Sing again, O, lady mine, Your rare dity of the Rhine! Lovely visions rise and float On the wave of each full note; Silvery daybreaks brighten slow, Suncets blush on mountain snow, Mocalight shivers on the sea, Autumn burns in bush and tree, And a chearm lights everything— And a charm lights everything-As I listen and you sing.

Blowing willows bend and sigh,
Whispering rivers wander by,
Through the pines sweep sea-tones soft,
Satling rooks shout loud aloft,
Wildfowl encoming cross the mere,
Throstles in the dawn call clear,
Vanished faces gloam and go,
Eilenced voices murmer low,
Gentlest memories come and cling—
As I listen and you sing.

Ah! repeat the music's tale.

Love shall perish not, nor fail!
I forget the fear of death,
Breathe in thought immortal breathe
I believe in broadening truth,
In the generous creeds of youth,
In consoling hopes that climb
Up to some triumphal time,
And a dream of splendor bring—
As I listen and you sing.

his way, and each and every one to work out his own mission. It was a red morocco shoe, old and worn and faded—a shoe which had covered the chubby foot of somebody's baby as he crept about the floor or stood on his feet beside a chair. Not some rich mother's baby, but the offspring of some mother whose days and nights were terrified by the presence of cold and hunger. That wee shoe told me the story of a garret room-of hope and despair of misery long drawn out -of a mother's love and a mother's broken heart. I wanted it to lay away among my relics, so that I might look at it now and then when men told me that the world no longer had a heart. At the door as I went out I stumbled against an old woman half helpless from drink-a woman whose red and bloated face and scandalous tongue would have shamed the lowest vagabond of New York's

lowest dive. She struck and kicked at me. She dared me to fight. She showered oaths and sneers and gibes at me until I was too astonished to move away. I had that baby shoe in my hand as she railed at me. Her eyes were red and inflamed and I thought ber half blind. All at once she ceased her vituperations, bent forward for a closer look and asked in a woman's soft voice:

"Is it a baby's shoe you have there?" "And you found it?" "In the store here."

Why the Screw Was Reduced. It is always a matter of surprise to the uninitiated that so small an object as the regulation screw can send a huge ocean steamer through the water at twenty miles an hour. The small size of the screw is not due to the perception of any inventor of its greater effect as compared with a larger one, but purely to accident. At first screws for steamers were made as large as possible, it being the theory that the greater the diameter placed on Lake Erie with a screw so large that it was deemed best to cast each blade in two parts, and then weld them together. During a storm all these blades of the propeller broke at the welding, reducing the diameter by more than two-thirds. To the surprise of the captain the vessel shot forward at a speed such as had never been attained pefore. Engieers then experimented with small propellers, and discovered that they were much more effective than large ones. Had it not been for that accident we might have gone on u-ing the large bladed screws to the present day .- St. Louis Globe-Demo-

For Coughs & Colds John F. Jones, Edom, Tex., writes I have used German Syrup for the past six years, for Sore Throat, Cough, Colds, Pains in the Chest and Lungs, and let me say to anyone wanting such a medicine-German Syrup is the best.

B. W. Baldwin, Carnesville, Tenn. writes: I have used your German Syrup in my family, and find it the p best medicine I ever tried for coughs and colds. I recommend it to everyone for these troubles.

R. Schmalhausen, Druggist, of Charleston, Ill., writes: After trying scores of prescriptions and prepara-tions I had on my files and shelves, without relief for a very severe cold, which had settled on my lungs, tried your German Syrup. It gave me immediate relief and a permanent cure.
