So thoort, in Tasmania, there is a large cave with an entrance through limestone formation . A considerable stream of water flows along the chambers of the cave. The first chamber reached by the explorers showed some fine stalactites pendant from the roof, and stalagmites covered the foor with thousands of miniature steeples. All this is qui e common in great caves, but now comes the marvel: The lights carried by the explore s were suddenly extinguished by a whiff of wied and simultaneously the eiting and sides of the cave seemed to be tadded with diamonds. This marvelou ellect, as afterward appeared, resu ted from the presence of m Ho s of gow-wo ms, hanging to the side ....

e roof of the cavera On pa sing it thambers farther from the entrance the plorers found simila but much grand r sights, the numbers of the glow-worms hereasing with the greater quantities of sis actites and stalagmites. About bree fourths of a mile of cave length was explored, but it is supposed that the e treme length is from three to four miles, and that Tasmania, therefore, is probably the most wonderful cave titus tar discovered.

Safety in the Midst of Danger. This would seem a contradiction -is so, in act to the eye. But experience has proved 's possibility. Take the case of the inlividual who dwells in a malarious region. 4 rebugt constitution is no certain defense eligit of half a century, proves that Hostet. cr's Stomach Bitters is precisely this. This socialized desired limit the field where the nelicine has proved its efficacy. In South America; the Ishmus of Panama, Mexico, iverywhere in fact where missins-born disage takes on its most obstinate and formidble types, the Bitters is a recognized specific it illimitable demand, and prescribed by physicians of repute. Potent too is it in disbirders of the stomach, liver and bowels, and against that destroyer, is crippe. It improves against that destroyer, la grippe. It improves appelite and sleep, neutralizes rheumatism and sidney complaints.

## NEW COOKING STOVE.

BY CLARA AUGUSTA

Mrs. Job Bangs was possessed of a but then men are so prone to indulge in extravagant expressions that it is not well to place too much dependence

in what they say. Mrs. Bangs' greatest ambition was tgainst the dreaded chine. What is? Be to possess a peculiar kind of cooking chimney to burn out without help, all erded testimony, covering a period little stove—the counterpart of which presided, in black and glossy self-satisfaction, over the cleanly kitchen hearth of Mrs. Judge Marlow's grand establishment.

> "Queen of the World" was the title in which the interesting stove re-

The queen herself was possessed of as many dampers, grates, heaters, lues, ovens and nondescript pokeholes as a twenty-horse-power engine: and scientific old Watt himself would the use of her "heat refractors" and "steam generators."

But Mrs. Marlow fancied the stove -and, surely. Mrs. Judge Marlow ought to know about a stove—and the consequence was poor Bangs could "that stove, dear Job," dinged in his

There is a period to human endurance, and the time at length came when Bangs could hold out no longer, but consented to make his wife the happiest of her sex forthwith. And three days afterward the deed was acthe World, which cost \$45, was in- for a dozen years. delighted lady would not have changed places with the President's ain't the thing; they're great cry and

The man who set up the stove asked Mrs. Bangs if she knew how to manage it. She laughed in his face. Know how to manage a stove? Of course she did! Why shouldn't she? And before her lofty mien of injured dignity the stove man shrank away

It was in July, pleasantly hot, and dinner was to be prepared for the six hired men who made Mr. Bangs' farm blossom like the rose.

Mrs. Bangs cogitated on the subject of dinner for a few moments, and finally decided on boiled potatoes, stewed cabbage, fried pork and hominy pudding, with hot coffee, etc. "Come, Bangs, love," she said cheerfully, "make a fire while I clap on the kettles and see to things, and you shall soon have a dinner worth eating."

Bangs flew to do her bidding, but after opening and shutting several with the kindlings in his hands, he was still undecided, and called his wife out of the meal closet.

"See here, Sarah, can you tell me where to build the fire?" "Why, in the place for it, to be

sure," replied she. "Yes, deary, I've no doubt of that," rema ked the perplexed bangs; "but a cording to my idee, it wald take a college, I and man to had out w' ich the place is!" "Why, the one where the grate is of course," said Mrs. Bangs.

