

NEBRASKA FAMILY : JOURNAL.

A Weekly Newspaper issued every
Wednesday.

32 Columns of reading matter, con-
sisting of Nebraska State News
Items, Selected Stories and
Miscellany.

Sample copies sent free to any address.

Subscription price,
\$1 a year, in Advance.

Address: M. K. Tamm & Co.,
Chicago, Ill.

A. DUSSELL,

Printer and
all kinds of
Pumps.

PUMPS REPAIRED ON SHORT
NOTICE.

Oliver St., nearly opposite Post-office,
Chicago.

LOUIS SCHREIBER,
Blacksmith and Wagon Maker.

All kinds of Repairing done on
Short Notice. Buggies, Wag-
ons, etc., made to order,
and all work guar-
anteed.

Also sell the world-famous Walter A.
Wood Mowers, Reapers, Com-
bines, Harvesters, and
all the best made.

737 1/2 Street opposite the "Tribune," on
Oliver St., COLUMBUS, 26 m.

Judicious Advertising

Creates many a new business,
Enlarges many an old business,
Reveals many a dull business,
Reveals many a lost business,
Saves many a failing business,
Preserves many a large business,
Secures success in any business.

So says a man of business, and we add that
this judicious advertising, for this section of country,
includes

THE JOURNAL

As one of the mediums, because it is read by the
first people, those who know what they want and
can be made and stretched on the ground in
any country paper in the world in this re-
spect. Twenty years ago, when the first issue
was published, it was a small paper, but it has
grown and improved and now it is one of the
best things that a man can do to get his
business before the public.

GOSSEN

CHEAP, ONLY \$15.

Woven wire and slat, cut willows, split boards
or anything of the sort, used for posts or set
fence can be made and stretched on the ground in
any country paper in the world in this re-
spect. Twenty years ago, when the first issue
was published, it was a small paper, but it has
grown and improved and now it is one of the
best things that a man can do to get his
business before the public.

NEWSPAPER
ADVERTISING

It is stated on good authority that
England has purchased the Congo Free
State in Africa from King Leopold, of
Belgium, and that Henry M. Stanley
will be offered the Governor Generalship
of the new territorial acquisition. All that
impedes the publication of the deal is the
opposition of the United States to the
treaty of 1884 which stipulates that all
merchandise imported into the Free
State shall remain free from import or
transit dues for the space of twenty
years. The sovereignty of the Free
State was vested in King Leopold in-
dividually and not in Belgium. He had
sunk many millions of money in the
running of the government and the only
way in which he could save himself
from insolvency was by exchange. Just
what John Bull paid for the territory,
with its 1,200,000 square miles and its
population of nearly 40,000,000 souls is
at present unknown.

A REMARKABLE result of the un-
reliability of circumstantial evi-
dence is reported from Cheong-
ching, China. While a thief was
engaged in robbing a house during the
absence of the family, the watch-
man, hearing a noise, entered, but fail-
ing to discover the intruder, proceeded
to enjoy his pipe. He fell asleep and
the thief was caught by the villagers as he
was about to escape, and, as many houses
were consumed by the devouring flames
they proceeded to lynch him as an in-
cendiary caught in the act. He was
bound hand and foot, burning with oil,
hurled into the burning mass and
speedily cremated, a victim to the blind
faith of a Mongolian mob.

AN English nobleman invited a gal-
lant French officer to dine with him.
Wishing to honor his guest and the
cause which he served, that of the
French King, the English peer ordered

TOPICS OF THE TIMES.

A Choice Selection of Inter-
esting Items.

THERE has been discovered in An-
gusta, Ga., a wonderful spring which
cures any kind of nausea and other
stomach troubles. Its cures are pro-
duced immediately and remarkably.

An Australian musician has invented
a trombone that is played by steam.
It's "God Save the Queen" can be
heard a distance of four miles. He had
hard luck with it, however, for the
people of his own town drove him out
as a nuisance.

MRS. HULING, a Rhode Island
woman, being thrown into the water by
the filling of a boat in which she and
two lady friends were rowing, escaped
drowning by clinging to her dog, which
swam with her to the shore. Her
friends were drowned.

SEVERAL years ago a Richmond, Me.,
man refused to allow the Maine Central
Railroad to put a foot on what he sup-
posed was his land. A survey showed
that not only the land in dispute, but
several rods more, belonged to the road,
and when the line fence was built it
took off a slice of the citizen's door-
step.

ENGLISH religious papers frequently
sneer at this country because a mar-
riage which is lawful in one State may be
unlawful in another State. But a simi-
lar condition of things exists in
Britain. In England, for instance,
marriage with a deceased wife's sister
is illegal, while in the Island of Jersey
such a marriage is valid.

