supt.

The Warren Live Stock Co., who have their feeding establishment located at Duncan, this county, recently shipped 3000 head of fat sheep for which they received \$5.00 at Chicago. They have prospered well by locating in Platte county and believe all the conditions here are good. Starting in with 17,000 sheep, they yet have nearly 9,000 to dispose of. Last year they fattened sheep at Wood River; with corn at an advance over last year, they have cleared more than they did there, suggesting that the corn raised here may be more nutritious for some reason, or the other conditions better.
