Silk umbrellas and parasols at the Racket.

Now is your opportunity while the R. R. P. C. is here.

The finest cabinet photos in the west at the railroad photo car.

When in need of job work give us a call. All kinds of commercial work done.

Coolidge Bros. have the biggest scheme on record. Come and see what it is.

The best and cheapest cultivators made—the Golden Eagle, for sale at A. Boettcher's.

On Monday Pat Murray shipped ten and Don Thayer two car loads of fat cattle from here to the Chicago market.

Wishing to dispose of what millinery we have left, we will sell at less than cost for the next thirty days. Mrs. J. C. Fillman.

Schaffroth & Plath have the best of harvesting machinery and can furnish any kind of farm implements, at reasonable rates.

E. R. Bisson was in town Monday, and looked, by the size of the lead in his wagon, as though he was preparing for harvest.

A. D. Duffy, Schuyler, Neb., is ready to answer his chawyer in this section of the state, for home-moving. Address him for terms.

Wanted, two Columbus city lots as a site for a residence. Address, next ten days, A. B., care of JOURNAL office and state lowest cash price.

A base ball game was played between the "scrub nine" last Sunday at the fair ground, led by Hagel and Schram. 9 to 3 in favor of Hagel's side.

Wm. Hollingshead's barn was damaged to the extent of \$50. There were quite a number of minor losses in his neighborhood by the wind storm of Saturday.

The damage to the telephone exchange by lightning Thursday night was repaired in three days. It was a severe stroke, melting the wires and setting fire to the building.

We print elsewhere Mr. E. J. Couch's summary of rainfall, and, for the winter months. Eastern farmers, who are looking out for their business, would do well to make a note of this.

First citizen Sunday morning—"Well, we can see by the streets this morning which way the water runs." Second citizen—"No, but we can see which way it don't run."

We understand that Messrs. Winslow and Schofield have received the necessary machinery for running a first-class cheese factory. This will certainly be a good thing for this vicinity.

That weather prognosticator, who earlier in the spring predicted that this would be a dry season, could not find a more opportune time than just now to go off some where and soak his head.

The canning factory at Fremont has commenced work for the season; beans is now on the program, to be succeeded later by corn and tomatoes. When can we publish such items for Columbus?

All varieties of job work, such as cards, envelopes, circulars, dogtags, note heads, letter heads, etc., printed at this office. No need to go to Fremont, Lincoln, Hastings or Omaha for this sort of work.

For Buford plows and cultivators, for harrows, seeders, wagons, Plano binders and anything else needed on the farm in the way of machinery, call on Joseph A. Gutzmer on Olive street opposite Henry's corner. 48-17

John Huber has again gone into the hotel business, setting the first meal Saturday last for supper. He has been the owner of the Central House right along, and ought to do well in the hotel business. Success to him.

Guy C. Barnum has lived on his farm fifteen years and has never failed of getting a crop except once on account of grasshoppers. Wet or dry seasons, his crops are sure, and no wonder with a river of water on each side.

Here is one of the most sensible suggestions we have ever seen: "Teach boys and girls the actual facts of life as soon as they are old enough to understand them, and give them the sense of responsibility without saddening them."

The old settlers association at North Bend used as emblems of liberty at their last meeting, the coyote and jack-rabbit. These two birds of freedom are about as creditable to the country as that big buzzard known as the American eagle.

The laying of the brick pavement at the Fleming marks an era in the history of Columbus. The brick used are the vitrified or very hard brick from Lincoln, laid edge-wise. It looks as though they would make a first-class sidewalk, lasting for years.

If the average citizen could have seen the hose team wading through the mud knee deep in front of the Fleming hotel Thursday night last on their way to the fire, he would have made up his mind that the fire ladders don't always walk on beds of roses.

"R. T." of Nebraska must have seen the phantom of the heavenly bodies from some barn gable, if he is to judge by a recent paragraph in THE JOURNAL, and this informant believes that his vision is so good that he could hit two flies at one lick.—(J. H.)

A man named Finley employed on Ed Miller's horse ranch near Fullerton, was kicked on the leg by a broncho, in front of Webb's store. He was carried into the store and Dr. Martyn was called and administered to his needs. He is now at the Clotter home.

The Nebraska Farmer is the only strictly agricultural paper published in Nebraska, and it is a good one. Our arrangements with the proprietors are such that we can furnish the two journals which we publish and the Farmer, all one year, for \$2.75, when paid in advance.

Rev. E. L. Powers and family left Monday morning on the R. & M. for their summer's vacation. During Mr. Powers' absence, Rev. Hilton will take his place on the 21st, Rev. Pittenger on the 28th, Rev. Martin Aug. 4th, and Rev. Crane Aug. 11th, passing morning and evening at the usual house and also at Boston at 8 p. m.

—Married, on Independence Day at Elk Point, Dak., Frank W. Miller to Josie A. Morris both of Creston. Mr. Miller is one of Platte county's popular teachers and Miss Morris is a daughter of John T. Morris, and a niece of E. T. Graham.—(Creston cor. Humphrey Democrat.)

The excursion train from Ulysses accompanied with the base ball team of that place, due here Sunday last, did not arrive on account of the heavy rain. We are informed that they will be here Sunday next, when a very lively game of ball may be expected on the fair grounds.

