MEANING OF FRANCE'S INSULT TO BULGARIA.

The Rupture of Diplomatic Relations Between France and Bulgaria May Be a Diversion .in Russia's Interest-England and the Dreibund Not Surprised.

The Peace of Europe Endangered. The rupture of diplomatic relations between France and Bulgaria on the pretext of the expulsion of the French journalist, of the French in a diplomatic scheme to ask the Sultan to use his suzerain right to interfere in Bulgaria in the Russian interest. This development is no surprise to Lord Salisbury and his diplomatic allies in Vienna and Berlin The Austrian government was probably acting in concert with Lord Salisbury, and Chancellor Von Caprivi and Helps its Customers when they Need Help. supports the Bulgarian bureau. The St. Petersburg Vedomosti, after suggesting that it is possible that France, failing to obtain satisfaction, may blockade the Bulgarian ports, says that Russin will protest against the appearance of French ironclads before Varna or Bourgas. If M. Ribot's policy reults thus, the peace of Europe is over.

> Sugar Bounty in Their Way. It is reported in Washington that the French and German legations will use all their diplomatic powers to try to secure the repeal of the sugar bounty clause of the McKinley tariff law. France and Germany have in the past practically monopolized the American market for beet sugar and the reciprocity clause of the McKinley bill has given the President an effective weapon to compel some commercial concessions from those two nations. If they can secure the repeal of the bounty clause they believe that they can monopolize the market for beet sugar in the United States and at the same time prevent the successful introduction of this new industry which has obtained a firm foothold in Nebraska and California and which shows signs of healthy