"Well, there are just seven holes with grates in 'em, and three things that look like strainers; according to my idee, I can't tell to'ther from which."

"Stand round, Job; I'll soon find weaknesses, and irregularities, it's out. Why, Bangs, it's strange that guaranteed to give satisfaction, or you can't see into nothing; this is the the money is refunded. It does place-rite here in front. In with all that's claimed for it, or it the kindlings, and be spry about it; it's a'most 'leven o'clock now."

So Bangs put in the kindlings-a generous quantity of shavings, some pitchwood and a hemlock knot-applied a match and stood by to watch the result. The fire sputtered and poured out of every nook and cranny of the queen. Poor Bangs' eyes were rapidly changing to pools of watery revolves. As it gets to the top its tears, and his sense of vision fled completely.

gracious!" screamed Mrs. "Good "Job, you've set the house Bangs.

"No, I haint," stammered Job, wiping his eyes on his coat sleeve. "According to my idee, it's that confounded stove.

"Mercy on us! Where's the damper? -where's the draft?-where's the air slide? Job, Job, where are you, that you don't do something? The new whitewash will be ruined in this smoke!"

over her head, and Bangs managed to just the right gait and maintainget up to a window, at which he obcained some relief. In a few moments the kindlings had burned out and the smoke subsided. There was no draft!

charmingly. legs quivered and trembled, the forward one dropped out, the immacuover she went, kettles and stewpans. consumes itself when exposed to the took royal advantage of it. The has much the appearance of iron ore

fire" at the height of their voices; at almost a white heat, remaining in took up the cry; Mrs. Bangs was which it gradually cooled off. It was ankle-deep in hot water and floating then found to be but half its first potatoes; the house dog lay prostrate weight, and resembled much the under the ruins, howling with fright fragments of meteors that are found and pain, and Mr. Bangs had fled to on the surface. the elevation of the kitchen table,

broad dish of hominy pudding which his wife had prepared for baking.

The cries of fire called out the engine company—ever prompt in danger and stripping down Mr. Bang's through a fine field of corn and up to the house. Just as they arrived, covered with perspiration and out of wringing her hands in the wildest agitation.

The zealous captain of the company was a little near-sighted, and suppos ing the lady's clothing to be on fire, filled, and let fly the whole stream of knocked her over instantly, and after a few somersaults she came to a halt gives to the content of the strength it holds. in the rain-water cistern, from whence she was afterward fished out half drowned and considerably indignant,

The grand uproar aroused a highspirited bull that was confined in an adjacent yard, the red and wild-eyed. uniforms of the firemen inspired his bullship with just wrath, and after a half dozen premonitory and cleared the barring.

Captain, privates and populace, aselevated head and those smoking nostrils. fled ingloriously, leaving Bangs' except Judge Marlow, who, being a away the spoon and bottle. dignified man, did not compromise his dignity until the last, when he

The bull singled him out from the others, caught him on his horns, and tossed him into the pig-pen, where the irate mother of ten promising porcine little ones nearly finished him. In fact, the Judge would never have come out of that hog's yard alive had not Mrs. Bangs, recovering from her have been puzzled in comprehending temporary fright, gone to the rescue with the mop handle.

The bull, after scattering all intruders, turned his attention to the engine which was left behind, and never were the walls of a beleaguered never retire to bed without having ously than he charged that non-resicity battered and charged more zealdent "masheen." Mr. Bangs came down from his perch as soon as the crowd had dispersed, and secured the quadruped, now pretty well blown,

from his extraordinary exertions. "The Queen of the World" was sold for old iron, and Mrs. Bangs cooks unmurmuringly over the little old concomplished; a magnificent Queen of trivance of a stove that she has had less because he cried.

> Bangs says that, "according to his idee, these here new-fangled stoves little wool."

> > Russia Retrograding.