—Saturday last Dr. W. G. Gelbraith and his assistant, Dr. McGarran of Omaha, assisted by Drs. Martyn & Schang of this city amputated the right leg of G. W. Clotter just above the knee. Some months ago George had a tumor removed from the calf of his leg, but the operation did not stop the trouble, and since that he has been decaying until it was thought best to amputate as above stated. When the tumor was cut out George objected to taking an anesthetic, and did so this time, as he wanted to see the work done, he said, but it was used, and we are glad to learn that he is doing well since the operation.

—A tin box in the form of a brick was last Saturday put in the wall of the Baptist church. It contained two numbers of THE PLATTE COUNTY ARGUS, one copy of "Der Sandbote" a history of the church; names of the members, names of the builders and workmen; of the first contributors and first gratuitous laborers; also the names of the town board, and the names of the present business houses and of the banks of Platte County, number of population and other interesting items. If after many years the walls should crumble into dust or be taken down to make room for a larger edifice that box will be a very interesting find for the coming generation and future inhabitants.—(Argus.)

Thursday night last about ten o'clock, J. R. Drinnin's barn (about 150 ft. north of his residence), was struck by lightning, the fluid descending the board gable into the sod wall, penetrating that in an angle, striking a mare in the hip producing death. Her mate, a mule, standing in the same stall, was also killed, but showed no signs of the stroke. Two other horses in the barn were knocked down, stunned, but not killed. The loss falls pretty heavily upon Mr. Drinnin; he had an insurance of \$300 on six head of horses, but these were decidedly the best and his main reliance. He lost a horse about three weeks ago, and in the six years of his residence in Nebraska, lost an average of one horse a year.

Nebraska is all right. Her solid foundation of course is agriculture and stock raising. Nebraska's farming population are here mainly for the bettering of their condition, incidentally for their health, of course. As they have increased in worldly goods, they have added to their improvements,—in dwellings, in barns, in broods of stock, in everything that goes to making a farm valuable. No man need imagine that because every farm doesn't have a large brick dwelling-house, a large barn, a fine orchard, a hundred head of cattle, twenty horses, two or three hundred sheep, fenced fields and tame geese in abundance, that it isn't because farmers are not aware of the advantages named. The farmers of Nebraska, their good wives and children are striking their best looks on practical lines, and success is theirs in large and increasing quantities. As conditions alter, so the work on our farms will change. The time has come when he who can, should put every acre of his tillable land under cultivation, institute a thorough system of rotation of crops, including meadows and pastures of the tame grasses. Something must be found (perhaps the clover) to stir the under soil and make the seed-bed deeper, thus increasing the capacity of the soil for holding moisture, making it more productive and more certain in its returns, year by year.

—There is no doubt but that this section of Nebraska can raise fruit in abundance and of good varieties. Of all that is raised elsewhere in this latitude peaches is probably the only exception to what can be produced here, if they are an exception, which we will not yet believe, for we have seen as fine peaches as one would need to look at, raised in Omaha, and under similar conditions they could be raised here. But apples, plums, cherries and the small fruits there need be no lack of them. The Ord Qui quotes A. Ward of that vicinity as saying, while showing the editor some fine twigs of cherries, and telling him that he has a number of trees that have borne well this year, that "when people begin to take care of their trees they will find that fruit will do as well here as anywhere." We fully believe that, and there are a good many ways in which trees may be injured or destroyed, every one of which must be guarded against in order to secure success. One of the first is to have fences so strong that the stock can break into your orchard; no careless man should be allowed inside the enclosure with a team and plow; the trees should be well mulched, summer and winter, and effective means taken against rabbits. Those who are first to work for fruit are the ones who will be successful. We cannot refrain from saying that Judge Higgins, on his splendid piece of real estate in the eastern part of the city, made a success of getting fruit. We know that he spent a good deal of time and money, but he did it well; he began it years ago with such persistent determination to succeed that heavy example has to our certain knowledge been of very great value to this section of the state. The late Vincent Kummer did much toward the same end. Judge Hudson is another and John Stauffer still another man of the same sort. J. H. Watts has a splendid apple orchard—he knew his man and got good trees to begin with, using only a very few, but Mr. Watts' convictions are a necessary factor in his success. We are told that the Behlens have had excellent success with fruit. Now if somebody would give for THE JOURNAL some pointers on raising fruit, they might fall into good ground,—some of the younger people might be induced to work for their own good and that of their country in planting fruit trees. What a country this would be if all farmers had orchards like Judge Higgins' or Watts'.

—Tuesday afternoon of last week James Knapp of Burrows township, four miles north of Platte Center, attempted to commit suicide, so it is thought. A revolver was the instrument used, the ball entering the chin, knocking out two teeth and shattering the jaw bone, breaking it in several places. He was alone in the house at the time, he was having gone to town. It is said that Mr. Knapp was, a few years ago, quite wealthy, but having lost nearly all his property, he has since been despondent. He is now at the Sisters' hospital here.

—Saturday last Dr. W. G. Gelbraith and his assistant, Dr. McGarran of Omaha, assisted by Drs. Martyn & Schang of this city amputated the right leg of G. W. Clotter just above the knee. Some months ago George had a tumor removed from the calf of his leg, but the operation did not stop the trouble, and since that he has been decaying until it was thought best to amputate as above stated.
