Almost Perpetual Metion. Daniel W. Smith, a St. Louis engineer In starting the machine some extraneous heat is necessary to put the dynamo in

motion. The dynamo supplies the electricity, which heats the water and makes steam; the steam runs any engine to which the generator may be attached. After serving the engine the steam passes into the dynamo, which it also operates and the exhaust is then, by means of a very ingenious and original mechanical device, forced back into the renerator so that no steam is wasted. Thus there is no smoke, no exhaust, no poise. The machine is self-operating. self-acting and self-regulating. It consumes no fuel, and after once being started in operation, runs itself until its

Washington Letter.

(From our regular correspondent.) President Harrison is a sick man. Not yet dangerously so, but the present Everybody can see it, and at last Gen.

Having himself has realized that his carthly possession you would be infinite-Harrison himself has realized that his strength is slowly but surely slipping away from him, and that something must be done to get some rest. Everything has been tried to stop the pressure on him, but it is still there. Set hours does very well to keep out the small fry, but so long as he remains in the White House the president cannot refuse to see members of his cabinet, senators and party leaders, and they are the men who, by their importunities, are slowly killing him.

To those who see the president every day little change is perceptible, but he does not look like the same man who came to Washington a few days before the inauguration. A personal friend of his who saw him on Saturday for the called to order by the mayor, and profirst time since February assured me ceeded to elect a president for the ensu that he was dreadfully shocked and alarmed by his appearance and that he low was elected.