Henry Labouchere says in London Truth: "I hear that it is expected at Berlin and at Vienna that the furious persecutions which are now disgracing the Government of Russia will assuredly lead to some frightful catastrophe before many months have passed. It is not only the Jews who are ruthlessly persecuted, but the Protestants and Roman Catholics also. The Czar is now positively execrated by the Finns, who were formerly his most loyal subjects, in consequence of the insane attempts to complete the Russification of Finland. Russia has gone back forty years in a few months. Persons of rank, of the liberal professions, and of both sexes, are being ferociously flogged all over the country. At Warsaw the other day a Catholic priest of exemplary character received sixty strokes with a birch-rod because he had endeavored to hold a service in open air after his church had been closed by the police. The Emperor has abolished all the privileges of the provincil councils, trial by jury is suspended for an indefinite period, and the schools and universities are ruled as if they were barracks or prisons. The political reaction which has gone on since the present advisers, who are as reckless as they are stupid and brutal, can only end either in a revolution or a military or palace coup d'etat. Alexander is either a maniac, like most of his family, or else he is so

Driving on Muddy Roads,

A writer in the Providence Telegram undertakes to show how a wagon may be kept comparatively clean when driving over a muddy road. According to him this result depends upon of pictures, says a writer in the St. maintaining just the right speed, the golden mean, as it were.

If the horse is driven at a walk, say about three miles an hour, the taken a vast number of such pictures. burial. mud which adheres to the rim of the Have you ever seen anything like wheel will be carried up by it as it them? weight will cause it to fall, spattering the spokes and the hub.

If the horse is going six or seven miles an hour, the rapid revolution of the wheels will send the mud flying, and all parts of the vehicle will receive a copious plastering.

But now, if a gait of four and half or five miles an hour be taken, the mud carried up from the ground will neitner drop nor be thrown off. and the consequence will be that with the exception or the rim of the wheels the carriage will come to the end of the journey comparatively clean. Everything depends upon striking

hands. "Give you what, Tommy?" asked the mother, pushing past him. "Why, my candy, mamma! The candy you promised to get me."

it to me," he cried, holding up both

"I forgot it, Tommy. You'll have to do without this evening." "But, mamma, you promised it, cried Tommy, in the micst of copious tears, as though that was reason enough.

"But didn't you hear me say I forgot it?" asked the mother, as though that, also, were reason enough. And then Tommy was sent to bed supper-There were several lessons

Tommy in this-I really can not tell how many. "Mary," said Tommy's father one day in a grieved voice, "how does it come that Tommy is growing to be such a coward? I wanted to send him up-stairs after my slippers last night, and nothing could induce him to go because it was dark. The idea of a boy being afraid of the dark! He's

going to be a perfect milksop—and I

was so anxious for him to be a fearless, manly boy. And then the mother said she couldn't account for it any way in the world. She was sure there had never been any cowardice in her family. She had never dreamed of such a thing as being afraid in the dark when she was a child, and it was a mystery to her how Tommy got such notions into

"Mary," said Tommy's father again, a few days later, "twice lately I have caught Tommy in a deliberate lie, and I have suspected him of lying half a dozen times in as many days. Now, lying is one thing I can't positively stand. I have tried so hard to teach the boy to be perfectly frank and honest and to tell the truth at whatever risk."

And Tommy's mother said that she really couldn't understand it, that Tommy's training had been of the most careful kind; but she thought Tommy must have learned to tell lovely frill." falsehoods from that last servant-Emperor fell into the hands of his girl. As for hers lf, she had never told a lie in her lite.

Whereupen Tommy was called up and was lectured and talked to and talked at until his brain was in a whirl. He did not say anything in his own defense. He might have saturated with apprehension for his said a great deal, but he was no oraown personal safety or with religious tor, and besides he did not understand the whole situation himself. Even if fanaticism that he is practically in- he did understand it all it would not have been very polite, would it, for Tommy to say that his first lessons in cowardice, and meanness, and selfishness, and falsehood, and deceit, were taught him by his mother?

