### TWO BARDS.

Two bards who wrote in rhyme  
A book which was a gem,  
It had this stern refrain,  
That moved as though in pain,  
The undertone of graves  
Makes the sea grim.

### WADA THE SHREWDRONE.

Many years ago in the beautiful empire of Japan lived a family named Foga. It consisted of a father, mother and two sons named Hoga and Wada, who were as different as boys would be. Hoga being selfish and cruel, while Wada was bright, witty and generous.

When they were just reaching manhood the cross old father died, leaving home and lands to Hoga, giving Wada only a tiny cottage near his brother's fine estate. The mother, as is the custom of Japan, was compelled to live with her oldest son, and make her home with him, although she longed to be with Wada. Hoga did not allow her to see her youngest son often but when they did meet he would cheer her up with his witty and sharp remarks.

"Never mind, old man (mother)," he would say. "It is better to be poor and witty than rich and stupid. I will soon find a way to get money."

"Where did you get it?" growled Hoga, beginning once to covet such an economical son.

"An old man brought it this morning," said the younger, "and offered to sell it for 100 yen, but I have no money. Can you not lend me this sum?"

"I will not lend you a rin," said the unkind Hoga. "I wish to buy it for myself."

Wada's heart leaped with joy, but he managed to retain a miserable expression of contentment and cried: "Why should all good things come to you? I should become rich with this price and now you take it from me."

After many complaints he handed his brother the kettle, took the money and soon after returned home carrying his precious kettle in one hand and the block of coal in the other. He called in all the neighbors to behold his new purchase. With much ceremony he filled it with water, set it on the block, and then smilingly told the crowd to watch it boil.

Wada watched him through the cracks, and when he was about to fall over the basket cried out: "Be careful! Do not disturb me. I am curing my eye."

### FARM AND HOUSEHOLD.

#### THE LACK OF MINERAL FERTILIZERS FOR FRUIT.

One Cause of Blight, Mildew and Frost-Resistant Fruit-That Is Good-Farm Notes-  
Household Hints.

Mineral Manure for Fruit.  
It is not one reason for increasing uncertainty of the fruit crop the lack of available mineral fertilizers. We believe that this has more to do with failure of fruit to set or to perfect than is commonly believed.

Deficiency of minerals is very possibly also one cause of blight, mildew and rot with which fruit is affected.

Wheat Following Corn.  
One of the most profitable crops of wheat I ever raised, says a recent writer, was on land that had been in corn.

The Best Shoe in the World for the Money.

### Rub In Rub Out

is the way you have to wash clothes with soap. First you rub the soap in; that's work in itself. Then you rub it all out again over the washboard. If you're strong and healthy, and rub hard enough, you may get the dirt all out, too. It's hard work, and every woman knows it. But it isn't the woman only that suffers. She's wearing the clothes out, rubbing them to pieces, all the time. It's just as hard for every thing as it is for every body.

### Soak In Soak Out

is Pearline's way of washing. All it wants is to be let alone. Put it in the water and it does its own work - yours, too. It brings the dirt out easily and quickly - no hard work, no wearing rub, rub, rub, no washboard. Doesn't that seem better? It is better. There's a saving of strength and a saving of clothes. And, what some women can't believe, it's absolutely safe. It's just as good as any good soap.
