We learn that Sheriff Bloodorn has concluded that he will not serve any more papers unless his fees are advanced to him. The cattle market last week showed a considerable downward tendency owing, so all observers agree, to the fact that the rise in price had brought a continued and increasing stream of cattle to market. We give the account of Friday's market, from the Drovers' Journal: "Including the number carried over from yesterday there were about an average number on sale. The fresh receipts numbered fifty-five loads, about 1,100 head, as compared with 1,338 head yesterday, and 2,014 head on last Friday. Reports from other markets show a corresponding decrease in the supply, and while the markets are unsettled, yet values on all grades compare favorably with those prevailing on yesterday's market. Speculators during the past few days have not been purchasing very liberally, owing to the demoralized state of the trade. Today, however, they began to purchase more freely, and while not disposed to strengthen prices on anything, the tone of the market was better than it has been in several days. Butchers' stock has been selling well, as compared with the market of beef cattle, prices on choice lots having varied but little during the week. If the receipts are kept in moderation, present prices will likely be well sustained, or even improved upon." ... news item.

The Schuyler Quill of last Wednesday has quite a lengthy paragraph over the arrest here of two grandsons of Robert Edgar, Esq., named James and Thomas Richardson of Council Bluffs. The truth of the matter, as we learn from Chief of Police McTeggart, is that the young men were found, not on the depot platform, but after twelve o'clock at night, near a bar car west of Olive street, and in the U. P. yard. They were asked if they had money to pay their hotel bill for the night and they answered that they had, but when they reached the Lindell Hotel, they then said that they had only 25 cents which was not sufficient. They were searched in the presence of Sheriff Bloodorn. A watch (brass) and chain valued at \$3 or \$4 were taken. They were brought before Police Judge Cowdery the next morning on a charge of vagrancy and fined a small sum, for the payment of which for the city's expense to the county for the lodging and breakfast at the jail, the watch and chain are now held. The chief says he is sure that the boys themselves would not deny any of these statements. ... news item.

Another Columbus Reception. We are in receipt of No. 1, Vol. 1 of the Columbus Daily Telegram. It is a six column folio, and filled full of the latest news from all around the sky, besides a page of the local happenings of city and county. It is certainly very creditable to its proprietor, D. F. Davis, and The Journal hopes that its shadow may never grow less but more, and that it may prove as it says "but a herald to sound the approach of mightier powers which come to develop the resources of this fair corner of the earth." The proprietor of the Telegram is thoroughly correct in saying that he "expects but little financial reward for his labors at present; willing to labor for the good of Columbus and look to her future destined greatness for the greater fruits of his labor. The time for Columbus to exert herself and take her proper position among the leading cities of Nebraska is at hand. The opportunity neglected, she will have to wait for the slow turning of the wheel of fortune for another chance as favorable as the present one." Every newspaper enterprise that is born of the spirit of progress, and with the motive of improvement, has a right to a place in this busy world of ours and deserves not only the good words of the community in which it lives, and for which it gives its all of health and strength, but it should also be so placed that substantial business support will place it on a solid footing, and indicate to the world outside that the community is alive to its own best interests. Again we say, success to the Telegram. ... news item.

A Bad Man. A great deal of the meanness of the world is cloaked under the phrase, "domestic infelicity." Saturday last a lady arrived in the city in search of her husband to Sheriff Bloodorn. Columbus is always a bad place for such a man to come to, because they generally get caught here or hereabouts. Sunday Mrs. Zeller received a telegram saying that the truant had been arrested and was now at his old home, Dowagiac, Mich.; it did not state further particulars. If suicide was ever justifiable under any circumstances, this man ought accidentally fall into a deep river and drown himself, in remorse for having lost as a fond, loving wife, such a plucky, determined and capable woman. ... news item.

The so-called "bad lands" of Nebraska have rapidly disappeared from the maps of the country. It is coming to be understood that the old-time estimates of the capabilities of Nebraska soil, or, indeed, for that matter, of the west in general, no longer hold good. When the writer hereof came to Nebraska in 1870, he was told by several old settlers that the table land north of this city would not raise crops, but it was even then producing a good quality of wild grass, and crops have always been good since ever the soil was broken. There is, of course, in Nebraska as in other states, land that is not good for agricultural purposes, but the ratio of unutilized to tillable soil here is very small, and less than in any other region, and we know of Nebraska in its fact, an earthly paradise for farmers. ... news item.

The entertainment Monday evening given by Miss Mae North for the benefit of the Episcopal church was in every way a decided success. The Opera House was crowded by an appreciative audience. The Orchestra furnished two selections which were very well rendered. Miss North recited four numbers, holding the closest attention of her audience from beginning to close of each. The Mannerchor sang splendidly, as they always do, again verifying the old saying, as each number followed its predecessor, that the last heard is always the best. The quartette by Messrs.