> The Ocean No Longer Trackless We speak of the ocean as "trackless." It is so no longer. If two vessels sail from New York for Calcutta, they will, if intell cottly navigated, follow so nearly the same course, that their paths, if plotted on a chart, will hardly diverge by fifty of every other route. Let us consider the case of a vessel bound to New York from Liverpool. Her captain might, if prepared for a constant battle againsts adverse winds and currents and winter gales, select a route not very different from that followed by ocean steamers between those wish I could walk home or else stay Price 50 cents at Druggists or by mail. ports. Otherwise he would follow the southern route laid down by the Sniling Directors; and after beatingto the westward a few hundrol miles to make sure of clearing the coast of Spain, would shape a course to the southward, passing as far west of Modeira, as the westerly wind of these latitudes will permit. Between Madeira and the Canaries, but a few hundred miles to the westward of both, he would fan his way across the baffling "Calms of Cancer," and pick up the northeast Trades. With these astern and freshening every mile, he would sweep down to the South and West, and when well over toward the West Indies, haul up to the northward Bermuda. Here he would have

Sold by drugists. 75c. to work again across the Calms of Cancer, and then, with the uncertain, but probably westerly winds of our Atlanta coast, and with the Gulf Stream in his favor. he would stand on and make his port, having sailed forty-five hundred miles between two letter or package is place in this eleva- it on hand for use the moment it is needed ports, less than 3,000 miles apart, tor an electric circuit is closed, opening If neglected the grippe has a tendency to but with winds and current almost uniformly favorable, and with fine and

Some Curious Sponges.

graphical Magazine.

nat live in the ocean are the spong of the great depths, which have often very curious and interesting forms,' said a naturalist to a Washington Star reporter. "Not least remarkable are the so-called 'sea-nests,' which | matically emptied of its water and the Pulmonary affection. are in the form of spheres or sometimes egg-shaped. The outer coat of one of these specimens is a complicated network over which a delicate membrane is spread. An ornamental frill adorns the upper part while the lower portion throws out a maze of glossy filaments like fine white hairs. These hairs penetrate the semi-fluid mud in every direction, thus holding the sponge in its place, while a con- or samples free tinuous current of water is drawn by waving 'cilia' through all parts of the mass, passing out by a hole at the top.

In this manner the animal absorbs whatever food may be affoat. "Another singular sponge is the glass rope,' which sends down into the mud a coiled wisp of filaments as thick as a knitting needle. The latter opens out into a brush, fixing the creature in place after the manner of a screw pile. Still another remarkable sponge is found in deep water off the Loffodon Islands. It spreads out into a thin circular cake, surrounded by a fringe of what looks like a fringe of white floss silk. Yet another curiosity is the 'eupectella' sponge of the Phillippines, which lives imbedded to its lid in the mud and supported by a

Derelict Vessels.

Competent maratime authorities estimate that there are more than \$2,000,-0 0 worth of derelict vessels and cargoes floating about in the Atlantic, and a considerable part of the loss falls upon Maine people. Some of these vessels have unsinkab'e cargoes, and unless blown up or burned by government cruisers, or towed into port by wrecking tugs, will long continue to be dangerous obstacles on ocean highwas Many wrecking t gs are now cruising for the derelicts nearest the Naine coast, and some of the abandoned craft will probably be towed in. The least of them would be a rich find for the wreckers.

A COUGH, COLD OR SORE THROAT should not be neglected. BROWN'S BRON-CRIAL TROCHES are a simple remedy, and give prompt relief. 25 cts. a box.

One of Maine's Queer Hermits. Among the many hermits in Maine. Jo' , mal | Key's Corner, in Wakeweld, is the queerest He lives in a tumlarge dog, a cross between an English | b e-down but, through the roof of which rain and snow, sunlight and starlight have easy access. He cooks his own lood. makes his own bed, and does all the work about his "estate," including at the stable, so fond is Karl of de- the care of an emaciated horse. He be lieves in witches, and every night, de and chained up, but though in gen- spite his 70 years he mounts guard with a shotgun to shoot any hobgoblins that

may issue from the hedges. Coughing Leads to Consumption. Kemp's Balsam will stop the Cough at once. Go to your Druggist to-day and get a free sample bottle. Large bottles 50 cts.
