NEW ENGLAND'S GIRLS.

WHAT OF THE SURPLUSAGE OF WOMEN IN EASTERN STATES? What the Made a Study of the Subject, the Tenth Woman of the Old Who Do Not Marry.

It has often been asked what becomes of the surplus of the female over the male population of some of the states, especially of Massachusetts and Connecticut, and perhaps of some of the other "down east" commonwealths.

The average of the female graduates from a typical New England school is between 16 and 17 years. Hence it will appear that the women of whom this list has been made, ranging from 22 and 24 years old, have done their "graduate" part of their "education" in the liberal arts.

Of the unmarried sixty-one, twenty-one follow a very usual female calling—that of schoolma'am. One is at Hampton, Va., teaching the Indians; the other twenty are in country schools or in near by their homes.
