in the world. The question of the res-

toration of the temperal power of the pope will be treated, not as an Italian

question, but as one of universal con-

board through the Dardanelles. The

A correspondent having asked for fur-ther explanation of this, the Bulletin answered in part as follows: "In applying this 30 per cent. ratio to the enhancement of the cost of railroad twelve feet. They have twenty-two classes. These have been posted at the

construction and transportation, we aimed to be largely within the truth, as will appear from the fact that for the years 1865, 1875, 1880, and 1885 the duty elsewhere, so as to give all persons opportunity to inspect them. For three weeks they were thus displayed, and on iron rails averaged 40 per cent, and

Our enormous crops, with good prices, which would not be possible in the nar-row confines of the home market, are row confines of the home market, are how teaching our farmers the value of their foreign market as they have never seen if before. While they are thus learning in a most practical way the im-mense importance of the European mar-ket, let them not forget what the pro-feation do time about these market is. tection do trine about that market is. The principal American book setting forth the doctrines of protection is that of Carey. This is the greatest work yet of Carey. This is the greatest work yet produced by an American protectionist, and our high tariff crowd are accus-tomed to swear by Carey. And what says Carey about the foreign market? "Our country would be better off if the Atlantic were an impassable ocean of fire, and a prolonged war between this country and our best customer. Ea-gland, wou'd prove an atvantage." Do the farmers think so? Let them imagine what would now be the price of imagine what would now be the price of wheat if the 200,000,000 bushels which Europe will probably call for this year were kept at home to glut our own But this queer doctrine is also the

Fournal.

doctrind of McKinley. Here are his "If our trade and commerce are inreasing and profitable within our own borders, what advantage can come from cassing by confessedly the best market that we may reach the poorest by dis-tant seas? In the foreign market the profit is divided between our own sit-izen and the foreigner, while with the trade and commerce among ourselves the profit is kept in our own family and increases our national wealth, and pro-motes the welfare of the individual cit-

Yet "the poorest by distant seas" is now booming the prices of wheat in a way to make the farmers smile Would it not be wiser to court that market very vigorously by taking more freely what it has to offer in exchange?

Protection's Check. The great crops of all kinds of agricultural products are now attracting universal attention; and already the protectionist organs are congratulating themselves that these big crops are go-
