The alarm woke him up, but he felt weak and prostrated. One of the children was gasping and crying and seemed to be quite sick, and leaving it in the care of his wife, he hastened for Dr. Lewis. When they returned, Mrs. Krause was lying on the floor nearly overcome, and the other child was nearly senseless. The doors and windows were opened and it was found that a canary bird in its cage was dead. The family were all desperately ill for some time but finally recovered. The cause of the strange attack is unknown, but it acted very much as though they had been overcome by gas, but it is a serious question if gasoline ever works in that way. It was a narrow escape, and an experience that they do not care to repeat.—(Boone County Argus.

Farmers who have a number of good cows, for which there is a very poor market just now, would do well to prepare for selling the cream to the Columbus Creamery. Under the management of Mr. Frank Stevenson they pay all that the current market will justify them in giving, and you will find them every way worthy of your confidence. Ask their patrons for the past several years whether it has not paid them well to sell to the Columbus Creamery, and you will find a universal "yes" in response.

Fifty years ago "victims" to have their pictures taken had to sit in the blazing sun half an hour, with the eyes tight shut and the face dusted over with white powder; and now the process is instantaneous.

The Lindsay Times is regarded as a democratic organ. In the last issue occurs the following. Coming before the convention, it is intended, doubtless, not to "affect the election," but to have a bearing on the nominations. "From the simple fact that a man has occupied the position of county clerk, sheriff, treasurer, or what not, for a term of two, four or six years, it does not stand to reason that the people have got to vote for him again, even if he has made a good and faithful servant to the county. Make a change. When an officer's time expires elect someone else to fill his place. He will probably suit the people better, in fact he may be better fitted for the office in every particular." This sounds something like "treason" to the bosses, don't it? Is it possible that the Times is to be allowed to continue in this vein?

The ball game on Monday between Columbus and Clark was about as good a game as could be expected on such a windy day and without the services of Mr. Waks. The game resulted in a victory for Columbus by a score of 14 to 9. Batteries—for Columbus, Bird brothers; for Clark, Campbell and Higgins. Umpire, Brindle. This being the first game under the new management it was, consequently, not very well organized. We hope to see the boys take the scalp of the Red Bovers before the season is over, for they expected to have such a snap here on the Fourth.—(Chronicle.

In a business letter from Mr. M. H. White at Tacoma, W. T. he adds: "We arrived after a four days' journey, all O. K. The first nice rain since our arrival came yesterday. Mr. Pierce, Mr. Compton and all the other Columbus folks are well, and seem to be prospering. We got our furniture just four weeks from the time it started. There have been a great many improvements since I was out here last winter. I still think this is destined to be a large city. I am glad to see that Columbus is still on the boom."

Columbus has now greater railroad facilities than any other city in central Nebraska, and this one fact is just beginning to tell strongly in her favor. In now, some other of our capitalists will imitate the example of J. S. Murdoch and Leander Gerrard, and erect cottonwood which can be rented or sold at reasonable figures, they will be doing this community a favor and at the same time reap a benefit themselves. There is a demand for good homes, and a brisk demand for lots on which to build.