EXPERIMENTS recently made in Spain
show that sunlight has an important
action in maturing wines. Layers of
new wine in bottles of colored glass have
been exposed to the direct rays of the
sun, with the result that both the fla-
vor and quality have been improved.
In the South of Europe there has been
a practice of ripening cognac by expos-
ing the bottles on the roof for years.

A GENERAL on his return from the war
showed his family a regimental flag, all
tattered and torn and riddled with bul-
lets, which he had captured from the
enemy with his own hands. On the
following morning the trophy was to be
presented to the General Commander-in-
chief. When he came to look for the
flag his industrious housekeeper
brought it to him with a smile of proud
satisfaction, and said, "What a job I've
had, but I managed it. I sat up all
night and mended that old flag, and
now it looks nearly as good as new."

A PECULIAR style of advertising,
which still exists in many towns and
rural districts, is "the card of thanks."
After a man has passed through some
severe tribulation, such as the illness
and death of a near relative, he inserts
in the local paper a card, formally
thanking his friends for their kind at-
tentions. The Houston, Texas, Tri-
bune has a card of this kind, which was
rather overdone by a man who caused
a card to be inserted thanking the un-
derwriter "for the pleasant and satisfac-
tory manner" in which that functionary
buried his wife.

An old woman entered a savings
bank in Albany a few days ago, and,
talking a number of gold and silver
pieces from her reticule, said she wanted
to deposit them. She further re-
marked: "I want you to keep this
money so that I can get the identical
pieces whenever I care to. I have the
date of each coin here," and she dis-
played a paper on which was a list of the
dates. On being informed that this
was impossible, she replied: "Well,
all right. If I can't get the same coins
back again, I won't deposit 'em," and
she went out.

Many years ago travelers in Africa
and Asia brought home marvelous
stories of the stimulating effects of the
kola nut and its power of sustenance
during fatigue and abstinence from
food. Recently these stories were re-
vived, and the world was told of the
wonderful things which were to be ac-
complished with kola. It is classified
with tea and coffee, and its active prin-
ciple is the same as in those stimu-
lants. The nut is in no sense a food,
and has no marked power in warding
off the sense of hunger or fatigue. Its
beneficial properties are merely caffeine,
tannin and medicinal ether gains
nothing from the much exploited dis-
covery.

It is stated on good authority that
England has purchased the Congo Free
State in Africa from King Leopold, of
Belgium, and that Henry M. Stanley
will be offered the Governor Generalship
of the new territorial acquisition. All that
impedes the publication of the deal is the
opposition of the United States to the
treaty of 1884 which stipulates that all
merchandise imported into the Free
State shall remain free from import or
transit dues for the space of twenty
years. The sovereignty of the Free
State was vested in King Leopold in-
dividually and not in Belgium. He had
sunk many millions of money in the
running of the government and the only
way in which he could save himself
from insolvency was by exchange. Just
what John Bull paid for the territory,
with its 1,200,000 square miles and its
population of nearly 40,000,000 souls is
at present unknown.

A REMARKABLE result of the un-
reliability of circumstantial evi-
dence is reported from Cheong-
ching, China. While a thief was
engaged in robbing a house during the
absence of the family, the watch-
man, hearing a noise, entered, but fail-
ing to discover the intruder, proceeded
to enjoy his pipe. He fell asleep and
the thief was caught by the villagers as he
was about to escape, and, as many houses
were consumed by the devouring flames
they proceeded to lynch him as an in-
cendiary caught in the act. He was
bound hand and foot, burning with oil,
hurled into the burning mass and
speedily cremated, a victim to the blind
faith of a Mongolian mob.

Farmer, Stockman, Poultryman, Nursey-
man, and Everybody Connected with the
Farm.

THE FARM.

Corn Ensilage for Beef.
At the Ontario Agricultural College
experiments have been made with corn
ensilage as a food for making beef.
The following summary of results: 1.
That shipping steers can be fed at a fair
profit with prices of grain as at present.
2. That good quality ensilage can be made
from good types, when they are pro-
cessed at reasonable rates and where
there are suitable facilities for feeding.
3. That corn ensilage and meal can be
fed effectively and as cheaply as a
ration of roots, hay and meal, and with
all. 4. That steers fed on ensilage and
meal gained twelve pounds by simply
turning them into a yard at night will
drink from sixty to seventy pounds
of water per day, and at an average cost
of 21.03 cents per day for the food fed.
5. That the value of the animals for
beef purposes was increased by the
fattening process an average of 15 cents
per pound from commencement to
finish.

