A spectacular attraction, which listed the services of some pretty ballet girls, came to one of our leading theaters. Four well-known gentlemen cenceived the idea that it would be good fun to invite several of the prettiest of the corps de ballet to a midnight supper and they acted upon the idea. The ballet girls were invited and accepted the invitation with charming alacrity. A box at the theater was engaged and a dainty supper of bivalves, birds and champaign ordered at a popular cafe. ELECTRICAL PHOTOGRAPHY. Wizard Edison Has Devised & Proce Which Works at Lightning Speed.

It seems almost like a fairy tale to read of the new and wonderful directions in which the fertile brain of the great electrical wizard, Thomas A. Edison, is reaching out. About a year ago Mr. Edison became intensely interested in instantaneous pho tography in its possible availability in connection with the phonograph, and at once organ an exhaustive series of experiments in that direction. The first thing was to develop the possibility of the camera as to rapidity of exposure, and experiments were made in photographing a bullet passing through the air with an initial velocity of 5.000 feet a second. But to secure a perfect picture of a bullet moving at this extraordinary velocity it must apparently be at rest and hence the actual time of exsome must be brought down to incredibly finitessimal limits.

The inventor at once harnessed the lightning to do the work, and before the camera arranged a series of vertical wires so fine as to be practically invisible, and so connected that the breaking of any one of them would complete an electrical and furnish an illuminating spark for the 200,000th of a second. The slight, imperceptible tremor of the room in which the experiments were conducted, caused by the motion of the machinery and dynamo: was sufficient to destroy the sharpness and value of the photographic images. was overcome by erecting a special build ing for the purpose and placing the camera on a pier of solid masonry running down to the primitive rock. Then, and only then, it was that success attended the ex

Anecdotes About Bismarck.

Prince Bismarck was on one occasion challenged to fight a duel by the Anstrian statesman Count Rechberg. Both were a the time ambassadors to the German die at Frankfort. Prince Bismarck (then Herr von Bismarck Schonhausen) soon found out that Count Rechberg was hottempered and passionate, but in the main honorable and good natured. Count Rechberg, on his side, cordially disliked Prussia, and its astute representative, but did his best all the same to keep on amicable terms with his colleague. Both officially and socially there was, howhis self-control, passionately exclaimed "One of my friends shall wait on you in the morning." "Why all this unnecessary of the plan. Why the fiend tempted | delay?" Herr von Bismarck coolly replied In all probability you have a pair of pis tols handy. Let us settle the matter immediately. While you get the things ready I shall write a report about the whole transaction, which, in case I am killed, I request you to forward to Berlin." Bot set about their work. When Bismarck had finished he handed the sheet to Count Rechberg, requesting him to examine it. Rechberg's passion had in the meantime given way to sober reflection. After having perused the report, he said, "What you say is quite correct; but is it really worth while to fight a duel for such a reason? "That is exactly my opinion," was Bis marck's answer, and the matter ended One day Count Rechberg called on the Prussian ambassador to show him a dispatch from his government instructing the count to vote with Prussia at the pext meeting of the German diet. Bismarch read the document and returned it to the count, saying, "This is evidently a mis-take." Rechberg in his turn looked at the sheet and changed color. Instead of the efficial letter he had by mistake handed to Bismarck the secret instructions he had received concurrently calling upon him, while openly counte nancing Russia, to use his utmost en deavor to cause the other German states to vote against the measure. Here was Prince Bismarck's opportunity. How be used it the sequel will show. For a moment both statesmen looked at one another in silence. Then Bismarck said "Don't be upset. The trying ordeals which fashionable society imposes on its devotees are enough to severely test the physical strength and enurance of the most robust. Irregular and ate hours, over-rich and indigestible food, late suppers, the fatigue of the ball-room, the bad air of the illy-ventilated, overcrowded theatre, are each, in themselves, sufficient to upset the system and ruin the health of the delicate and sensitive. Combined, they can hardly fail, if persisted in, to seriously impair the health of the hardiest. Ladies generally possess less powers of endurance than their male consorts and so the sooner succumb to these deleterious influences. They become pale, haggard and debilitated, and constantly experience a sense of lassitude - that "tired feeling," as so many express it. The least exertion fatigues them. Various neuralgic and other pains harrass and distress the sufferer. Headache, backache, "bearing-down" sen-sations, and "female weaknesses" follow As an invigorating, restorative tonic, soothing cordial and bracing nervine, for debilitated and feeble women generally, Dr. Pierce's Favorite Prescription has no

equal. In fact, it is the only medicine for the peculiar weaknesses and ailments inci-dent to females, sold by druggists, under a positive guarantee from its manufactur ers, that it will, in every case, give satisfac-tion or its price (\$1.00) will be promptly refunded. It improves digestion, invigorates the system, enriches the blood, dispels aches and pains, produces refreshing sleep, dispels melancholy and nervousness, and builds up duced below a healthy standard. It is a legitimate medicine - not a beverage. Contains no alcohol to incbriate; no syrup or sugar to sour or ferment in the stomach and position as it is marvelous in its remedia results. Therefore, don't be put off with some worthless compound easily, but dis honestly, recommended to be "just as good," that the dealer may make more profit. "Fa vorite Prescription" is incomparable. The manufacturers' unprecedented offer to quarmlee satisfaction in every case, or mone refunded, ought to convince every invalid of this fact.
