I presume I may now inform those gerous position, assembled on the who read it for the first time, that the royal humane society of England soon after sent to Mr. Lyons its gold sculls, had come more than half-way medal in recognition of his daring across, and were now, as nearly as deed-how daring no one unacquaint-

ALL IN A WATCH. Some of the Marvels of a Time-Plece's Open your watch and look at the little wheels, springs and screws. each an indispensable part of the whole wonderful machine. Notice the busy little balance wheel as it flies to and fro unceasingly, day and night year in and year out.

This wonderful little machine is the result of hundreds of years of study and experiment. The watch carried by the average man is composed of ninety-eight pieces and its manufacture embraces more than 2 000 distinct and separate operations. Some of the smallest screws are minute that the unaided eyes cannot

distinguish them from steel filings or specks of dirk. Under a powerful magnifying glass a perfect screw is revealed. The slit in the head is two one thousandths of an inch wide. It takes 308,000 of these screws to weigh a pound, and a pound is worth

The hair spring is a strip of the finest steel about nine and one half inches long, one hundredth of an inch wide and twenty-seven ten thousandths of an inch thick. It is colled up in spiral form and finely tempered. The process of tempering these springs was long held as a secret by the few fortunate ones possessing it, and even now is not generally known. Their manufacture requires great

Not Intimate. "Do you know Colonel Blender?" Royal Baking Powder.

THE GOVERNMENT TESTS ESTABLISH ITS ABSOLUTE SUPERIORITY.

(Data from the latest Official U. S. Government Report on Baking Powders, Department of Agriculture, Bulletin 13, page 509.)

Royal is placed first of the cream of tartar powders, actual strength, 160.6 cubic inches of leavening gas per ounce of powder.

Every other powder tested exhibited 2 much lower strength than the Royal, the average being 33 per cent. less.

Every other powder likewise showed the presence of alum or sulphuric acid.

The claim that this report shows any other powder of superior strength or purity has been denounced as a falsehood by the Government officers who made the tests.

Avoid all baking powders sold with a gift or prize, or at a lower price than the Royal, as they invariably contain alum, lime or sulphuric acid, and render the food unwholesome.

The Labor Question.

The labor question is attracting a great deal of attention. In fact it is the subject that is uppermost in the minds of the public at this time. The main thing is how to produce strong men, for the whole subject must ultimately rest upon the ability of the leaders to think clearly and outline a plan that shall be based upon solid facts. To this end it is highly necessary to keep the men at the head of these societies in good health. Reid's German Cough and Kidney Cure will Tommy-I thought you did.