Out Culture.
After three years' experiments with oats
the Ohio Experiment Station summarizes
its results as follows: 1. In the com-
parison of the different varieties the
highest yield in 1889 was the Improved
American, Monarch, Rust Proof, Welch,
and White. 2. Varieties weighing
most to the measured bushel were
the Improved American, Monarch, Rust
Proof, Welch, and White. 3. The highest
percentage of water standing at harvest
was the Improved American, Monarch,
Rust Proof, Welch, and White. 4. The
varieties giving the highest average
yield of water standing at harvest were
the Improved American, Monarch, Rust
Proof, Welch, and White. 5. Seeding at
the rate of five, seven, and eight pecks
per acre, the best results were obtained
with a seeding of less than five and
more than eight pecks gave smaller
yields. 6. The average of two seasons' experiments showed that the best re-
sults were obtained from sowing at the rate of
five pecks per acre. 7. The best results
were obtained from sowing at the rate of
five pecks per acre. 8. The best results
were obtained from sowing at the rate of
five pecks per acre. 9. The best results
were obtained from sowing at the rate of
five pecks per acre. 10. The best results
were obtained from sowing at the rate of
five pecks per acre.

One of the disadvantages of poor
seed corn is that there is a constant ten-
dency on the part of planters to put in
too much seed. The average of two seasons' experiments showed that the best re-
sults were obtained from sowing at the rate of
five pecks per acre. 7. The best results
were obtained from sowing at the rate of
five pecks per acre. 8. The best results
were obtained from sowing at the rate of
five pecks per acre. 9. The best results
were obtained from sowing at the rate of
five pecks per acre. 10. The best results
were obtained from sowing at the rate of
five pecks per acre.

ODD, QUEER AND CURIOUS.

For five years the county jail at Cal-
ifornia, Ill., has not had a prisoner.

A locomotive engine was recently
perfected in England, and was recently
tried on one of the roads, which can
make, average time, ninety miles an
hour.

A BARBER shop on a grand and luxu-
rious scale, the operators of which
are to be removed, is about to be opened
in London. They are all to wear caps
and short sleeves.

In Buenos Ayres an opera box for
sixty nights costs seven thousand dol-
lars. Coal for range or fire-place is
from thirty-eight to forty dollars per
ton. You may go to the circus for five
dollars and a half. Shoes are worth
from ten to twelve dollars.

SIXTY-SIX Thankgiving dinners
have been eaten by Thomas Tuttle and
his wife, of Stratham, N. H., in the same
room. They have been married nearly
seventy years, and are both in their
ninety-second year.

A PIECE of pink coral thirty feet long
and six inches in diameter at one end,
which was washed up on the beach of
Japan, was recently obtained on the
coast of Japan. Its value in a
prepared state would be worth about
\$15,000.

One who has figured that there are
in Denver, Col., thirty-one millionaires,
whose aggregate wealth is \$45,000,000,
and thirty-five semi-millionaires, whose
wealth aggregates \$17,000,000, making
in all \$62,000,000 owned by sixty-six
men.

AMBERGRIS, from which many per-
fumes are made, and which is some-
times used to flavor wine, is merely the
mordant secretion of the liver of a sick
sperm whale, and is a fatty sub-
stance, disagreeable to sight,
touch, but even in its crude state
affords a pleasant odor.

From its source to its mouth, the
Amazon is 3,500 miles in length, but
the name Amazon is not to be ex-
plained in that space. From its Lake
Itasca source to the Gulf of Mexico,
it is 2,616 miles long, and from its
Mississippi source to the Gulf,
4,194 miles in length.

and thirty-five semi-millionaires, whose
wealth aggregates \$17,000,000, making
in all \$62,000,000 owned by sixty-six
men.

AMBERGRIS, from which many per-
fumes are made, and which is some-
times used to flavor wine, is merely the
mordant secretion of the liver of a sick
sperm whale, and is a fatty sub-
stance, disagreeable to sight,
touch, but even in its crude state
affords a pleasant odor.

From its source to its mouth, the
Amazon is 3,500 miles in length, but
the name Amazon is not to be ex-
plained in that space. From its Lake
Itasca source to the Gulf of Mexico,
it is 2,616 miles long, and from its
Mississippi source to the Gulf,
4,194 miles in length.

TOPICS OF INTEREST TO THE
FARMER AND HOUSEWIFE.

Some Valuable Information for the
Farmer, Stockman, Poultryman, Nursey-
man, and Everybody Connected with the
Farm.

THE FARM.

Corn Ensilage for Beef.
At the Ontario Agricultural College
experiments have been made with corn
ensilage as a food for making beef.
The following summary of results: 1.
That shipping steers can be fed at a fair
profit with prices of grain as at present.
2. That good quality ensilage can be made
from good types, when they are pro-
cessed at reasonable rates and where
